This collection of
original chapters,

written by prominent social scientists, elucidates the theory and practice of contemporary rural sociology. The book applies lessons from the careers of sociologists and their field research endeavors, covering a wide range of topics: agricultural production, processing, and marketing; international food security and rural development; degradation of the bio-physical environment across borders; and the study of community, family, health, and many other issues in an increasingly globalized world. The authors' candid accounts provide insight into possibilities for enhancing opportunity and equality and serving

basic human needs.

Excerpt from A Brief Course in Rural Economics and Rural Sociology The cordial reception given the first edition of this little book has made a second edition necessary. Some changes, which in the light of class room use seemed advisable have been made. Many topics have been treated more fully, a few that were not in the first edition have been included, and a few others have been omitted entirely. A course of study adapted to eighth grade pupils in rural schools has been added. In making use of this course of study in a rural school it is suggested that the

topics be taken up in connection with the work in history, civics, geography, etc. This book is intended as an introduction to the study of rural economics and rural sociology. It has been prepared to meet the needs of rural teachers and pupils in rural schools. In no sense is it a scientific treatise. It will have served its purpose if it leads its readers to a further study of the great movements making for the betterment of country life. Family farms represent important components of food systems and rural areas. The aim of the book is to develop a conceptual framework guiding further research and policy design to enhance food systems'

capability to sustainably meet societal expectations, with a valorisation of the role of family farming.

Henri Lefebvre's *Critical Theory of Space* offers a rigorous analysis and revival of Lefebvre's works and the context in which he produced them. Biagi traces the historical-critical time-frame of Lefebvre's intellectual investigations, bringing to light a theoretical constellation in which historical methods intersect with philosophical and sociological issues: from Marxist political philosophy to the birth of urban sociology;

from rural studies to urban and everyday life studies in the context of capitalism. Examining Lefebvre's extended investigations into the urban sphere as well as highlighting his goal of developing a "general political theory of space" and of innovating Marxist thought, and clarifying the various (more or less accurate) meanings attributed to Lefebvre's concept of the "right to the city" (analysed in the context of the French and international sociological and philosophical-political debate), Henri Lefebvre's *Critical Theory of Space* ultimately brings the contours of Lefebvre's innovative perspective—itsself developed at the end

of the "short twentieth century"—back into view in all its richness and complexity.

disease and BSE have

both had a devastating impact on rural society.

Alongside these

devastating

developments, the rise

of the organic food

movement has helped

to revitalize an already

politicized rural

population. From fox-

hunting to farming, the

vigour with which rural

activities and living are

defended overturns

received notions of a

sleepy and complacent

countryside. Over the

years "rural life" has

been defined,

redefined and

eventually fallen out of

fashion as a

sociological concept--in

contrast to urban studies, which has flourished. This much-needed reappraisal calls for its reinterpretation in light of the profound changes affecting the countryside. First providing an overview of rural sociology, Hillyard goes on to offer contemporary case studies that clearly demonstrate the need for a reinvigorated rural sociology. Tackling a range of contentious issues--from fox-hunting to organic farming--this book offers a new model for rural sociology and reassesses its role in contemporary society. **DOD Pam** Cambridge University Press
The first of an eight-volume series, The Literature of the Agricultural Sciences,

this book analyzes the trends in the published literature of agricultural economics and rural sociology during the past fifty years. It uses citation analysis and other bibliometric techniques to identify the primary journals, report series, and monographs of current importance to the developed industrial countries as well as those in the Third World. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are

supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students.
