The SADC Protocol on Gender and Development is the only sub-regional instrument in the world that brings together global and continental commitments to gender equality in one instrument used to enhance accountability. The Southern African Gender Protocol Alliance is a network of country and regional NGOs that campaigned for the Protocol, it's updating, implementation and tracking. Originally aligned to the Millennium Development Goals that expired in 2015, SADC Gender Ministers updated the Protocol and aligned it to the Sustainable development Goals (SDGs), Beijing Plus Twenty and the Africa Agenda 2063 in 2016. In July 2017, the Ministers adopted a Monitoring, Evaluation and Results Framework (MERF) that is now the basis of reporting. 2018 marks the tenth anniversary of the SADC Gender Protocol and the Barometer. Moving with the times, the Alliance has expanded the two yardsticks in the Barometer: the SADC Gender and

Development Index (SGDI) and the Citizen Score Card (CSC). The Barometer incorporates many MERF and SDG indicators, as well as its own unique measures of voice, choice and control. The Barometer also introduces the Gender Responsive Assessment of Constitutions and Laws conducted by Alliance experts and networks around the region. A wealth of data, insights and analysis awaits all readers of the Barometer, that will also be made available online and in multi-media formats. The "SADC we want" is one in which citizens engage; step it up for gender equality, and make sure we achieve Planet 50/50 by 2030!

Extraterritorial Criminal Jurisdiction in China, Japan, and South Korea Cengage Learning
 This book undertakes unique case studies, including interviews with participants, as well as empirical analysis, of public and private enforcement of Australian securities laws addressing continuous disclosure. Enforcement of laws is crucial to effective regulation. Historically, enforcement was the province of a government regulator with significant discretion (public enforcement). However, more and more citizens are being expected to take action themselves (private enforcement). Consistent with regulatory pluralism, public and private enforcement exist

in parallel, with the capacity to both help and hinder each other, and the achievement of the goals of enforcement in a range of areas of regulation. The rise of the shareholder class action in Australia, backed by litigation funding or lawyers, has given rise to enforcement overlapping with that of the government regulator, the Australian Securities and Investments Commission. The ramifications of overlapping enforcement are explained based on detailed analysis. The analysis is further bolstered by the regulator's approach to enforcement changing from a compliance orientation to a "Why not litigate?" approach. The analysis and ramifications of the Australian case studies involve matters of regulatory theory and practice that apply across jurisdictions. The book will appeal to practitioners, regulators and academics interested in regulatory policy and enforcement, and the operation of regulators and class actions, including their interaction.

This book seeks to interrogate the classical fiqh formulation on gender and homicide with a view to exploring further the debate on whether the so-called gender injustice in Islamic law is a human creation or attributable to the divine sources of the Qur'an and Sunnah. The study is in response to

the increasing criticism of the Islamic criminal law regime and the accusation that it discriminates on the basis of gender. It argues that any attempt to critique a religious question through the lens of traditional Western human rights ideals would be resisted by the vast majority of Muslims. An examination of the question and any suggested solutions offered would be much more effective if situated within the system they identify with; that is to address the question of gender justice deficit from within the Islamic legal tradition. Focusing on Nigeria and Pakistan, the book achieves this by drawing on classical fiqh literature, contemporary literature, legislative sources and relevant case law.

This edited collection addresses a number of free speech vs security concerns that are engaged by counter-terrorism law and policy makers across a number of liberal democracies, and explores the delicate balance between free speech and the censoring of views that promote hatred or clash with fundamental democratic values. It does this by looking at the perspectives and level of disagreement between those who consider today's counter-terrorism and extremism strategies to be a soft and liberal approach, and those who believe these strategies disproportionately impact freedom of expression and association and non-violent political dissent. The contributors include academics, practicing lawyers, and think-tank analysts who examine whether universities and schools incubators of violent radicalism and debate, and whether the views of 'extremist' speakers and hate preachers need to be censored. Outside the UK, critical discussion of the regulation of counter-terrorism, extremism, and free speech in other liberal democracies is also offered. This book will be of great interest to researchers and practitioners with interests in extremism, terrorism, civil rights, and freedom of speech.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

The War on Terror has been going on for over a decade and it shows no signs of winding down in near future, a war which has directly contributed to growing security regimes in frontline states. This book focuses on the legal dimensions of the War on Terror and security in Pakistan. It highlights the growth of the security state in Pakistan, and questions the growing and by-now entrenched legal security regime in the country. The book traces the roots of the present security laws in colonial and post-colonial times. One broader dimension from which the legal security regime of Pakistan is approached in this book is through highlighting specific issues concerning the legal identity of the subject such as the rights of aliens in the background of state power versus liberal constitutionalism, and the rights of terrorism suspects in the background of deploying death sentence as a tactical, psychological tool versus the absolute right to life (of every individual). By critically reflecting on the increasingly institutionalized form of the security apparatus in Pakistan, the book (indirectly) suggests the legal ways to resist the growing legal security regime and derogation from human rights. Offering a theoretically engaged and critically reflective overview of the current state of individual identity, rights and freedoms in face of a burgeoning legal regime of security in Pakistan, this study makes advances in critical legal studies and critical IR. It will be of

interest to academics working in the field of security studies, South Asian Studies, particularly Pakistan, and the War on Terror.

This monograph investigates the International, European and Commonwealth Caribbean approaches to human trafficking from an Analytical Eclectic perspective. It presents a compelling, empirically based argument that although there is currently a panoply of measures aimed at preventing human trafficking, prosecuting offenders and protecting trafficked victims in both Europe and the Commonwealth Caribbean, these measures have in practice been fraught with a number of challenges, whether of a normative, institutional or individual nature. The continued existence of these challenges strongly suggests that there exists a 'disconnect' between anti-trafficking law and practice which is not peculiar to small-island developing States since they also extend to developed States, including the United Kingdom. Although these challenges are not insurmountable, this monograph advances the argument that sustained social, economic, political and legal commitments are both necessary and desirable, and that without such commitments, only pyrrhic victories would be won in the fight to eradicate the scourge of the twenty-first century. Given the importance of the issue of human trafficking and its inescapable impact on victims, families, communities, nations, regions and the international community as a whole, this monograph will serve as an important resource for policy makers, scholars, students and practitioners actively working in this increasingly dynamic area of law.

This book showcases empirical studies on workplace bullying from a range of Asian countries, including China, India, Indonesia, Israel, Japan, Jordan, Malaysia, Pakistan, Singapore, South Korea, Sri Lanka, Thailand, UAE and Vietnam, and is the first-of-its-kind single academic project documenting workplace emotional abuse in the world's largest continent. It encompasses the 'varieties of workplace bullying' conceptualization in addition to category-based harassment and abusive supervision, and presents target, bystander and interventionist perspectives, along with contextualized insights into the phenomenon. The book speaks to the significance of sociocultural factors and draws on several theoretical and substantive bases including dignity, social cynicism, coping, gender, sexual orientation, job insecurity, turnover intention, affective events theory, attribution theory, regulation and policy initiatives. Covering all major regions in Asia where workplace bullying has been found to occur, namely West Asia, South Asia, Southeast Asia and East Asia, the book portrays studies which engage both positivist and postpositivist paradigms, utilize an array of methods and include a range of industrial sectors and employment contracts and all levels of the organization. While focused on Asia, the book's insights have international relevance and are of interest to the worldwide community of researchers, practitioners and students of organizational studies, human resource management, industrial sociology, work psychology, industrial relations, labour law, corporate law, health sciences, social work and Asian studies.

[Offshore Financial Centres and the Law](#) Cambridge University Press

This book considers whether coercive control (particularly non-physical forms of family violence)

should be prohibited by the criminal law. Based on the premise that traditional understandings of family violence are severely limited, it considers whether the core of family violence is power-based controlling or coercive behavior: attempts by men to psychologically dominate their partners. Such behavior can cause significant psychological, physical and economic harms to victims and is increasingly recognized as a form of human rights abuse. The book considers the new offences that have been introduced in England and Wales (controlling or coercive behavior), Ireland (controlling behavior) and Scotland (domestic abuse). It invites consideration of three key questions: Do conventional criminal laws adequately regulate non-physical abuse? Is the criminal law an appropriate mechanism for responding to the coercive control of family members? And if a new and distinctive offence is warranted, what is the optimal form of that offence? This ground-breaking work is essential reading for researchers and practitioners interested in coercive control and the proper role of the criminal law as a mechanism for regulating family violence.

This book considers the ability of island jurisdictions with financial centres to meet the expectations of the international community in addressing the threats posed to themselves and others by their innocent (or otherwise) facilitation of the receipt of suspect wealth. In the global financial architecture, British Overseas Territories are of material significance. Through their inalienable right to self-determination, many developed offshore financial centres to achieve sustainable economic development. Focusing on Bermuda, Turks and Caicos, and Anguilla, the book concerns suspect wealth emanating from financial crimes including corruption, money laundering and tax evasion, as well as controversial conduct like tax avoidance. This work considers the viability of international standards on suspect wealth in the context of the territories, how willing or able they are to comply with them, and how their financial centres can better prevent receipt of suspect wealth. While universalism is desirable in the modern approach to tackling suspect wealth, a one-size-fits-all approach is inappropriate for these jurisdictions. On critically evaluating their legislative and regulatory regimes, the book advances that they demonstrate willingness to comply with international standards. However, their abilities and levels of compliance vary. In acknowledging the facilitatively harmful role the territories can play, this work draws upon evidence of implication in transnational financial crime cases. Notwithstanding this, the book questions whether the degree of criticism that these offshore jurisdictions have encountered is warranted in light of apparent willingness to engage in the enactment and administration of internationally accepted laws and cooperate with international institutions.

Journalists and Confidential Sources explores the fraught and widespread reliance by journalists on anonymous sources, whistleblowers and others to whom they owe an obligation of confidentiality. It examines the difficulties afflicting such relationships; the deteriorating 'right to know' and freedom of expression frameworks; and explores solutions and reforms. The book discusses key Australian and international source protection ethics rules, statutes, court cases, law enforcement actions and case studies. It highlights weakness in journalists' professional practice codes governing confidentiality obligations; discusses inadequate journalistic appreciation of the importance of establishing clear terms and conditions underpinning confidentiality obligations; and identifies shortcomings in the law governing source protection. The book argues that despite source protection being widely recognised as an important ideal, source protection is under

sustained assault, thereby undermining public access to information, and democracy itself. The work focusses on Australia, but takes into account source protection in the United Kingdom, the United States, Canada and New Zealand. This timely contribution to the global discussion on the subject will greatly interest journalists, scholars, educators, and students especially in the areas of media law and policy, journalism, media and communication studies, and public relations; the legal fraternity; and anyone who communicates with journalists.
