MARSHALL SANTIAGO

International Financial Management Springer Science & Business Media

Influenced by technological innovation, banks and their businesses are changing dramatically. This book explores the transformation and prospects of financial market institutions (banks, insurance companies, pension funds and microfinance organizations) in the context of the development of financial innovation, financial engineering and financial technologies, taking into account risks and new opportunities for development. It presents new approaches to the sustainable development of financial and credit institutions, taking into account the risk management and crisis management of their activities in the macro and microeconomic environment. Contributors from Russia, Kazakhstan, Azerbaijan, Mongolia, Ireland and Italy present their expert opinions on the practice of financial intermediaries in the conditions of economic transformation under the influence of the 4th

Industrial Revolution and the Covid-19 pandemic. This book includes some of the key debates in this area including the genesis of financial markets in the paradigm of economic digitalization, the evolution of financial intermediaries from the classical model to the ecosystem, and the regulation of neo-banks. The book will be of interest to academics and practitioners in various spheres of theoretical and empirical knowledge, including economics, finance and banking, who are interested in investigation of the complex of fundamental (international and domestic) trends in the development of financial intermediation in the globalized financial markets.

Studyguide for Financial Markets and Institutions by Jeff Madura, ISBN 9780538482134 Financial Times/Prentice Hall

Thoroughly updated, this new sixth edition of Financial Institutions and Markets focuses on Australia's financial system, while retaining the structure of the successful fifth edition. It examines the financial system's three main functions: a settlement, flow-of-funds and risk transfer and provides a clear and comprehensive integrated account of the activities of Australia's financial institutions and markets, including the risks they face and the instruments they use. As well, the major capital and foreign exchange markets and the markets for derivatives (and their use as hedging instruments) are discussed. This new 6th edition covers recent financial innovations, such as high-frequency trading in the share market and APRA's adoption of Basel II (and Basel III) and an explanation of how the RBA assesses the financial system's stability. It also includes new Industry Insights and a Practical Applications that illustrate specific topics, such as the role of margin loans and short selling in the demise of ABC Learning. The main update for this new edition has been the development of a Lessons from the GFCa that are designed to complement the book's explanations of a range of topics, such as the use of leverage, lending for housing, securitisation, the role of the inter-bank market, the pricing of risk in bond markets and the role of speculation in the market for Australian dollar.

Introducing financial and capital markets in plain language. Two expert authors with deep knowledge of the subject have come together to write this accessible guide to capital markets and how they contribute to economic development, jobs and growth. This will tell you how to invest in securities, with the main focus on equities (shares) and bonds. We break down technical terms clearly and provide a glossary. We also cover the money markets, funds, private equity, investment banks and the other main market participants and we highlight the key role of regulators in building efficient and trusted capital markets that people can trust. We add an appendix of the history of capital markets in Ethiopia.
