BESTSELLER • More than
two million copies in print!
The premier resource for
how to deliver results in

an uncertain world,
whether you're running an
entire company or in your
first management job. "A
must-read for anyone who
cares about
business."—The New York
Times When Execution
was first published, it
changed the way we did
our jobs by focusing on
the critical importance of

"the discipline of
execution": the ability to
make the final leap to
success by actually
getting things done. Larry
Bossidy and Ram Charan
now reframe their
empowering message for
a world in which the old
rules have been
shattered, radical change
is becoming routine, and

the ability to execute is more important than ever. Now and for the foreseeable future: • Growth will be slower. But the company that executes well will have the confidence, speed, and resources to move fast as new opportunities emerge. • Competition will be fiercer, with companies searching for any possible advantage in every area from products and technologies to location and management. • Governments will take on new roles in their national

economies, some as partners to business, others imposing constraints. Companies that execute well will be more attractive to government entities as partners and suppliers and better prepared to adapt to a new wave of regulation. • Risk management will become a top priority for every leader. Execution gives you an edge in detecting new internal and external threats and in weathering crises that can never be fully predicted. Execution shows how to link

together people, strategy, and operations, the three core processes of every business. Leading these processes is the real job of running a business, not formulating a “vision” and leaving the work of carrying it out to others. Bossidy and Charan show the importance of being deeply and passionately engaged in an organization and why robust dialogues about people, strategy, and operations result in a business based on intellectual honesty and realism. With

paradigmatic case histories from the real world—including examples like the diverging paths taken by Jamie Dimon at JPMorgan Chase and Charles Prince at Citigroup—Execution provides the realistic and hard-nosed approach to business success that could come only from authors as accomplished and insightful as Bossidy and Charan.

BESTSELLER • A memoir of leadership and success: The executive chairman of

Disney, Time's 2019 businessperson of the year, shares the ideas and values he embraced during his fifteen years as CEO while reinventing one of the world's most beloved companies and inspiring the people who bring the magic to life.

NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR Robert Iger became CEO of The Walt Disney Company in 2005, during a difficult time. Competition was more intense than ever and technology was changing faster than at any time in

the company's history. His vision came down to three clear ideas: Recommit to the concept that quality matters, embrace technology instead of fighting it, and think bigger—think global—and turn Disney into a stronger brand in international markets. Today, Disney is the largest, most admired media company in the world, counting Pixar, Marvel, Lucasfilm, and 21st Century Fox among its properties. Its value is nearly five times what it was when Iger took over,

and he is recognized as one of the most innovative and successful CEOs of our era. In *The Ride of a Lifetime*, Robert Iger shares the lessons he learned while running Disney and leading its 220,000-plus employees, and he explores the principles that are necessary for true leadership, including:

- Optimism. Even in the face of difficulty, an optimistic leader will find the path toward the best possible outcome and focus on that, rather than give in to pessimism and

blaming.

- Courage. Leaders have to be willing to take risks and place big bets. Fear of failure destroys creativity.
- Decisiveness. All decisions, no matter how difficult, can be made on a timely basis. Indecisiveness is both wasteful and destructive to morale.
- Fairness. Treat people decently, with empathy, and be accessible to them. This book is about the relentless curiosity that has driven Iger for forty-five years, since the day he started as the lowliest

studio grunt at ABC. It's also about thoughtfulness and respect, and a decency-over-dollars approach that has become the bedrock of every project and partnership Iger pursues, from a deep friendship with Steve Jobs in his final years to an abiding love of the Star Wars mythology. "The ideas in this book strike me as universal" Iger writes. "Not just to the aspiring CEOs of the world, but to anyone wanting to feel less fearful, more confidently themselves, as they

navigate their professional and even personal lives.”

Drive long-term profits and growth by making the company a place your employees love. In *Great Company* presents a practical approach to ensure that your employees perform at their highest possible levels. It's not about increasing salaries, offering huge bonuses, or investing in the latest employee engagement

tools. The real answer is simpler, deeper, and longer-lasting: getting your people to love where they work. Founder and CEO of one of today's top leadership development firms, Best Practices Institute, Louis Carter takes you step by step through the process of building a lasting emotional connection between your staff and your company. Carter's proven strategy is founded on five key principles: collaboration, optimism, values, respect, and performance. Fuse

them together, and your company will be the envy of your industry. This groundbreaking guide provides everything you need to create an environment where people have a strong sense of belonging—a place where people finally feel like they're part of something big, where employees want to work collaboratively and creatively, where your staff and your company grow together. Bridge the engagement gap by ensuring that every member of your team

spends their entire work day in great company. *The CEO's Boss* Random House

You're only a startup CEO once. Do it well with Startup CEO, a "master class in building a business." —Dick Costolo, Former CEO, Twitter

Being a startup CEO is a job like no other: it's difficult, risky, stressful, lonely, and often learned through trial and error. As a startup CEO seeing things for the first time, you're likely to make mistakes, fail, get things wrong, and feel like you don't have any control over outcomes. Author Matt Blumberg has been there,

and in Startup CEO he shares his experience, mistakes, and lessons learned as he guided Return Path from a handful of employees and no revenues to over \$100 million in revenues and 500 employees. Startup CEO is not a memoir of Return Path's 20-year journey but a thoughtful CEO-focused book that provides first-time CEOs with advice, tools, and approaches for the situations that startup CEOs will face. You'll learn: How to tell your story to new hires,

investors, and customers for greater alignment How to create a values-based culture for speed and engagement How to create business and personal operating systems so that you can balance your life and grow your company at the same time How to develop, lead, and leverage your board of directors for greater impact How to ensure that your company is bought, not sold, when you exit Startup CEO is the field guide every CEO needs throughout the growth of

their company.

From the million-copy-bestselling author of Execution 'Ingenious . . . An insightful and practical guide for leaders and practitioners at every level.' Forbes Welcome to the age of big tech. The old rules no longer apply. How do companies build a competitive advantage in the digital age? In this lively, accessible guide, Ram Charan - million-copy-bestselling author and advisor to some of

the world's top CEOs - reveals that the tech giants have radically rewritten the rules of business. If you want to win, you need to learn to play a new game. Delving into the inner workings of the likes of Netflix, Amazon and Alibaba, Charan uncovers the six rules that the digital giants use to stay ahead: from their emphasis on creating corporate 'ecosystems', to the way they approach team organisation and moneymaking. And he outlines how to use these

rules to transform your business, starting today. 'One of the world's preeminent counselors to CEOs.' Harvard Business Review 'The most influential consultant alive.' Fortune *High Growth Handbook* Board of Advisors Book *The Challenge Built to Last*, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the

verybeginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from

good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest

companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the

study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of

leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch

radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

The Broken CEO Crown

From the bestselling author of *What the CEO Wants You to Know? How to rethink sales from the outside in* We have to face the truth: the process of selling is broken. Customers have more choices and are under intense pressure. Yet few companies are facing this

reality. When they don't, a lingering malaise sets in. More than ever these days, the sales process tends to be a war about price—a frustrating, unpleasant war that takes all the fun out of selling. But there's a better way to think about sales, says bestselling author Ram Charan, who is famous for clarifying and simplifying difficult business problems. What the customer wants you to know is how his or her business works, so you can help make it work better. It sounds simple,

but there's a catch: you won't be able to do that with your traditional sales approach. Instead of starting with your product or service, start with your customer's problems. Focus on becoming your customer's trusted partner, someone he can turn to for creative, cost-effective solutions that are based on your deep knowledge of his values, goals, problems, and customers. This book defines a new approach to selling which Charan calls value creation selling—that while radical is

nonetheless practical. VCS has been battle-tested in companies in a variety of industries, such as Unifi, Mead-Westvaco, and Thomson Financial. It will enable you to:

- Gain a deeper knowledge of your customer's problems
- Understand how your customer's company really makes decisions
- Help your customer improve margins and drive revenue growth
- Connect sales with other key functions such as finance and manufacturing
- Come up with new customized

offerings

- Make price much less of an issue

VCS gets you out of the hell of commoditization and low prices. It differentiates you from the competition, paving the way to better pricing, better margins, and higher revenue growth, built on win-win relationships that deepen over time. Someday, every company will listen more closely to the customer, and every manager will realize that sales is everyone's business, not just the sales department's. In the meantime, this eye-

opening book will show you how to get started.

Lean Hospitals Harvard Business Press
 NEW YORK TIMES BESTSELLER
 From Blackstone chairman, CEO, and co-founder Stephen A. Schwarzman,

a long-awaited book that uses impactful episodes from Schwarzman's life to show readers how to build, transform, and lead thriving organizations. Whether you are a student, entrepreneur, philanthropist, executive, or simply someone looking for ways to maximize your potential, the same lessons apply. People know who Stephen Schwarzman is—at least they think they do. He's the man who took \$400,000 and co-founded Blackstone, the investment firm that

manages over \$500 billion (as of January 2019). He's the CEO whose views are sought by heads of state. He's the billionaire philanthropist who founded Schwarzman Scholars, this century's version of the Rhodes Scholarship, in China. But behind these achievements is a man who has spent his life learning and reflecting on what it takes to achieve excellence, make an impact, and live a life of consequence. Folding handkerchiefs in his father's linen shop,

Schwarzman dreamed of a larger life, filled with purpose and adventure. His grades and athleticism got him into Yale. After starting his career in finance with a short stint at a financial firm called DLJ, Schwarzman began working at Lehman Brothers where he ascended to run the mergers and acquisitions practice. He eventually partnered with his mentor and friend Pete Peterson to found Blackstone, vowing to create a new and different kind of financial institution.

Building Blackstone into the leading global financial institution it is today didn't come easy. Schwarzman focused intensely on culture, hiring great talent, and establishing processes that allow the firm to systematically analyze and evaluate risk. Schwarzman's simple mantra "don't lose money" has helped Blackstone become a leading private equity and real estate investor, and manager of alternative assets for institutional investors globally. Both he

and the firm are known for the rigor of their investment process, their innovative approach to deal making, the diversification of their business lines, and a conviction to be the best at everything they do. Schwarzman is also an active philanthropist, having given away more than a billion dollars. In philanthropy, as in business, he is drawn to situations where his capital and energy can be applied to drive transformative solutions and change paradigms,

notably in education. He uses the skills learned over a lifetime in finance to design, establish, and support impactful and innovative organizations and initiatives. His gifts have ranged from creating a new College of Computing at MIT for the study of artificial intelligence, to establishing a first-of-its-kind student and performing arts center at Yale, to enabling the renovation of the iconic New York Public Library, to founding the Schwarzman Scholars

fellowship program at Tsinghua University in Beijing—the single largest philanthropic effort in China’s history from international donors. Schwarzman’s story is an empowering, entertaining, and informative guide for anyone striving for greater personal impact. From deal making to investing, leadership to entrepreneurship, philanthropy to diplomacy, Schwarzman has lessons for how to think about ambition and scale, risk and opportunities, and how to

achieve success through the relentless pursuit of excellence. Schwarzman not only offers readers a thoughtful reflection on all his own experiences, but in doing so provides a practical blueprint for success.

Despite all the effort through the years to understand what it takes to be an effective leader, the challenges of leadership remain enormously difficult and elusive; even today, most CEOs don't last five years in the job. The demands

to deliver at a consistently high level can be unforgiving. The loneliness. The weight of responsibility. The relentless second-guessing and criticism. The pressure to build all-star teams. The 24/7 schedule that requires superhuman stamina. The tough decisions that often leave no one happy. The expectation to always have the right answer when it can be hard just to know the right question. These challenges are brought into their highest and

sharpest relief in the corner office, but they are hardly unique to chief executives. All leaders face their own version of these tests, and the authors draw on the distilled wisdom, stories, and lessons from hundreds of chief executives to show how every aspiring leader can master these challenges and lead like a CEO. These foundational leadership skills will make all aspiring executives more effective in their roles today and lift the trajectory of their careers.
