The Company-State offers a political and intellectual history of the English East India Company in the century before its acquisition of territorial power. It argues the Company was no mere merchant, but a form of early modern, colonial state and sovereign that laid the foundations for the British Empire in India.

Olefin metathesis reaction can be considered as one of the most successful organic reactions with many applications in the low molecular weight range and also in the polymer field. The use of catalysts with their selective and effective transformation properties in olefin metathesis I polymerization systems is a growing interest. There has been great effort and competition in developing active and commercially useful catalysts. The main aim of this ASI was to gather several research groups and also the people from industry. to present existing knowledge and latest results in the field. A wide range of topics through homogeneous and heterogeneous aspects have been considered. Attention has been drawn to the metal-carbene and metallocyclobutane complexes as active species, the initiation mechanisms, the stereochemistry and thermodynamics

of these reactions. New catalytic systems for the metathesis of alkenes and alkynes and fot' ring opening polymerization I block copolymerization reactions have been introduced. Spectroscopic studies for the characterization of catalysts, simulation studies explaining the function of chain carrier species and polymer degradation have also been covered. A detailed industrial report concerning the patents and applications in olefin metathesis I cyc1001efin polymerization area, fabrication and derivation has been presented. This volume contains the main lectures and seminars given at the NATO Advanced Study Institute on " Olefin Metathesis and Polymerization Catalysts: Synthesis, Mechanism and Utilization", held at Akcay, Babkesir. Turkey between 10th and 22nd September 1989.

The six volumes that make up this set provide an overview of colonialism in South East Asia. The first volume deals with Portuguese, Spanish and Dutch Imperialism before 1800, the second with empire-building during the Nineteenth Century, and the third with the imperial heyday in the early Twentieth Century. The remaining volumes are devoted to the decline of empire, covering nationalism and the Japanese challenge to the Western presence in the region, and the transition to independence. The authors whose works are anthologised include both official participants, and scholars who wrote about events from a more detached perspective. Wherever possible, authors have been chosen who had first-hand experience in the region

This book contains the refereed proceedings of the 19th International Conference on Business Information Systems, BIS 2016, held in Leipzig, Germany, in July 2016. The BIS conference series follows trends in academia and business research; thus the theme of the BIS 2016 conference was "Smart Business Ecosystems". This recognizes that no business is an island and competition is increasingly taking place between business networks and no longer between individual companies. A variety of aspects is relevant for designing and understanding smart business ecosystems. They reach from new business models, value chains and processes to all aspects of analytical, social and enterprise applications and platforms as well as cyber-physical infrastructures. The 33 full and 1 short papers were carefully reviewed and selected from 87 submissions. They are grouped into sections on ecosystems; big and smart data; smart infrastructures; process management; business and enterprise modeling; service science; social media; and applications.

Terrorism, Law and Policy: A Comparative Study is a textbook offering a comparative study of the terrorism-related legislation, policy and practice introduced from international governmental bodies such as the UN and the European Union, and individual states, with a focus on Australia,

Canada, New Zealand, the UK and the US. It offers a uniquely legal perspective on key themes relating to terrorism and security. This new edition is brought fully up to date with the ever-changing developments in terrorist activity, as well as in states' approaches to anti-terrorism legislation and policy. It includes new chapters on the far-right and extreme far-right cause, one offering a comparative study of the anti-terrorism policies of states and international bodies, and the role of international and national counter-terrorism agencies, planning and preparing acts of terrorism and a new chapter on freedom of expression, hate crime and proscribing groups as terrorist organisations. Terrorism, Law and Policy: A Comparative Study is ideally suited for terrorism and security modules at undergraduate and postgraduate levels, and will also be of interest to practitioners working on the legal aspects of these areas.

The Future of Assisted Suicide and Euthanasia provides the most thorough overview of the ethical and legal issues raised by assisted suicide and euthanasia--as well as the most comprehensive argument against their legalization--ever published. In clear terms accessible to the general reader, Neil Gorsuch thoroughly assesses the strengths and weaknesses of leading contemporary ethical arguments for assisted suicide and euthanasia. He explores evidence and case histories from the Netherlands and Oregon, where the practices have been legalized. He analyzes libertarian and autonomy-based arguments for legalization as well as the impact of key U.S. Supreme Court decisions on the debate. And he examines the history and evolution of laws and attitudes regarding assisted suicide and euthanasia in American society. After assessing the strengths and weaknesses of arguments for assisted suicide and euthanasia, Gorsuch builds a nuanced, novel, and powerful moral and legal argument against legalization, one based on a principle that, surprisingly, has largely been overlooked in the debate--the idea that human life is intrinsically valuable and that intentional killing is always wrong. At the same time, the argument Gorsuch develops leaves wide latitude for individual patient autonomy and the refusal of unwanted medical treatment and life-sustaining care, permitting intervention only in cases where an intention to kill is present. Those on both sides of the assisted suicide question will find Gorsuch's analysis to be a thoughtful and stimulating contribution to the debate about one of the most controversial public policy issues of our day.
