 COMPACT  
 GEAR TRAIN  
 ASSEMBLY  
 INTRODUCTIO  
 N Detroit  
 Diesel has  
 released a  
 new Compact  
 Gear Train  
 Assembly for

the Series 60 2002 engine. This new assembly offers weight savings, noise reduction and height reduction. The bullgear is a straight cut gear that now rides on bushings. Page 2 1. Timing Pin Figure 1 Crankshaft Timing Pin 2.DETROIT DIESEL SERIES 60 SERVICE MANUAL Pdf Download ...Insert an Allen wrench into the head of the adjusting screw and tighten to 40 inch-pounds.

Loosen the same adjusting screw again with the Allen wrench by backing it off 3/4-turn. Use a ratchet and socket to tighten the lock nut to between 30 and 35 foot-pounds. The injector is now set.How to Adjust a Detroit Fuel Injector | It Still Runsl know that 7045 are one of the oldest model series 60 injector part #. They were even used on some DDEC III engines. I believe they

used 81.0 mm injector height. I don't think using 7045 on your engine without making ECM modifications was such a good idea.Detroit s60 12.7. (help) - MHH AUTO - Page 2He replaced both injectors and the injector harness (as suggested by Detroit), set the injector height to what the valve cover said (78.2 mm) and did a tune up.Series 60 Injector response time too long -

<p>MHH AUTO -                  Page 1Injector                  Height Gauge                  Set Injector                  height gauges                  are used to                  properly set                  injector body                  height to the                  injector                  follower for                  proper fuel                  injector                  timing.                  Incorrect                  injector timing                  can cause                  engine power                  issues, poor                  idle quality                  and fuel                  mileage                  issues. For use                  Detroit Diesel                  Two cycle 53,                  Two cycle 71,                  Two cycle 92,                  Series 60, and                  DDEC IV                  Engines.Inject                  or Height                  Gauge Set  </p>	<p>OTC                  Toolsheight                  detroit series                  60. series 60                  injector height                  adjustment                  detroit diesel.                  tt00006 n3                  injector tube                  installation for                  60 series.                  series 60 spec                  sheet                  schneidertruc                  ks com.                  detroit diesel                  fuel injectors                  53 71 92 149                  60 series.                  overhead on a                  12 7 lt detroit                  2 / 28.Detroit                  60 Series                  Valve And                  Injector                  AdjustmentFe                  atures: 1.This                  injector Height                  Gauge Kit is                  for Detroit                  Series 50 and                  Series 60</p>	<p>engines.                  2.Includes                  78.2mm,                  78.8mm,                  80.3mm,                  81.0mm and                  82.1mm                  gauge blocks                  along with                  knurled                  handle that                  allows for                  block to be                  used at 90°                  angle for use                  in areas with                  restricted                  access.                  3.Similar to                  J-42749,                  J-45002,                  J-39697,                  J-42665,                  J-35637-A.                  4.Machined                  from high                  quality steel,                  providing                  enough                  strength and                  durability,                  corrosion-</p>
