It's hard to believe, but the W129-series Mercedes-Benz SL was launched over 20 years

ago. However, its timeless styling has kept it fresh and attractive in the eyes of a new generation of enthusiasts, as well as those returning to the car having owned one when they were still in the dealerships. A combination of superb original design and peerless engineering and build quality adds to the desirability of this series

of classic German machines, and has ensured that many of these cars can still be seen in regular use today. Covering the SL's ever-changing specification, and its presence in many of the world's major markets is a huge task, but it's all presented here in definitive detail, along with stunning contemporary

photography, in a volume that will readily grace any reference library shelf or connoisseur's coffee table. Two earlier books, also published by Veloce, and covering the W113 cars and the 107-series SL and SLC, act as perfect companions to this title, which takes the SL story up to 1989.

There are lots of books about the classic BMW Boxers; their history, performance, lineage, and the minutiae of its specification. But none of them concentrate entirely on telling you what to look for when buying one secondhand. That's what this book is about - it is a straightforward, practical guide to buying a used Boxer twin. It doesn't list all the correct colour combinations for each year or analyse the bike's design philosophy - there

are excellent books listed at the end of this one that do all of that - but it will help you avoid buying a dud. Point by point, it takes the reader through everything that needs looking at when buying a Boxer, plus spares prices, which is the best model to buy for your needs, and a look at auctions, restorations and paperwork. The last of the 'classic' air-cooled Boxer twins, these bikes are now collector's items, and many have been saved, restored and continue to be ridden - this book tells

the reader how to be part of the Boxer's ongoing story.

The VW Air-Cooled Engine is a no-nonsense engine manual that any practical-minded person can understand, giving a highly illustrated step-by-step guide to dismantling and rebuilding a Type 1 engine. Most of the

operations described in the book can be applied to the Type 4 unit used in 1700, 1800 and 2-litre Transporter models as well. Topics covered included workshop essentials; keeping the engine healthy; removing and stripping down the engine; examination of the engine components; reassembling the engine and ancillaries and full specifications of the various Type 1 and Type 4 engines. With over 300 colour images, this book will be an invaluable resource for anyone

involved in the repair and maintenance of these iconic engines.

Andre Lefebvre created the Traction Avant (1934), the TUB (1939) - Citroën's first front wheel drive utility van that was succeeded by the H and HY vans (1947) - the Deux Chevaux (1948), and, last but not least, the DS (1955). From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record-breaking automobiles for Voisin. He even drove some of these cars in races and record attempts. It is obvious that during his 16 years

with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-Jules Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a

place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and brilliant engineer. This book was written in order to remedy that, and to pay tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an

important heritage.

The Lotus Europa was
Colin Chapman and
Lotus's first mid-engined
road car, and was
produced from 1966
through to 1975.

Originally designed to slot
into the Lotus range
below the Elan as a low
cost replacement for the
Lotus 7, the Europa

eventually sat alongside
the Elan and Plus 2 as a
comparable sports car in
its own right. Starting with
the design philosophy
behind the development
of the Europa, this book
provides detailed
technical descriptions of
all the major versions of
the model, starting with
the Renault-powered
