The Enemy BoD – Books on Demand
 Financial consultant, Malcolm Jaggard, begins a desperate investigation when flourishing industrialist and former Russian scientist, George Ashton, the father of Jaggard's fiancée, mysteriously disappears following a vicious acid attack on his daughter. Ashton is traced from his home in Buckinghamshire to the wintry forests of Sweden, in a compelling tale about rivalries between intelligence groups and shocking experiments in genetic engineering.

The day had been sunny and warm: as the evening closed in a west wind rose, bringing along troops of fleecy clouds,

golden at sunset, and then dun and grey, veiling with pervious network the many stars. Three horsemen at this hour passed through the open country between Hinckley and Welford in Leicestershire. It was broad day when they descended from the elevation on which the former stands, and the villagers crowded to gaze upon the fugitives, and to guess, from the ensigns they bore, to which party they belonged, while the warders from the near castle hastened out to stop them, thus to curry favour with the conqueror; a design wholly baffled.

 Mary Shelley was not yet twenty years old when she wrote this classic tale of a scientist's attempt to create a new noble species ... an experiment which instead produced a monster. Frankenstein is here presented in the 2nd, revised edition of 1831 and includes an analysis of the most

recent criticism on Shelley's science fiction masterpiece, as well as an extensive filmography.

 Johannes Klumpers Biotechnologies, such as genetic engineering, cloning and biodiversity, raise many legal and ethical concerns, so it is important that people understand these issues and feel able to express their opinions. This is why the European Commission has been, for a number of years, supporting actions to improve communication among scientists in these diverse areas. The project 'Women in Biotechnology' (WONBIT), financed under the 6th Framework programme of the European Commission, is an excellent example of what can be done to target opinion-formers such as scientists, economists and lawyers in bottom-up activities, and to encourage a

debate on gender issues triggered by developments in the life sciences. WONBIT gave rise to a successful international conference highlighting the importance of adopting good practices and ethical considerations in parallel with the rapid pace of progress in biotechnology – from a woman's point of view. In particular, the conference addressed women in decision-making positions in biotechnology with specific reference to scientific excellence, social competencies and management qualities as well as issues relating to environment, society and the younger generation. But it did not stop there: a key part of the conference was dedicated to stimulating public debate among non-specialists, which has led to a number of recommendations to policy-makers on better communication in biotechnology, on taking better account of the gender aspects of research, and on involving more women in the decision-making process that surrounds developments in biotechnology.

'To lose one parent, Mr Worthing, may be regarded as a misfortune; to lose both looks like carelessness.' Ever since its debut on February 14th, 1895, *The Importance of Being Earnest* has been a literary and theatrical success. The brilliance of the witty conversation never ceases to delight and entertain. However, beneath its dazzling ironic humour, there is a deep vein of social criticism of Victorian society. This intricate mix of comedy, absurdity, ambiguity and social criticism makes *The Importance of Being Earnest* Oscar Wilde's masterpiece.

Winner of the Booker Prize – Roddy Doyle's witty, exuberant novel about a young boy trying to make sense of his changing world. It is 1968. Patrick Clarke is ten. He loves Geronimo, the Three Stooges, and the smell of his hot water bottle. He can't stand his little brother Sinbad. His best friend is Kevin, and their names are all over Barrytown, written with sticks in wet cement. They play football, lepers, and jumping to the bottom of the sea. But why didn't anyone help him when Charles Leavy had been going to kill him? Why do his ma and da argue so much, but act like everything is fine? Paddy sees everything, but he understands less and less. Hilarious and poignant, Paddy Clarke Ha Ha Ha charts the triumphs, indignities, and bewilderment of a young boy and his world, a place full of warmth, cruelty, confusion and love.

As humans re-negotiate their boundaries with the nonhuman world of animals, inanimate entities and technological

artefacts, new identities are formed and a new epistemological and ethical approach to reality is needed. Through twelve thought-provoking, scholarly essays, this volume analyzes works by a range of modern and contemporary Italian authors, from Giacomo Leopardi to Elena Ferrante, who have captured the shift from anthropocentrism and postmodernism to posthumanism. Indeed, this is the first academic volume investigating narrative configurations of posthuman identity in Italian literature and film.

The Castle of Otranto is a book by Horace

Walpole first published in 1764 and generally regarded as the first gothic novel. In the second edition, Walpole applied the word 'Gothic' to the novel in the subtitle - "A Gothic Story". The novel merged medievalism and terror in a style that has endured ever since. The aesthetics of the book shaped modern-day gothic books, films, art, music and the goth subculture

Henry Lawson, V. S. Naipaul, Nadine Gordimer and Chinua Achebe are respectively Australian, Caribbean, South African and Nigerian, yet they all write in English. The 'English' literature of the ex-colonies is proving to be the most interesting and innovative of our times: this volume offers a significant example of its vitality and originality. As Salman Rushdi said, 'the Empire writes back'.
