Key to Geometry, Book 3: Constructions McGraw-Hill/Glencoe

Discovering Geometry is designed so that you can be actively engaged as you learn geometry. In this book you learn by doing. You will learn to

use the tools of geometry and to perform geometry investigations with them. Many of the investigations are carried out in small cooperative groups in which you jointly plan and find solutions with other students. Your investigations will lead you to the discovery of geometry properties. In addition, you will gradually learn about proof, a form of reasoning that will help you explain why your discoveries are true, through developing proof group activities and exercises. - p. xiv.
