Important: Strymon

pedals should only be powered from the 9V outputs. Attempting to power from a 12V output will permanently damage the pedal. Don't do it, we warned you!

PEDAL POWER MONDO - Voodoo Lab

Today we're going to look at what is one of my favorite pedals, the Strymon Timeline. This is one of the most popular delays on the market, but for many people it can seem a little overwhelming at first. So let's go ahead and talk about the basic controls and how to start using this pedal to make it work for you. The Timeline has 100 banks with 2 presets each, the A preset and the B preset.

Subtitled
Magnetic Echo Machine, the Strymon Volante aims to not only recreate the sound of drum echo machines, as typified by the Echorec, but also offers the sound of tape

echoes. The two options here are a multi-head Space Echo-style tape echo and a higher fidelity reel-to-reel machine, examples of which were often used to create echo in a studio setting.
