Care of Children according to Ayurveda CRC Press

Arguably the oldest form of health care, Ayurveda is often referred to as the "Mother of All Healing." Although there has been considerable scientific research done in this area during the last 50 years, the results of that research have not been adequately disseminated. Meeting the need for an authoritative, evidence-based reference, *Scientific Basis for Ayurvedic Therapies* is the first book to analyze and synthesize current research supporting Ayurvedic medicine. This book reviews the latest scientific information, evaluates the research data, and presents it in an easy to use format. The editor has carefully selected topics based on the availability of scientific studies and the prevalence of a disease. With contributions from experts in their respective fields, topics include Ayurvedic disease management, panchkarma, Ayurvedic bhasmas, the current status of Ayurveda in India, clinical research design, and evaluation of typical clinical trials of certain diseases, to name just a few. While there are many books devoted to Ayurveda, very few have any in-depth basis in scientific studies. This book provides a critical evaluation of literature, clinical trials, and biochemical and pharmacological studies on major Ayurvedic therapies that demonstrates how they are supported by scientific data. Providing a natural bridge from Ayurveda to Western medicine, *Scientific Basis for Ayurvedic Therapies* facilitates the integration of these therapies by health care providers.

Experience afresh, the true essence of his teaching Recently, some long-forgotten tapes of Nisargadatta Maharaj's talks were unearthed from the archives of S. K. Mullarpattan, Maharaj's interpreter for the longest time. These tapes contained recordings of some of Maharaj's talks with seekers, held during the last two years of his life. They capture afresh the essence and flavour of the teachings of this world-renowned Master of Advaita - the Hindu philosophy of Non-duality. These dialogues find a new relevance for our times. For, in one of these talks, Maharaj made a special reference to his earlier book *I Am That* and said, "That book and whatever was expounded at that time was only relevant for that period. I am speaking differently today. As a matter of fact, this should also have been recorded and published as it is in greater detail, and is emphasizing different aspects." More than 25 years later, that wish of Nisargadatta Maharaj is being fulfilled with the publication of these talks in *Beyond Freedom*. This is a book all devotees of Maharaj will want to read with ardent fervour and enthusiasm.

An ethnography of Ayurvedic medicine which argues the ills it cures are largely effects of postcolonial identity.

Rasayana Maya Tiwari

Until recently policy makers and health professionals in developing countries have neglected

newborn care, even though 70% of infant deaths occur during the first month of life. The principles of essential newborn care are simple: resuscitation, warmth to avoid hypothermia, early breast-feeding, hygiene, support for the mother-infant relationship, and early treatment for low birth weight or sick infants. Putting these principles into practice does not require expensive high technology equipment. This important book has been written by experts in newborn care, mostly from developing countries in south Asia. It contains a review of the current health status of mothers and newborn infants in the developing world, the evidence base for cost-effective essential and preventive neonatal interventions in poor communities, ideas for improving service delivery, and the priorities for future action and research. Contents: Current Status of Newborn Infants and Perinatal Health in South Asia Social, Economic and Cultural Aspects of Motherhood in South Asia Cost-Effective Essential Newborn Care in Poor Communities: The Evidence-Base Improving Health Service Delivery Challenges for Future Policy Implementation and Research Readership: Paediatricians, obstetricians, development workers, and tropical medicine and public health specialists. Keywords: Developing Countries; Asphyxia; Low Birth Weight; Neonates; Neurodevelopmental Morbidity and Outcome; High Risk Follow Up; Growth and Cognitive Outcome; Achievements-Social and School; Perinatal Health Indicators; Causes of Mortality; Nutritional Care of the Newborns; Breastfeeding Practices; Maternal Care Indicators; Contraceptive Use; Health Care Services and Utilization of Health Care Services; Pakistan; Newborn Health; Safe Motherhood; Lowcost Newborn Care; Newborn Problems; Perinatal mortality; Infection and Perinatal Period; Neonatal Sepsis; KMC Reviews: "It makes enjoyable and interesting reading and is an excellent educational source, a must for anyone intending to be involved with newborn health in South Asia." Until relatively recently, much of the information on India's research into their medicinal plants has remained within India, mainly published within Indian journals. However, today the field of Ayurveda is expanding, with the integration of herbs and minerals discovered in other countries and the strengthening of academic knowledge networks worldwide.

Milk, Mucosal Immunity and the Microbiome: Impact on the Neonate Academic Press

Considerable advances have been made in science in order to understand the varied mixture of bioactive components in human milk. The 94th Nestlé Nutrition Institute Workshop was designed to provide a comprehensive overview of the latest findings in human milk research and its potential to modulate mucosal immunity, the microbiome, and its impact on the neonate. The publication provides a balanced state-of-the-art update on the current knowledge about milk, mucosal immunity, and the microbiome as well as their impact on breastfeeding in mammalian neonates. The first part reviews data on the immunology of milk and lactation from a historical perspective to the latest scientific findings. The second part discusses the microbiology of human milk and lactation in detail, with a focus on premature infants and necrotizing enterocolitis. And finally, in the third part, light is shed on the protective factors in human milk and their role in influencing the neonate's immune system. Important new insights will provide great scientific support for all people seeking a deeper understanding of human milk and its immunological properties and will enlarge the knowledge of those who have already specialized in human milk research.

The Way of Ayurvedic Herbs CRC Press

Ayurveda is one of the oldest sciences, but it is still unknown to many people all over the world. This book attempts to answer few queries about Ayurveda. Ø Is Ayurveda just a preventive medicine and how unique is it? Ø How Ayurveda helps to overcome daily and seasonal changes? Ø How one can overcome the daily stressful life through Ayurveda? Ø Is Ayurveda just a massage or Detoxification therapy? Ø How to manage chronic diseases with Ayurveda foods, lifestyles and medicines? Ø Does Ayurveda offer healthy and tasty dishes? Ø Is there any effective home remedies for Fever, Cold, Cough, Acne and Hair fall? Ayurveda is written in Sanskrit literature and has no direct explanations in the modern aspects. There is no exact correlation to the modern science as Ayurveda is broader,

rational and more scientific.

Before the creation of living beings, lord brahma stated that ayurveda is a branch of atharvaveda. He composed it in one thousand chapters having one lakh shloka (verses) and divided it into eight branches. Kaumarbhritya is one of the eight branches of Ayurveda, formed by two word's kaumar and bhritya, branch which deals with the care of children, their diseases and respective treatment is called kaumarbhritya. Acharya charak placed kaumarbhritya at 6th position in ashtang ayurveda. Acharya sushruta placed kaumarbhritya at 5th position in ashtang ayurveda. Acharya vagbhatta placed kaumarbhritya at 2nd position. The subject matter of this branch is available primarily in SharirSthana and Uttar Tantra of treatise comprising BrihatTrayi. It also includes neonatology, amongst which care of children is described in detail. In Ayurveda texts Acharyas stated full description to care of new born from birth to full stability of children.

Bringing together two parallel and occasionally intersecting disciplines - the environmental and medical humanities - this field-defining handbook reveals our ecological predicament to be a simultaneous threat to human health. The book: · Represents the first collection to bring the environmental humanities and medical humanities into conversation in a systematic way · Features contributions from a wide range of interdisciplinary perspectives including literary studies, environmental ethics and philosophy, cultural history and sociology · Adopts a truly global approach, examining contexts including, but not limited to, North America, the UK, Africa, Latin America, South Asia, Turkey and East Asia · Touches on issues and approaches such as narrative medicine, ecoprecarity, toxicity, mental health, and contaminated environments. Showcasing and surveying a rich spectrum of issues and methodologies, this book looks not only at where research currently is at the intersection of these two important fields, but also at where it is going.
