RICHARD LAMBERT

Portraits of Earth Springer Nature

Looks at the Planet Earth with numerous color illustrations and accompanying text, with separate sections examining the atmosphere, pedosphere, biosphere, hydrosphere, cryosphere, and geosphere.

Geotours Workbook Nosy Crow

This new stand-alone edition of Geotours Workbook contains nineteen active-learning tours that take students on virtual field trips to see outstanding examples of geology around the world. *Livre du pain et du vin, de leau, de lhuile et du baume* Centripetal Press

When faced with climate change, the biggest threat that our planet has ever confronted, it's easy to feel as if nothing you do can really make a difference . . . but this book proves that individual people can change the world. With twenty inspirational stories celebrating the pioneering work of a selection of Earth Heroes from all around the globe, from Greta Thunberg and David Attenborough to Yin Yuzhen and Isatou Ceesay, each tale is a beacon of hope in the fight for the future of our planet, proving that one person, no matter how small, can make a difference. Featuring Amelia Telford, Andrew Turton and Pete Ceglinski, Bittu Sahgal, Chewang Norphel, David Attenborough, Doug Smith, Ellen MacArthur, Greta Thunberg, Isabel Soares, Isatou Ceesay, Marina Silva, Melati and Isabel Wijsen, Mohammed Rezwani, Renée King-Sonnen, Rok Rozman, Sheila Watt-Cloutier, Stella McCartney, William Kamkwamba, Yin Yuzhen and Yvon Chouinard. Featuring illustrations by Jackie Lay.

140 Artists' Ideas for Planet Earth Penguin UK

Earth Science text for middle school students. Beautifully designed and illustrated in accordance with our signature mastery-based teaching philosophy. 15 chapters, covering all the basic Earth Science topics, including the evidence for an old earth and support for the scientific consensus of human-caused climate change.

Earth: Portrait of a Planet 6e ISE PA W/EB+REG CR+ Geotours

WKBK 2e PA (STANDALONE) Tim Duggan Books

The #1 international bestseller: An astronaut's tour of our planet from the heavens, featuring 150 mesmerizing photographs (with commentary) from the International Space Station. During his six-month mission to the International Space Station, astronaut Tim Peake became the first British astronaut to complete a spacewalk -- and, perhaps more astonishingly, the first to run an entire marathon in space. During his historic mission, he captured hundreds of dazzling photographs, the very best of which are collected here. Tim captures the majesty of the cosmos and of the planet we call home: breath-taking aerial photos of the world's cities illuminated at night, the natural beauty of the northern lights, and unforgettable views of oceans, mountains, and deserts. Tim's lively stories about life in space appear alongside these photographs, including the tale from which the title is taken: his famous wrong number dialed from space, when he accidentally called a stranger and asked: "Hello, is this planet Earth?" With this truly unique perspective on the incredible sights of our planet, Tim demonstrates that while in space, hundreds of miles above his friends and family, he never felt closer to home.

If You Come to Earth Prometheus Books

10 years on from the first, groundbreaking, Planet Earth, we use the most incredible advances in technology and scientific discovery to bring you the most exciting and immersive picture of our world's wildlife yet. With over 250 breathtaking photographs and stills from the BBC Natural History Unit's spectacular footage, this is an extraordinary new look at the complex life of some of the most amazing places on Planet Earth. Each chapter reveals an environment - some never-before-seen, some astonishingly familiar - defined by a unique set of rules required for survival. From the most desolate desert to the depths of the jungle, from blistering heat and freezing cold to perpetual darkness and deadly UV, discover how a whole host of creatures have adapted to life in the most extreme conditions. And how they compete with one another to become the largest, the fastest, the most poisonous, or most devious - all in a bid to survive. Planet Earth II includes the first in-depth look at the urban environment, and the surprising range of behaviours occurring right under our noses, as well as some previously untouched island worlds. Filmed with

remarkable 5k and infra-red technology, these are the challenges, the confrontations, and the triumphs of some of the most extraordinary creatures in the natural world, told from their perspective. This is our planet, as you have never seen it before.

Planet Earth: Land, Water, Sky Ten Speed Press

#1 NEW YORK TIMES BESTSELLER • "The Uninhabitable Earth hits you like a comet, with an overflow of insanely lyrical prose about our pending Armageddon."—Andrew Solomon, author of *The Noonday Demon* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY *The New Yorker* • *The New York Times* Book Review • *Time* • *NPR* • *The Economist* • *The Paris Review* • *Toronto Star* • *GQ* • *The Times Literary Supplement* • *The New York Public Library* • *Kirkus Reviews* It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible—food shortages, refugee emergencies, climate wars and economic devastation. An "epoch-defining book" (*The Guardian*) and "this generation's *Silent Spring*" (*The Washington Post*), *The Uninhabitable Earth* is both a travelogue of the near future and a meditation on how that future will look to those living through it—the ways that warming promises to transform global politics, the meaning of technology and nature in the modern world, the sustainability of capitalism and the trajectory of human progress. *The Uninhabitable Earth* is also an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation—today's. **LONGLISTED FOR THE PEN/E.O. WILSON LITERARY SCIENCE WRITING AWARD** "The Uninhabitable Earth is the most terrifying book I have ever read. Its subject is climate change, and its method is scientific, but its mode is Old Testament. The book is a meticulously documented, white-knuckled tour through the cascading catastrophes that will soon engulf our warming planet."—Farhad Manjoo, *The New York Times* "Riveting. . . . Some readers will find Mr. Wallace-Wells's outline of possible futures alarmist. He is indeed alarmed. You should be, too."—*The Economist* "Potent and evocative. . . . Wallace-Wells has resolved to offer something other than the standard narrative of climate change. . . . He avoids the 'eerily banal language of climatology' in favor of lush, rolling prose."—Jennifer Szalai, *The*

New York Times "The book has potential to be this generation's Silent Spring."—The Washington Post "The Uninhabitable Earth, which has become a best seller, taps into the underlying emotion of the day: fear. . . . I encourage people to read this book."—Alan Weisman, The New York Review of Books

Earth 2e IM/TIF PA HarperCollins UK

For generations, the ground beneath the feet of our ancestors seemed solid and unchanging. Around 30 years ago, two things happened that were to revolutionize the understanding of our home planet. First, geologists realized that the continents themselves were drifting across the surface of the globe and that oceans were being created and destroyed. Secondly, pictures of the entire planet were returned from space. As the astronomer Fred Hoyle had predicted, this 'let loose an idea as powerful as any in history'. Suddenly, the Earth began to be viewed as a single entity; a dynamic, interacting whole, controlled by complex processes we scarcely understood. It began to seem less solid. As one astronaut put it, 'a blue jewel on black velvet; small, fragile and touchingly alone'. Geologists at last were able to see the whole as well as the detail; the wood as well as the trees. This book brings their account up to date with the latest understanding of the processes that govern our planet. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Earth Emotions Eerdmans Young Readers

"This is the first real biography of the Earth - not only a brilliant portrait of the emergence and evolution of life on this planet, but a vivid and frightening look at Earth's remote future. Peter Ward and Donald Brownlee combine storytelling power with extreme scientific care, and their narrative is as transfixing as any of H.G. Wells's fantasies, but more enthralling, for Ward and Brownlee have real power to prognosticate. This is a book that makes one shiver, but also inspires one to wonder how humanity (if we survive in the short term) will fare in the distant future." Oliver Sachs Peter Ward and Don Brownlee, a geologist and an astronomer respectively, are in the vanguard of the new field of astrobiology. Combining their knowledge of the evolution of life

on our planet with their understanding of the life cycles of stars and solar systems, the authors tell the awe-inspiring story of the second half of Earth's life. The process of planetary evolution will essentially reverse itself; life as we know it will subside until only the simplest forms remain. The oceans will evaporate, and as the sun slowly expands, Earth itself will eventually meet a fiery end.

Earth Squad Ballantine Books

Join fifty inspiring and extraordinary environmental crusaders working to save our planet and see how you can make a difference just like them. Kids across the globe will be moved by the passion of these amazing eco-warriors who have dedicated their lives to making our world a better place. Alongside dynamic illustrations and entertaining biographical information, you'll find practical tips that anyone can do to help save the earth. Every one of us can make a difference, and, together as an Earth Squad, we can change the world. Earth Albert Whitman & Company

From two-time Caldecott Winner author-illustrator Sophie Blackall! If You Came to Earth is a glorious guide to our home planet, and a call for us to take care of both Earth and each other. This stunning book is inspired by the thousands of children Sophie Blackall has met during her travels around the world in support of UNICEF and Save the Children. • An engaging storybook about a single curious and imaginative child • Simultaneously funny and touching • Carries a clear message about the need to care for the earth and each other If you come to Earth, there are a few things you need to know. . . . We live in all kinds of places. In all kinds of

homes. In all kinds of families. Each of us is different. But all of us are amazing. And, together, we share one beautiful planet. This masterful and moving picture book is a visually comprehensive guide to the earth, imbued with warmth and humor. • Ideal for children ages 3 to 5 years old • A great pick for teachers looking for a crowd-pleasing picture book about the world for little students • Perfect for parents, grandparents, and caregivers • You'll love this book if you love books like The Travel Book by Lonely Planet Kids, Atlas of Adventures by Rachel Williams, and If You Lived Here: Houses of the World by Giles Laroche.

Our Planet OUP Oxford

With a foreword by Sir David Attenborough, this is the striking photographic companion to the Emmy-winning NETFLIX original documentary series, presenting never-before-seen visuals of nature's most intriguing animals in action and the environmental change that has to be seen to be believed. With six hundred members of crew filming in fifty countries over four years, the directors that brought us the original Planet Earth and Blue Planet now take readers on a journey across all the globe's different biological realms to present stunning visuals of nature's most intriguing animals in action, and environmental change on a scale that must be seen to be believed. Featuring some of the world's rarest creatures and previously unseen parts of the Earth—from deep oceans to remote forests to ice caps—Our Planet takes nature-lovers deep into the science of our natural world. Revealing the most amazing sights on Earth in unprecedented ways, alongside stories of the ways humans are affecting the world's ecosystems—from the wildebeest migrations in Africa to the penguin colonies of Antarctica—this book places itself at the forefront of a global conversation as we work together to protect and preserve our planet. With a keepsake package featuring debossing and foil stamping, this groundbreaking coffee-table book reveals the most amazing sights on Earth in unprecedented ways.

The Earth: A Very Short Introduction Little, Brown

Move to another planet? Sounds interesting! In our imaginary spaceship, let's check out the planets in our solar system. Mercury is closest, but it has no air, and it's either sizzling hot or bitterly cold. The atmosphere on Venus is poisonous; plus, human beings would cook there. Mars might work, but you'd always have to be in a protective shelter. And if you got to the outer planets,

you couldn't even land as they are mostly made of gas! Our home planet is looking good. Why is Earth so comfortable for plants, animals, and people? As Robert E. Wells explains, it's because of our just-right position from the sun, marvelous atmosphere, and abundant water. Our planet is very special and perfect for us, and that's why we must do all we can to keep Earth healthy.

[Earth Portrait of a Planet 4E Ebook Folder+essentials of Geology](#)

[4E Geotours Workbook](#) W. W. Norton

Draws on satellite images from NASA to trace the natural history of the planet, describing the forces that have shaped Earth's geography and highlighting noteworthy features, including volcanoes, asteroid craters, river deltas, and glaciers.

Earth! My First 4.54 Billion Years W. W. Norton

PORTRAITS OF THE EARTH, combines 114 remarkable photographs with a compelling text. It is a remarkable photographic portrait of this planet we call Earth.

[Hello, Earth!](#) Cornell University Press

We walk on Earth's surface every day, but how often do we wonder about the incredible planet around us? From the molten

cracks below to the shimmering moon above, *Hello, Earth!* explores the wonders of the natural world. This playful journey across our puzzle-piece continents does not hesitate to ask questions—even of the Earth itself! Joyce Sidman's imaginative poems encourage boundless curiosity, and Miren Asiain Lora's stunning paintings capture the beauty of Earth's ecosystems, creatures, and powerhouse plants. The book concludes with extensive scientific material to foster further learning about how the earth works, from water cycles to plate tectonics to the origin of ocean tides. A gorgeous, expansive celebration of science and art, *Hello, Earth!* is a book to cherish in whatever landscape you call home.

Our Planet! There's No Place Like Earth Henry Holt and Company (BYR)

Written for students of geology, this text incorporates advances in earth science such as plate tectonics, global warming, and the interconnectivity between the history of Earth and the history of life. It begins with a brief discussion of cosmology and the world's origin.

Earth: Portrait of a Planet Random House

CD-ROM contains: Animations -- Self-tests -- Crossword puzzles -- Feature articles.

[The Uninhabitable Earth](#) W. W. Norton

Through 140 drawings, thought experiments, recipes, activist instructions, gardening ideas, insurgences and personal revolutions, artists who spend their lives thinking outside the box guide you to a new worldview; where you and the planet are one. Everything here is new. We invite you to rip out pages, to hang them up at home, to draw and scribble, to cook, to meditate, to take the book to your nearest green space. Featuring Olafur Eliasson, Etel Adnan, Alexis Pauline Gumbs, Jane Fonda & Swoon, Judy Chicago, Black Quantum Futurism Collective, Vivienne Westwood, Cauleen Smith, Marina Abramovic, Karrabing Film Collective, and many more.

The Life and Death of Planet Earth Henry Holt and Company (BYR)

Worksheets accompany each chapter's Geotour--23 in all--and can be assigned as homework assignments and lab activities.
