Law & Practice of Income Tax John Wiley and Sons

In the book *Escaping the Minotaur's Labyrinth: Principles of Taxation*, Dr Gaurishanker has dealt with the basic principles of taxation and addressed its underlying concepts with a view to dispel the fog that leads most legal professionals to regard tax law as an exclusive domain reserved for a few specialists. This book is the fruit of his characteristic unwavering and unflinching march towards his set objective of giving his fellow professionals a tool which would enable them to understand, appreciate and thus contribute in enriching his pet subject. The metaphor of the Minotaur - half bull, half human monster of Greek mythology - is a telling comparison to the bewildering maze of the labyrinth of the taxation laws. The monster lived in a labyrinth and demanded a sacrifice of seven youths and seven maids every year. The book presents in a simple way and demystifies the substantive and procedural aspects of the administration of laws relating to Income Tax. Dr Gaurishanker, in a figurative sense, is verily the Theseus who in the Greek mythology ultimately kills the monster Minotaur.

Outlines of Islamic jurisprudence covers a number of topics of

usul al-fiqh, sometimes in abridged form, that have been covered in the title on the subject of Islamic Jurisprudence by the same author. The significance of this book can only be understood through a comparison with that book. Islamic jurisprudence focuses on the discipline of usul al-fiqh and deals with it in an exhaustive way. It, thus, covers the different aspects of interpretation and theories of Islamic law. The present book includes some of the topics covered in that book. The bulk of *Outlines of Islamic Jurisprudence*, however, summarizes the entire law of Islam presenting it in a concise yet effective way. Property, contracts, evidence, procedure, constitutional matters and issues of Muslim personal law (family law) are dealt with efficiently. The last part of the book also includes information on the schools of law and their history. Due to the treatment of the entire Islamic law in a comprehensive way, the book is like a short encyclopedia. The book was first published in 1998 and is now in its sixth edition. It is very popular among law students, lawyers and even the general readers. Minor improvements to the book have been made over the years and it is constantly updated. Parts of the book dealing with property and contracts are taught independently as a one semester course on contracts, in particular for Islamic banking. The section on the history of the schools serves as a brief introduction to the law of Islam.
