 In recent
 years Pakistan

has emerged
 as a strategic
 player on the
 world
 stage—both
 as a potential
 rogue state

armed with nuclear weapons and as an American ally in the war against terrorism. But our understanding of this country is superficial. To probe beyond the headlines, Stephen Cohen, author of the prize-winning *India: Emerging Power*, offers a panoramic portrait of this complex country—from its origins as a homeland for Indian Muslims to a military-dominated state that has

experienced uneven economic growth, political chaos, sectarian violence, and several nuclear crises with its much larger neighbor, India. Pakistan's future is uncertain. Can it fulfill its promise of joining the community of nations as a moderate Islamic state, at peace with its neighbors, or could it dissolve completely into a failed state, spewing out terrorists

and nuclear weapons in several directions? The Idea of Pakistan will be an essential tool for understanding this critically important country. *Antigua and Barbuda* Pan American Health Org This book analyzes the performance of South Asian educational systems and identifies the causes and correlates of student learning outcomes. Drawing on successful initiatives

both in the region and elsewhere in the world, it offers an insightful approach to setting priorities for enhancing the quality of school education in South Asia.

Changing India Rowman & Littlefield

The purpose of this Public Expenditure and Financial Accountability (PEFA) performance assessment is to provide an objective analysis of the present performance of the public financial

management system in Antigua and Barbuda, and identify changes incurred since the last PEFA assessment undertaken in 2010. In the wake of a prolonged economic crisis, fiscal outcomes have not been consistent with the budget as approved. Central government public finances are comprehensively presented in budget documents, but some weaknesses persist. New

policy initiatives and their budgetary implications are not sufficiently analyzed; a significant share of extra-budgetary expenditures remains unreported; and oversight and reporting requirements of statutory bodies are not yet fully enforced, impeding a comprehensive assessment of the associated fiscal risks. Although the revenue administration has been strengthened

over the last years, the control over budget execution is still weak. There have been improvements in the quality of external audit, but lack of Parliamentary scrutiny undermines the accountability framework. World Report 2020 International Monetary Fund The Trade Policy Review Mechanism, a permanent feature of the World Trade Organization (WTO), is

designed to contribute to improving adherence by all WTO members to rules, disciplines, and commitments made under the Multilateral Trade Agreement. This volume in the series provides information on the trade policies, practices, and macroeconomic situations of El Salvador. Each Trade Policy Review is expertly prepared after in-depth analysis of an individual

nation by the WTO's Trade Policy Review Board." **Impunity** Oxford University Press A serious and effective effort to meet the challenges of illicit power in the 21st century will require technology, global partnership, and an integrated, comprehensive campaign driven by international commitment and broad political will. Of the many important lessons that emerge from

these essays the most important is to be skeptical of concepts that divorce conflict from its political and human nature, particularly those that promise fast, cheap victories through technology while ignoring the need to confront illicit power in war and transition. *Smart Technologies and Innovation for a Sustainable Future* Oxford University Press, USA
This book gathers

selected high-quality research papers presented at the IconSWM 2018 conference, which explore various aspects of urban mining. In addition, they discuss how to achieve sustainable waste management systems, urban mining, landfill mining, material recovery, circular economy, etc., with the aid of effective waste management practices. Additional

topics covered include maximum resource circulation and efficiency, key differences between landfill mining and urban mining, and how urban mining can be combined with the concepts of circular economy and sustainability. *Neonatal Tetanus Elimination* Westland Publications Limited
The human rights records of more than ninety countries and territories is put into perspective in

Human Rights Watch's signature yearly report, which, in the 2014 volume, highlighted the armed conflict in Syria, international drug reform, drones and electronic mass surveillance, and more, and also featured photo essays of child marriage in South Sudan, the cost of the Sochi Winter Olympics in Russia, and religious fighting in Central African Republic. Reflecting

extensive investigative work undertaken in 2014 by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report 2015 is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.

Nimble Books

Recent

writings on Pakistan have tended to focus on the role of the Pakistan Army, the nuclear programme, terrorism, Pak-Afghan and Pak-US relations and, of course, Indo-Pak relations. Pakistan: Courting the Abyss goes beyond sensationalist headlines and current crises like terrorism and tensions with India, to the deeper malaise that afflicts the nation. The book examines

issues like identity, the looming water crisis, the perilous state of education, the economic meltdown and the danger of an unrealized 'demographic dividend' that have been eating the innards of Pakistan since its creation. It looks back at the Pakistan movement, where the seeds of many current problems were sown - the opportunistic use of religion being the most lethal of these. Pakistan:

Courting the Abyss questions the flawed prescriptions and responses of successive governments, especially during military rule, to these critical challenges that have brought Pakistan to an abyss where it risks multi-organ failure, unless things change dramatically in the near future.

[RAW, a History of India's Covert Operations](#)

Bernan Press
The Research and Analysis Wing, India's

shadowy external intelligence agency, is one of the country's least understood institutions?at least in part by design. Perhaps fittingly for a spy agency, there is very little information about R&AW in the public domain. What is this organisation, its structure, its role and vision? Why was it set up? Who are the people that run it?Set up in 1968, as a reaction to India's massive

intelligence failure during the war with China, R&AW played a crucial role in the formation of Bangladesh. It has since carried out highly successful covert operations in Fiji, Afghanistan and Sri Lanka, and has countered and foiled Pakistani spy agency ISI's machinations in the subcontinent. R&AW has operations in other parts of the globe too; it played an important role

during the Iran-Iraq war, for instance. No country can increase its global reach without intelligence support. That India has made enormous strides in its stature and influence is testimony to RAW's success. Yet, public accounts of its work exist only in highly romanticised fictional stories. Investigative journalist Yatish Yadav follows the lives of real agents and

maps their actions in real situations. His conversations with Indian spies provide insight into how covert operations actually work. RAW: A History of India's Covert Operations is the first comprehensive account of Indian spy networks and their intelligence gathering, and their role in securing and advancing Indian interests. Nature Digital media histories are part of a global network, and South Asia is a key nexus in shaping the trajectory of digital media in the twenty-first century. Digital platforms like Facebook, WhatsApp, and others are deeply embedded in the daily lives of millions of people around the world, shaping how people engage with others as kin, as citizens, and as consumers. Moving away

from Anglo-American and strictly national frameworks, the essays in this book explore the intersections of local, national, regional, and global forces that shape contemporary digital culture(s) in regions like South Asia: the rise of digital and mobile media technologies, the ongoing transformation of established media industries, and emergent forms of digital media practice and

use that are reconfiguring sociocultural, political, and economic terrains across the Indian subcontinent. From massive state-driven digital identity projects and YouTube censorship to Tinder and dating culture, from Twitter and primetime television to Facebook and political rumors, Global Digital Cultures focuses on enduring concerns of representation, identity, and power while grappling with algorithmic

curation and data-driven processes of production, circulation, and consumption. Urban Mining and Sustainable Waste Management Random House This paper provides details of Public Expenditure and Financial Accountability (PEFA) Assessment report for Niger. The measurement of the public financial management performance indicators shows that

progress has been insignificant. Reform programs in progress in the area of oversight and external auditing are moving ahead; as this trend continues, the progress will be reflected in the scores of subsequent assessments. However, the progress of the external audit will continue to depend on positive trends in the area of accounting, information recording, and financial

reporting.
Global Digital Cultures
 International Monetary Fund
 How can governments ensure that women have the same employment and entrepreneurship opportunities as men? One important step is to level the legal playing field so that the rules for operating in the worlds of work and business apply equally regardless of gender. Women, Business and

the Law 2018, the fifth edition in a series, examines laws affecting women's economic inclusion in 189 economies worldwide. It tracks progress that has been made over the past two years while identifying opportunities for reform to ensure economic empowerment for all. The report updates all indicators as of June 1, 2017 and explores new areas of research,

<p>including financial inclusion. <i>Budget Theory in the Public Sector</i> Indiana University Press Contributed articles presented at a seminar held by North East India Council for Social Science Research, in May 1997; study on North East India. <i>Fertilizer Situation</i> lucn-World Conservation Union What impact does 40 years of war, violence, and military intervention</p>	<p>have on a country and its people? As the "global war on terror" now stretches into the 21st century with no clear end in sight, Identity and Politics in Modern Afghanistan collects the work of interdisciplinary scholars, aid workers, and citizens to assess the impact of this prolonged conflict on Afghanistan. Nearly all of the people in Afghan society have been affected by persistent violent</p>	<p>conflict. Identity and Politics in Modern Afghanistan focuses on social and political dynamics, issues of gender, and the shifting relationships between tribal, sectarian, and regional communities. Contributors consider topics ranging from masculinity among the Afghan Pashtun to services offered for the disabled, and from Taliban extremism to the role of TV</p>
--	---	--

in the Afghan culture wars. Prioritizing the perspective and experiences of the people of Afghanistan, new insights are shared into the lives of those who are hoping to build a secure future on the rubble of a violent past. In Their Own Words Seven Stories Press Since the beginning of the pandemic, efforts have been made to monitor both school closures (and re-opening) and the measures put in place to

ensure continuity of learning. These include the Survey of Ministries of Education on National Responses to COVID-19, jointly supported by UNESCO, UNICEF and the World Bank. However, to date, no systematic evidence has been available on how students' learning is being affected by the disruptions caused by the pandemic or on the impact of education response

measures initiated by governments. This report contributes to filling this evidence gap and includes a series of simulations of potential learning losses due to COVID-19 and exploration of their longer-term implications. The analysis is based on the Enabling learning for all framework, which outlines access, engagement and enabling environment as the three crucial enablers for learning, while

the simulation assumptions are informed by the evidence on school closures and governments' education-related responses, collected through the joint survey. Technology for Efficient Learner Support Services in Distance Education Springer Nature The Battle for Pakistan showcases a marriage of convenience between unequal partners. The relationship

between Pakistan and the United States since the early 1950s has been nothing less than a whiplash-inducing rollercoaster ride. Today, surrounded by hostile neighbors, with Afghanistan increasingly under Indian influence, Pakistan does not wish to break ties with the United States. Nor does it want to become a vassal of China and get caught in the vice of a US-China rivalry,

or in the Arab-Iran conflict. Internally, massive economic and demographic challenges as well as the existential threat of armed militancy pose huge obstacles to Pakistan's development and growth. Could its short-run political miscalculations in the Obama years prove too costly? Can the erratic Trump administration help salvage this relationship? Based on

detailed interviews with key US and South Asian leaders, access to secret documents and operations, and the author's personal relationships and deep knowledge of the region, this book untangles the complex web of the US-Pakistani relationship and identifies a clear path forward, showing how the United States can build better partnerships in troubled

corners of the world. Laboratory Quality Standards and Their Implementation World Bank Publications This set of five volumes documents the life and work of Manmohan Singh, an academic, a policymaker, and a politician who has had a deep impact on India and its economy. The volumes offer his selected speeches, articles, and interviews, starting from the 1950s,

when he was in the academia, through the 1980s and 1990s, when he was India's finance minister, to 2004-14, when he was the prime minister of India. Manmohan Singh's writings reflect on the reforms that transformed the Indian economy and lay the foundations for a stronger medium-term growth story than the kind that India had witnessed in the preceding 44 years since

Independence. The five volumes bring together Singh's essays and speeches on various subjects- economic reforms,	India's export trends and the prospects for self-sustained growth, trade and development, and international economic order and	equity in development. <u>Pakistan</u> UNESCO Publishing "A Joint Publication With Ontario Principals' Council."
