 and Resource Manual Mosby Incorporated  
 This psychiatric-mental health  
 undergraduate textbook, based on the  
 theories of Hildegard Peplau and Joyce  
 Travelbee, is the first recent book devoted  
 to interpersonal relations as the  
 foundation for therapeutic practice in  
 psychiatric nursing. It guides the student  
 through the essential phases of self-  
 discovery necessary to integrate

interpersonal nursing theory into practice,  
 and provides a historical overview of the  
 profession. The book addresses the most  
 current ISPN and APNA competencies and  
 presents content designed to foster self-  
 growth, and critical thinking and decision-  
 making skills, as well as to implement  
 therapeutic interventions. It offers an  
 overview of theories of mental illness and  
 a detailed discussion of commonly seen  
 psychiatric disorders, and addresses  
 mental health care settings across the  
 lifespan and different populations. Clinical  
 case studies and first-hand accounts  
 vividly describe the realities of living with  
 specific mental illnesses, "What would you  
 do?" questions stimulate discussions, and  
 sample and practice care plans for chronic  
 mental illness facilitate integration of  
 concepts into practice. Evidence-based  
 practice summaries from psychiatric  
 nursing and related research literature are

included, and NANDA guidelines are  
 integrated throughout. A new chapter with  
 DSM-V updates is also available. This  
 affordably priced text additionally comes  
 with supplementary materials for both  
 teachers and students, including handy  
 review guides, summaries, drug  
 monographs, and hyperlinks to films and  
 video illustrating content. A test bank and  
 PowerPoint slides are also available for  
 instructors. Key Features: Integrates and  
 applies the Peplau/Travelbee interpersonal  
 relations theories to the four-step  
 Assessment, Planning/Diagnosing,  
 Implementation, and Evaluation (APIE)  
 nursing process Addresses critical  
 thinking, clinical decision making,  
 therapeutic interventions, case  
 management roles, and mental health  
 care settings across the lifespan Features

### **Concepts of Care in Evidence-Based Practice** Prentice Hall

This newly published second edition is the definitive book covering the essentials of psychiatric-mental health (PMH) nursing applicable at all practice levels and settings. It articulates what is expected of all psychiatric-mental health nurses, specifying the who, what, where, when, why and how of their practice. It presents the underlying assumptions and characteristics, addresses matters of environments and settings as well as education and training requirements, and covers key issues and trends and the ethical and conceptual bases of the specialty. Moreover, it specifies the competencies for nursing practice and professional performance of all PMH registered nurses. While this foundational volume is primarily for those directly involved with psychiatric-mental health

nursing practice, education and research, other nursing and allied health care providers, researchers and scholars will find value in this content.

Psychiatric and Mental Health Nursing in the UK is an adaptation of Australia and New Zealand's foremost mental health nursing text and is an essential resource for both mental health nursing students and qualified nurses. Thoroughly revised and updated to reflect current research and the UK guidelines as well as the changing attitudes about mental health, mental health services and mental health nursing in UK. Set within a recovery and patient framework, this text provides vital information for approaching the most familiar disorders mental health nurses and students will see in clinical practice, along with helpful suggestions about what the mental health nurse can say and do to interact effectively with patients and their families. Gives readers a thorough grounding in the theory of mental health nursing. Case studies throughout the text

allow readers to understand the application of theory in every day practice. Includes critical thinking challenges and ethical dilemmas to encourage the reader to think about and explore complex issues. Exercises for class engagement complement learning and development in the classroom environment.

Psych Mental Health Nrsing (Us Ed)  
Lippincott Williams & Wilkins

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with

rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more. *A Communication Approach to Evidence-Based Care* F.A. Davis

This updated Seventh Edition will equip psychiatric and mental health nurses with the essential clinical knowledge and skills needed to practice with confidence. Spanning the continuum of care, this text will help nurses excel in a range of settings, improve client and family education skills, and build the self-awareness a nurse needs as a member of the interdisciplinary care team. This edition includes a new chapter on forensic nursing, new content on spirituality, updated psychopharmacological information, current DSM-IV-TR diagnostic criteria, and Evidence-Based Practice Boxes throughout the text. A bound-in CD-ROM includes clinical simulations for major depression and schizophrenia, psychotropic drug monographs, over 300 NCLEX® -style questions, and movie viewing guides.

An Interpersonal Approach Pearson  
Psychiatric-mental health nursing promotes mental health through the assessment, diagnosis, and treatment of human responses to mental health problems and psychiatric disorders. A core mental health profession, it is a specialty that employs a purposeful use of self as its art along with a wide range of nursing, psychosocial, and neurobiological theories and research evidence as its science. Its areas of focus emerge based on current and anticipated societal needs, including disparities in mental health and its care and treatment among the diverse populations.
