assessments for excavation and
trenching projects. Excavation checklists
are an essential tool used during pre-
operations to evaluate the jobsite,
utilities and equipment, access means,
area atmosphere and support systems to
identify problems before they

occur. Excavation Safety Checklists: Top 7 [Free Download] - iAuditor Are your operators in the habit of performing a pre-use walk-around before they start up their machines to tackle the day's tasks? If not, they should be. Doing so isn't just a safety issue - it's also a bottom-line one. First and foremost, the purpose of a pre-use inspection is to ensure that the machine is safe to operate. Why equipment pre-use walk-around inspections are a must Pre-use inspections are required before use of any equipment or work process that has a potential to result in a severe loss. This inspection must be recorded in a log that is kept on the equipment or near the process and be available for review. Individual departments are responsible for identifying and completing the pre

use checklist.
