 Automakers are as prone to turn out clunkers as politicians are to lie. Their cars may be ugly, misconceived, badly built, diabolical to drive, ridiculously thirsty, or just plain unreliable. So which were the worst of the past 20 years?

In May 1958, one of the world's largest motor manufacturers unveiled a diminutive two-seater that would take the world by storm. Small in stature yet able to punch well above its weight, the Austin-Healey Sprite rapidly gained an enthusiastic following among keen drivers, as well as an impressive record in competition. Being neither expensive nor exotic, for many motorists the Sprite opened the door to sports car ownership and, in so doing, its commercial success was almost

guaranteed. With over 250 photographs, this book includes: the genesis of the Sprite, from the Austin Seven and pre-war MG Midget, via Donald Healey's Riley- and Nash-engined models, to the Austin A30, A90 Atlantic and Healey Hundred. The development, launch and market reception is covered along with details of the evolution from Mk I to Mk IV, including the Frogeye and restyled ADO 41. Rallies, racing and record breaking details are given as well as information on

modifications, special-bodied variants, replicas and finally, buying and restoring a Sprite today. The Yugo Springer Science & Business Media

 This book tells the story of the modern car industry from the inside. What is it really like to work for the carmakers – the industrial giants that influence the daily lives of millions? How are mass-production cars really designed, engineered, and manufactured? What does it take to engineer a successful vehicle? The story is told through the author's own journey around the globe – starting as a young graduate engineer

working for Nissan in the UK, to working for Nissan in Japan and, finally, for Renault in France as Chief Engineer of its 'halo' sports-car, designed to relaunch the Alpine brand. It tells the behind-the-scenes story of three well-known vehicles, whose development teams were led by the author – the Nissan Qashqai, the Renault ZOE, and the Alpine A110 – revealing some of the fascinating stories of how these vehicles came into being. The book seeks to show the real work that goes on

behind the glamour of the Motor Shows and the well-honed corporate press releases - work that is sometimes exciting, but often grindingly difficult. Pub2Pub Little, Brown Books for Young Readers 'Car Design Asia' is the third volume in a series on automotive history. Learn how this continent rose to the top in car manufacturing.
