Introduction to Black Studies Introduction to Black Studies Introduction to Black Studies Handbook of Black Studies SAGE

From Black Power to Black Studies SAGE Publications

What constitutes black studies and where does this discipline stand at the end of the twentieth century? In this wide-ranging and original volume, Manning Marable—one of the leading scholars of African American history—gathers key materials from contemporary thinkers who interrogate the richly diverse content and multiple meanings of the collective experiences of black folk. Here are numerous voices expressing very different political, cultural, and historical views, from black conservatives, to black separatists, to blacks who advocate radical democratic transformation. Here are topics ranging from race and revolution in Cuba, to the crack epidemic in Harlem, to Afrocentrism and its critics. All of these voices, however, are engaged in some aspect of what Marable sees as the essential triad of the black intellectual tradition: describing the reality of black life and experiences, critiquing racism and stereotypes, or proposing positive steps for the empowerment of black people. Highlights from *Dispatches from the Ebony Tower*: Henry Louis Gates Jr. and Manning Marable debate the role of activism in black studies. John Hope Franklin reflects on his role as chair of the President's race initiative. Cornel West discusses topics that range from the future of the NAACP through the controversies surrounding Louis Farrakhan and black nationalism to the very question of what "race" means. Amiri Baraka lays out strategies for a radical new curriculum in our schools and universities. Marable's introduction provides a thorough overview of the history and current state of black studies in America.

African American History Reconsidered Kawaida Publications

Not Only the Master's Tools brings together new essays on African American studies. It is ideal for students and scholars of African studies, philosophy, literary theory, educational theory, social and political thought, and postcolonial studies.

Intellectuals Confront the African American Experience Psychology Press

On Race and Philosophy is a collection of essays written and published across the last twenty years, which focus on matters of race, philosophy, and social and political life in the West, in particular in the US. These important writings trace the author's continuing efforts not only to confront racism, especially within philosophy, but, more importantly, to work out viable conceptions of raciality and ethnicity that are empirically sound while avoiding chauvinism and invidious ethnocentrism. The hope is that such conceptions will assist efforts to fashion a nation-state in which racial and ethnic cultures and identities are recognized and nurtured contributions to a more just and stable democracy.

The history of African American studies is often told as a heroic tale, with compelling images of black power and passionate African American students who refused to take no for an answer. Noliwe M. Rooks argues for the recognition of another story, which proves that many of the programs that survived actually began as a result of white philanthropy. With unflinching honesty, Rooks shows that the only way to create a stable future for African American studies is by confronting its complex past.

African American Studies in Theory and Practice John Wiley & Sons

Woodson's classic work of criticism explores how the education received by blacks has failed to give them an appreciation of themselves as a race and their contributions to history. Woodson puts forward a program that calls for the educated to learn about their past and serve the black community. (Education/Teaching)

The Black Studies Reader Psychology Press

Introduction to African American Studies: A Reader chronicles the experience of African Americans in the United States from their first arrival in 1619 to present day. The reader demonstrates how African Americans and their experiences have shaped America's historical, political, economic, and cultural history, as well as how the black experience continues to influence American life. In Part I, students read about the continued significance of race in America and receive a primer on African studies. Part II examines the arrival of Africans to America, the Atlantic Slave Trade, slavery and states' rights in the early republic, and the issue of democracy in Jeffersonian America. Part III contains readings about Jim Crow, the roots of Plessy vs. Ferguson, and the Niagara Movement. In Part IV, students learn about the impact of African American artists on literature, arts, and culture from 1927 - 1940. Part V includes readings on the Civil Rights Movement. The final part speaks to post-racial America in the age of Barack Obama. *Gathering thought-provoking and critical literature*, *Introduction to African American Studies* is an ideal resource for foundational courses within the discipline.

Shedding light on the black power movement, Black Studies programs, and American higher education, this historical analysis reveals how radical politics are assimilated into the university system.

Introduction to Black Studies Routledge

Three essays are presented that discuss, in general terms, information that was collected in 1987-88 concerning the current status of black studies in the United States. The researchers were invited to survey selected black studies departments, programs, institutes, and centers judged to be representative of the structural diversity and programmatic scope of Afro-American and African studies.

studies across the country; to evaluate their present capacities and strengths; and to assess their future needs. Since the conversations on which this material is based were confidential it could not be reported in full; however, the essays contain substantial amounts of general information. The essays are entitled: "The Intellectual and Institutional Development of Africana Studies" (Robert L. Harris, Jr.); "Black Studies: An Overview" (Darlene Clark Hine); and "Black Studies in the Midwest" (Nellie McKay). (GLR)

Introduction to Black Studies SAGE

The Handbook of Black Studies is the first resource to bring together research and scholarship in the field of African-American studies in one volume. Editors Molefi Kete Asante and Maulana Karenga, along with a pre-eminent group of contributors, examine various aspects of the field of Black Studies. Organized into three parts, this Handbook explores historical and cultural foundations, philosophical and conceptual bases, and critical and analytical concepts.

The Ethics of the Declarations of Innocence McGraw-Hill Humanities, Social Sciences & World Languages

Readings from a course taught by Wilmore (Interdenominational Theological Center, Atlanta) at New York Theological Seminary. The book develops a coherent, interdisciplinary theory of the black religious experience in America for use by students preparing for the ministry, and to guide them in communicating that experience to lay people. Encyclopedia of Black Studies Columbia University Press

This is the classic history of the African peoples in Africa and the New World, a repudiation of the absurd belief, widely held in the post-Civil War period, that Africans had no civilization but the one foisted upon them by their slave-trading captors. Writing for a popular audience in 1915, DuBois, one of America's greatest writers, lays out in easy-to-read, nonacademic prose the striking and illustrious story of the complex history and varied cultures of Africa. He explores everything from the art and industry of the peoples of the continent to the dramatic impact the slave trade had both in Africa and on her descendants in the Western Hemisphere. Boldly proud and beautifully written, this essential work will delight readers of American and African history as well as students of great American literature. American writer, civil rights activist, and scholar WILLIAM EDWARD BURGHARDT DU BOIS (1868-1963) was the first black man to receive a PhD from Harvard University. A co-founder of the NAACP, he wrote a number of important books, including *Black Folk, Then and Now* (1899) and *The Negro* (1915).

Introduction to African American Studies: A Reader (First Edition) Africa Research and Publications

Basil Davidson's famous book -- now updated in a welcome Third Edition -- reviews the social and political history of Africa in the twentieth century. It takes the reader from the colonial era through the liberation movements to independence and beyond. It faces squarely the disappointments and breakdowns that have dulled the early successes of the post-colonial era; yet, for all the sorrows and

uncertainties of Africa today, Basil Davidson shows how much has been achieved since decolonization, and the mood of his new final chapter is hopeful and buoyant.

Maat, the Moral Ideal in Ancient Egypt Springer

Chronological anthology of 38 essays that demonstrate the long and complex intellectual history of racism as an idea and show how powerful groups have utilized racism to advance social, economic, or cultural interests.

Not Only the Master's Tools JHU Press

In this book, the most prolific contemporary African American scholar and cultural theorist Molefi Kete Asante leads the reader on an informative journey through the mind of Maulana Karenga, one of the key cultural thinkers of our time. Not only is Karenga the creator of Kwanzaa, an extensive and widespread celebratory holiday based on his philosophy of Kwaaida, he is an activist-scholar committed to a "dignity-affirming" life for all human beings. Asante examines the sources of Karenga's intellectual preoccupations and demonstrates that Karenga's concerns with the liberation narratives and mythic realities of African people are rooted in the best interests of a collective humanity. The book shows Karenga to be an intellectual giant willing to practice his theories in order to manifest his intense emotional attachment to culture, truth and justice. Asante's enlightening presentation and riveting critique of Karenga's works reveal a compelling account of a thinker whose contributions extend far beyond the Academy. Although Karenga began his career as a student activist, a civil rights leader, a Pan Africanist, and a culturalist, he ultimately succeeds in turning his fierce commitment to truth toward dissecting political, social, and ethical issues. Asante carefully analyzes Karenga's important works on Black Studies, but also his earlier works on culture and his later works on ethics, such as *The Husia*, and *Odu Ifa: The Ethical Teachings*.

Dispatches from the Ebony Tower Simon and Schuster

Maat is the moral ideal of ancient Egypt whose texts contain information on Egypt's moral standards, its concepts of right from wrong, codes of behaviour and obligations. Written by a teacher of the tradition of Maat, this study is the 'first philosophical book that is based on a philologically and historically critical treatment of first-hand Egyptian material'. Focusing on the Maatian ideal rather than moral practices, Karenga discusses what Maat is and its place within the genre of philosophical ethics and morality, asking what it can contribute to modern African culture and values. Extracts are transcribed and translated into English.

Handbook of Black Studies Routledge

World-renowned scholar and visionary bell hooks takes an in-depth look at one of the most critical issues facing African Americans: a collective wounded self-esteem that has prevailed from slavery to the present day. Why do so many African-Americans—whether privileged or poor, urban or suburban, young or old—live in a state of chronic anxiety, fear, and shame? *Rock My Soul: Black People and Self-Esteem* breaks through collective denial and dares to tell this truth—that crippling low self-esteem has reached epidemic proportions in our lives and in our diverse communities. With visionary insight, hooks exposes the underlying reality that it has been difficult—if not impossible—for our nation to create a culture that promotes and sustains healthy self-esteem. Without self-esteem people begin to lose their sense of agency. They feel powerless. They feel they can only be victims. The need for self-esteem never goes away. But it is never too late for any of us

to acquire the healthy self-esteem that is needed for a fulfilling life. hooks gets to the heart and soul of the African-American identity crisis, offering critical insight and hard-won wisdom about what it takes to heal the scars of the past, promote and maintain self-esteem, and lay down the roots for a grounded community with a prosperous future. She examines the way historical movements for racial uplift fail to sustain our quest for self-esteem. Moving beyond a discussion of race, she identifies diverse barriers keeping us from well-being: the trauma of abandonment, constant shaming, and the loss of personal integrity. In highlighting the role of desegregation, education, the

absence of progressive parenting, spiritual crisis, or fundamental breakdowns in communication between black women and men, bell hooks identifies mental health as the new revolutionary frontier—and provides guidance for healing within the black community.
