VALENTINA LANE

Brain On Fire: My Month of Madness Crooked Lane Books
Based on the popular Artech House classic, Digital
Communication Systems Engineering with Software-Defined
Radio, this book provides a practical approach to quickly learning
the software-defined radio (SDR) concepts needed for work in the
field. This up-to-date volume guides readers on how to quickly
prototype wireless designs using SDR for real-world testing and

experimentation. This book explores advanced wireless
communication techniques such as OFDM, LTE, WLA, and
hardware targeting. Readers will gain an understanding of the
core concepts behind wireless hardware, such as the radio
frequency front-end, analog-to-digital and digital-to-analog
converters, as well as various processing technologies. Moreover,
this volume includes chapters on timing estimation, matched
filtering, frame synchronization message decoding, and source
coding. The orthogonal frequency division multiplexing is
explained and details about HDL code generation and
deployment are provided. The book concludes with coverage of

the WLAN toolbox with OFDM beacon reception and the LTE toolbox with downlink reception. Multiple case studies are provided throughout the book. Both MATLAB and Simulink source code are included to assist readers with their projects in the field.

A Deal with the Elf King Multidisciplinary Assn for

A New York Public Library Best Book for Teens 2021 To save a fae kingdom, a trans witch must face his traumatic past and the royal fiancé he left behind. In Asalin, fae rule and witches like Wyatt Croft...don't. Wyatt's betrothal to fae prince Emyr North was supposed to change that. But when Wyatt lost control of his magic one devastating night, he fled to the human world. Now a coldly distant Emyr has hunted him down. Despite transgender Wyatt's newfound identity and troubling past, Emyr claims they must marry now or risk losing the throne. Jaded, Wyatt strikes a deal with the enemy, hoping to escape Asalin forever. But as he gets to know Emyr again, Wyatt realizes the boy he once loved may still exist. And as the witches face worsening conditions, he must decide what's more important—his people or his freedom. Don't miss the next book in H.E. Edgmon's highly anticipated duology, *THE FAE KEEPER*, AVAILABLE MAY 31, 2022

EBOOK: Cognitive Psychology Penguin UK

"Time travel, UFOs, mysterious planets, stigmata, rock-throwing poltergeists, huge footprints, bizarre rains of fish and frogs—nearly a century after Charles Fort's *Book of the Damned* was originally published, the strange phenomenon presented in this book remains largely unexplained by modern science. Through painstaking research and a witty, sarcastic style, Fort captures the imagination while exposing the flaws of popular scientific explanations. Virtually all of his material was compiled and

documented from reports published in reputable journals, newspapers and periodicals because he was an avid collector. Charles Fort was somewhat of a recluse who spent most of his spare time researching these strange events and collected these reports from publications sent to him from around the globe. This was the first of a series of books he created on unusual and unexplained events and to this day it remains the most popular. If you agree that truth is often stranger than fiction, then this book is for you"—Taken from Good Reads website.

#1 NEW YORK TIMES BESTSELLER • “The story of modern medicine and bioethics—and, indeed, race relations—is refracted beautifully, and movingly.”—Entertainment Weekly NOW A MAJOR MOTION PICTURE FROM HBO® STARRING OPRAH WINFREY AND ROSE BYRNE • ONE OF THE “MOST INFLUENTIAL” (CNN), “DEFINING” (LITHUB), AND “BEST” (THE PHILADELPHIA INQUIRER) BOOKS OF THE DECADE • ONE OF ESSENCE’S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS • WINNER OF THE CHICAGO TRIBUNE HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Entertainment Weekly • O: The Oprah Magazine • NPR • Financial Times • New York • Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still

alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb's effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta's family did not learn of her "immortality" until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta's daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn't her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

The Earl Lloyd Story Read Books Ltd

Based on Stanford University psychologist Kelly McGonigal's wildly popular course "The Science of Willpower," *The Willpower*

Instinct is the first book to explain the science of self-control and how it can be harnessed to improve our health, happiness, and productivity. Informed by the latest research and combining cutting-edge insights from psychology, economics, neuroscience, and medicine, *The Willpower Instinct* explains exactly what willpower is, how it works, and why it matters. For example, readers will learn:

- Willpower is a mind-body response, not a virtue. It is a biological function that can be improved through mindfulness, exercise, nutrition, and sleep.
- Willpower is not an unlimited resource. Too much self-control can actually be bad for your health.
- Temptation and stress hijack the brain's systems of self-control, but the brain can be trained for greater willpower
- Guilt and shame over your setbacks lead to giving in again, but self-forgiveness and self-compassion boost self-control.
- Giving up control is sometimes the only way to gain self-control.
- Willpower failures are contagious—you can catch the desire to overspend or overeat from your friends—but you can also catch self-control from the right role models.

In the groundbreaking tradition of *Getting Things Done*, *The Willpower Instinct* combines life-changing prescriptive advice and complementary exercises to help readers with goals ranging from losing weight to more patient parenting, less procrastination, better health, and greater productivity at work.

Why We Fail to Do What's Right and What to Do about It McGraw Hill

A searing novel of social realism, Upton Sinclair's *The Jungle* follows the fortunes of Jurgis Rudkus, an immigrant who finds in the stockyards of turn-of-the-century Chicago a ruthless system that degrades and impoverishes him, and an industry whose

filthy practices contaminate the meat it processes. From the stench of the killing-beds to the horrors of the fertilizer-works, the appalling conditions in which Jurgis works are described in intense detail by an author bent on social reform. So powerful was the book's message that it caught the eye of President Theodore Roosevelt and led to changes to the food hygiene laws. In his Introduction to this new edition, Russ Castronovo highlights the aesthetic concerns that were central to Sinclair's aspirations, examining the relationship between history and historical fiction, and between the documentary impulse and literary narrative. As he examines the book's disputed status as novel (it is propaganda or literature?), he reveals why Sinclair's message-driven fiction has relevance to literary and historical matters today, now more than a hundred years after the novel first appeared in print.

A Novel Samuel French, Inc.

For fans of Stephen King, Joe Hill, and Sarah Langan comes a thrilling new vision of American horror. In Heather Herrman's heart-pounding debut novel, evil is ready to feed—and it's got one hell of an appetite. In the wake of tragedy, John and Erma Scott are heading west in search of a new life. So when car trouble strands them in sleepy Cavus, Montana, they decide to stay for a while, charmed by the friendly residents and the surrounding ambiance. Here, they hope, is the healing balm that their marriage needs. Then John and Erma find themselves in a fight not just to save their marriage, but their very lives. For this is no ordinary town. Its quiet streets conceal a dark and bloody secret that has slumbered for centuries. Now, that secret is awake . . . and it's hungry. Like a slow infection, evil is spreading

through Cavus. Soon John and Erma—along with the local sheriff, an undocumented immigrant, a traumatized teenage girl, and an old man with terrible secrets of his own—must join together to battle an all-consuming force that has set its sights on its prey: the entire human race. Advance praise for *Consumption* “Both the evil that suffuses the pages of *Consumption* and the motley gang of innocents who defend against it are much more interesting than those usually found in your average scare fare. Solid writing elevates this imaginative fright-fest from an invigorating new voice.”—Sophie Littlefield, bestselling author of the *Aftertime* series

My Story Library of Alexandria

The five McAlisters were gathered in the dining-room, one rainy night in late August. In view of the respective dimensions of the family circle and the family income, servants were few in the McAlister household, and division of labor was the order of the day. Old Susan had cleared away the table and brought in the lamp; then she retired to the kitchen, leaving the young people to themselves. Hope was darning stockings. She had one of Hubert's socks drawn on over her hand, which showed, white and dainty, through the great, ragged hole. Hubert sat near her with little Allyn on his knee, tiding over a crisis in the young man's temper by showing him pictures in the dilapidated *Mother Goose* which had done duty for successive McAlisters, from seventeen-year-old Hope down. "Stop kicking brother," he commanded, as Allyn lifted up his voice and his heels in vigorous protest against things in general, and the approach of the sandman in particular. "Listen, Allyn, -'There was a little man, And he had a little gun, And his bullets were made of lead, lead, lead.'"

The Egypt Game Hydra

The New York Times bestselling collection of humorous autobiographical essays by the Academy Award nominated actress and star of *Up in the Air* and *Pitch Perfect*. Even before she made a name for herself on the silver screen starring in films like *Pitch Perfect*, *Up in the Air*, *Twilight*, and *Into the Woods*, Anna Kendrick was unusually small, weird, and “10 percent defiant.” At the ripe age of thirteen, she had already resolved to “keep the crazy inside my head where it belonged. Forever. But here’s the thing about crazy: It. Wants. Out.” In *Scrappy Little Nobody*, she invites readers inside her brain, sharing extraordinary and charmingly ordinary stories with candor and winningly wry observations. With her razor-sharp wit, Anna recounts the absurdities she’s experienced on her way to and from the heart of pop culture as only she can—from her unusual path to the performing arts (Vanilla Ice and baggy neon pants may have played a role) to her double life as a middle-school student who also starred on Broadway to her initial “dating experiments” (including only liking boys who didn’t like her back) to reviewing a binder full of butt doubles to her struggle to live like an adult woman instead of a perpetual “man-child.” Enter Anna’s world and follow her rise from “scrappy little nobody” to somebody who dazzles on the stage, the screen, and now the page—with an electric, singular voice, at once familiar and surprising, sharp and sweet, funny and serious (well, not that serious).

Two-to Seven Year Olds; Experimental Stories Written for the Children of the City and Country School (formerly the Play School) and the Nursery School of the Bureau of Educational Experiments

Crown

A masterpiece ahead of its time, a prescient rendering of a dark future, and the inspiration for the blockbuster film *Blade Runner*. By 2021, the World War has killed millions, driving entire species into extinction and sending mankind off-planet. Those who remain covet any living creature, and for people who can’t afford one, companies built incredibly realistic simulacra: horses, birds, cats, sheep. They’ve even built humans. Immigrants to Mars receive androids so sophisticated they are indistinguishable from true men or women. Fearful of the havoc these artificial humans can wreak, the government bans them from Earth. Driven into hiding, unauthorized androids live among human beings, undetected. Rick Deckard, an officially sanctioned bounty hunter, is commissioned to find rogue androids and “retire” them. But when cornered, androids fight back—with lethal force. Praise for Philip K. Dick “The most consistently brilliant science fiction writer in the world.”—John Brunner “A kind of pulp-fiction Kafka, a prophet.”—The New York Times “[Philip K. Dick] sees all the sparkling—and terrifying—possibilities . . . that other authors shy away from.”—Rolling Stone

The inspiration for the films *Blade Runner* and *Blade Runner 2049* Ballantine Books

And *The Dead Shall Rise*. . . Two hellish years. That’s how long it’s been since the hurricanes flooded the Gulf Coast, and the dead rose up from the ruins. The cities were quarantined; the infected, contained. Any unlucky survivors were left to fend for themselves. A feast for the dead. And *The Living Shall Gather*. . . One boatload of refugees manages to make it out alive—but one passenger carries the virus. Within weeks, the zombie epidemic

spreads across the globe. Now, retired U.S. Marshal Ed Moore must lead a group of strangers to safety, searching for sanctuary from the dead. A last chance for the living. Let The Battle Begin. In the North Dakota Grasslands, bands of survivors converge upon a single outpost. Run by a self-appointed preacher of fierce conviction--and frightening beliefs--it may be humanity's only hope. But Ed Moore and the others refuse to enter a suicide pact. They'd rather stand and fight in the final battle against the zombies. An apocalypse of the dead. "One of those rare books that starts fast and never ever lets up. . . a rollercoaster ride of action, violence and zombie horror." --Bram Stoker Award-winning author Jonathan Maberry on *Dead City* "Gritty suspense. . . You're gonna like this guy." --Tom Monteleone "A rising star on the horror scene."--Fearnnet.com

The Jungle Flashes of ThoughtLessons in life and leadership from the man behind Dubai

Since Descartes famously proclaimed, "I think, therefore I am," science has often overlooked emotions as the source of a person's true being. Even modern neuroscience has tended, until recently, to concentrate on the cognitive aspects of brain function, disregarding emotions. This attitude began to change with the publication of Descartes' Error in 1995. Antonio Damasio—"one of the world's leading neurologists" (The New York Times)—challenged traditional ideas about the connection between emotions and rationality. In this wondrously engaging book, Damasio takes the reader on a journey of scientific discovery through a series of case studies, demonstrating what many of us have long suspected: emotions are not a luxury, they are essential to rational thinking and to normal social behavior.

10 Buildings That Changed America Agate Publishing

The Tooth Doctor- Dr. Kenyatta Mack DDS, is teaching kids about oral hygiene and cavity prevention with colorful illustrations and entertaining stories. Children will learn how to take care of their teeth and gums if they listen to the Tooth Doctor. Five stories are featured in this book: A Day in the Dungeon, Let's Keep away from Cavities, Bring me my Braces, Foods for our Teeth, and Goodbye Baby Teeth.

The Bulgarian C# Book Ravenio Books

'My first serious blackout marked the line between sanity and insanity. Though I would have moments of lucidity over the coming days and weeks, I would never again be the same person ...' Susannah Cahalan was a happy, clever, healthy twenty-four-year old. Then one day she woke up in hospital, with no memory of what had happened or how she had got there. Within weeks, she would be transformed into someone unrecognizable, descending into a state of acute psychosis, undergoing rages and convulsions, hallucinating that her father had murdered his wife; that she could control time with her mind. Everything she had taken for granted about her life, and who she was, was wiped out. Brain on Fire is Susannah's story of her terrifying descent into madness and the desperate hunt for a diagnosis, as, after dozens of tests and scans, baffled doctors concluded she should be confined in a psychiatric ward. It is also the story of how one brilliant man, Syria-born Dr Najjar, finally proved - using a simple pen and paper - that Susannah's psychotic behaviour was caused

by a rare autoimmune disease attacking her brain. His diagnosis of this little-known condition, thought to have been the real cause of devil-possession through history, saved her life, and possibly the lives of many others. Cahalan takes readers inside this newly-discovered disease through the progress of her own harrowing journey, piecing it together using memories, journals, hospital videos and records. Written with passionate honesty and intelligence, *Brain on Fire* is a searingly personal yet universal book, which asks what happens when your identity is suddenly destroyed, and how you get it back. 'With eagle-eye precision and brutal honesty, Susannah Cahalan turns her journalistic gaze on herself as she bravely looks back on one of the most harrowing and unimaginable experiences one could ever face: the loss of mind, body and self. *Brain on Fire* is a mesmerizing story' -Mira Bartók, New York Times bestselling author of *The Memory Palace* Susannah Cahalan is a reporter on the New York Post, and the recipient of the 2010 Silurian Award of Excellence in Journalism for Feature Writing. Her writing has also appeared in the New York Times, and is frequently picked up by the Daily Mail, Gawker, Gothamist, AOL and Yahoo among other news aggregator sites.

A Mother's List of Books for Children Forever

This important collection of anecdotes and reminiscences from Sheikh Mohammed bin Rashid Al Maktoum is published to mark the occasion of his fifty years in public service, which began with his appointment as Dubai's Minister of Defence in 1968. These stories tell of the vision behind Dubai's meteoric growth from a small and bustling trading port to an international metropolis at the heart of global business. They record the evolution of the

United Arab Emirates from a shared ideal to a nation where more than 195 nationalities live and work in peace, harmony and prosperity. And they reveal insights from a man whose drive, determination and will to succeed have become legendary. Within these stories lies the heart of Sheikh Mohammed the statesman, the equestrian, the poet and the leader. They are written with the intent to inspire and inform new generations of readers, and to celebrate the achievements of this young and vibrant nation and the people who shaped it. This celebration of a life in service is unavoidably incomplete. As Sheikh Mohammed himself indicates, there is still so much left to do. As a record of the first fifty years alone, however, it forms part of a remarkable legacy. Other titles written by Sheikh Mohammed and published by Explorer include *Zayed*, *Reflections on Happiness & Positivity*, *Flashes of Verse* and *Two Great Leaders*.

Apocalypse of the Dead OUP Oxford

Ironically enough, one of the twentieth century's leading pacifists wrote *Little Wars*, a book that has entertained and enlightened war buffs for the past hundred years. H. G. Wells, the great science-fiction pioneer, turned his attention from tales of time travel and alien invasions to write the first classic book of war games. His simulations of past battles and hypothetical future clashes allow readers to test their tactical and strategic skills and attempt to rewrite history. The companion piece, *Floor Games*, offers a more lighthearted look at war games. Based on the playful battles Wells waged with his sons, the narrative describes how creative play with miniature figures can transform an ordinary room into a magical world. The book has since been hailed as an inspiration for the development of a nonverbal

psychotherapeutic method employed in the treatment of adults and children. Both Little Wars and Floor Games feature winsome illustrations by J. R. Sinclair that enhance their antique charm.

Cosimo, Inc.

First published in 1897, *The Invisible Man* is one of the first science fiction stories. The disturbing tale centers on Griffin, a scientist who has discovered the means to make himself invisible. His initial, almost comedic, adventures are soon overshadowed by the bizarre streak of terror he unleashes upon the inhabitants of a small village. Notable for its sheer invention, suspense, and psychological nuance, *The Invisible Man* had been filmed many times and continues to enthrall science-fiction fans today as it did the reading public nearly 100 years ago.

Empire Lulu.com

This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann. He traces LSD's path from a promising psychiatric research medicine to a recreational drug

sparkling hysteria and prohibition. We follow Dr. Hofmann's trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmann's powerful conclusion that mystical experience may be our planet's best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend the wonder, the mystery of the divine in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people. Now, more than sixty years after the birth of Albert Hofmann's problem child, his vision of its true potential is more relevant, and more needed, than ever.

Consumption Lulu.com

Presents a new translation of the Anglo-Saxon epic chronicling the heroic adventures of Beowulf, the Scandinavian warrior who saves his people from the ravages of the monster Grendel and Grendel's mother.
