 This collection of essays explores the history of the book in pre-modern South Asia looking at the production, circulation, fruition and preservation of manuscripts in different areas and across time. Edited by the team of the Cambridge-based Sanskrit Manuscripts Project and including contributions of the researchers who collaborated with it, it covers a wide range of topics related to South Asian manuscript culture: from the material dimension (palaeography, layout, decoration) and the complicated interactions of manuscripts with printing in late medieval Tibet and in modern Tamil Nadu, to reading, writing, editing and educational practices, from manuscripts as sources for the study of religious, literary and intellectual traditions, to the creation of collections in medieval India and Cambodia (one major centre of the so-called Sanskrit cosmopolis), and the formation of the Cambridge collections in the colonial period. The contributions reflect the variety of idioms, literary genres, religious movements, and social actors (intellectuals, scribes, patrons) of ancient South Asia, as well as the variety of approaches, interests and specialisms of the authors, and their impassionate engagement with manuscripts.

The Secret Astrology of the Bible by Michael Ledo is a landmark book that will change the way the scholarly community and the general public views the Bible, history and myth. Epic in scope, this provocative book explores the connections between religious belief and cosmic theory, even as it

attempts to explain contradictions and irregularities in the text. The Bible, states Ledo, was constructed as a living document, with much of its text expanded as time went on. If readers stripped away this added material, they could actually be left with an Early Bronze Age text, over a thousand years older than what is currently accepted by scholars. This text, suggests Ledo, would be a veritable cosmic myth which follows the constellations with stories in a contiguous fashion that combine both history and myth. Originally sold as "On Earth as it is in Heaven, The Cosmic Roots of the Bible."

This volume covers the philosophical, historical, religious, and interpretative aspects of the ancient Guodian bamboo manuscripts (竹简) which were disinterred in the Guodian Village in Hubei Province, China, in 1993. Considered to be the Chinese equivalent of the Dead Sea Scrolls, these manuscripts are archaeological finds whose importance cannot be underestimated. Many of the texts are without counterparts in the transmitted tradition, and they provide unique insights into the developments of Chinese philosophy in the period between the death of Confucius (551-479 BCE) and the writings of Mencius (c.372-289 BCE), and beyond. Divided into two parts, the book first provides inter-textual contexts and backgrounds of the Guodian manuscripts. The second part covers the main concepts and arguments in the Guodian texts, including cosmology and metaphysics, political philosophy, moral psychology, and theory of human nature. The thematic essays serve as an introduction to the philosophical significance and the key philosophical concepts/thought of each text contained in the Guodian corpus. Each chapter has a section on the implications of the texts for the received tradition, or for the purpose of comparing some of the text(s) with the received tradition in terms of the key philosophical concepts as well as the reading and interpretation of the texts. The volume covers most of the texts inscribed on the 800-odd slips of the Guodian corpus dated to

the fourth century BCE.

This is the third of George Wilson's fascinating explanations of his personal spiritual philosophy, first outlined in his previous books *At Last I Know* and *Through the Doors of Time*. The author interweaves his profound spiritual observations with recollections of his life, from childhood days in Motherwell to a career in heavy industry that took the author and his family wherever there was work, including Zambia and South Africa. These reminiscences are often humorous, though sometimes poignant and deeply moving. Reflecting on his profound observations and supporting them with references from the Bible, the author explains his theory on the nature of the human soul and its relationship with God. Personal tragedy has led to the author taking his lifelong belief in a benign supernatural force and eternal reincarnation to a greater depth, from where he has taken solace. George Wilson was born in Flemington, Scotland, and pursued a career in industry as a Comprehensive International Welding Inspector. He retired in 2003 and currently lives in South Africa.

"A breath of intellectual fresh air . . . [an] amusing look at how to dispel endemic pseudoscience and conspiracy theories through rational thinking." —Publishers Weekly *Aliens*. Ley lines. Water dowsing. Conspiracies and myths captivate imaginations and promise mystery and magic. Whether it's arguing about the moon landing hoax or a Frisbee-like Earth drifting through space, when held up to science and critical thinking, these ideas fall flat. In *Weird Earth: Debunking Strange Ideas About Our Planet*, Donald R. Prothero demystifies these conspiracies and offers answers to some of humanity's most outlandish questions. Applying his extensive scientific knowledge, Prothero corrects misinformation that con artists and quacks use to hoodwink others about geology—hollow earth, expanding earth, and bizarre earthquakes—and mystical and paranormal happenings—healing crystals, alien landings, and the gates of hell. By deconstructing wild claims such as prophecies of imminent natural disasters, Prothero provides a way for everyone to recognize dubious assertions. Prothero answers these claims with facts, offering historical and scientific context in a light-hearted manner that is accessible to everyone, no matter their background. With a careful layering of evidence in geology, archaeology, and biblical and historical records, Prothero's *Weird Earth* examines each conspiracy and myth and leaves no question unanswered. *Weird Earth* is about the facts and the people who don't believe them. Don Prothero describes the process of science—and the process of not accepting it. If you're wondering if humans walked on the Moon, if you've wondered where the lost City of Atlantis went, or if you're wondering what your cat will do before an earthquake, check out *Weird Earth*." —Bill Nye

This classic exploration of the Goddess through time and throughout the world draws on religious, cultural, and archaeological sources to recreate the Goddess religion that is humanity's heritage. Now, with a new introduction and full-color artwork, this passionate and important text shows even more clearly that the religion of the Goddess—which is tied to the cycles of women's bodies, the seasons, the phases of the moon, and the fertility of the earth—was the original religion of all humanity.

Two pioneers of space exploration, Robert Esnault-Pelterie and Ary Sternfeld, introduced the words 'astronautics' and 'cosmonautics,' respectively, into the scientific language. The origin of the term 'astronautics' is well documented. In contrast, the history of the word 'cosmonautics' remains poorly known. Ary Sternfeld is also largely forgotten. The fiftieth anniversary of the breakthrough to space, celebrated in 2007, makes it especially appropriate to remember those visionaries who paved the way to cosmos. The book tells the stories of 'astronautics' and 'cosmonautics' and describes a most unusual life journey of Ary Sternfeld

Bhakti, a term ubiquitous in the religious life of South Asia, has meanings that shift dramatically according to context and sentiment. Sometimes translated as "personal devotion," bhakti nonetheless implies and fosters public interaction. It is often associated with the marginalized voices of women and lower castes, yet it has also played a role in perpetuating injustice. Barriers have been torn down in the name of bhakti, while others have been built simultaneously. Bhakti and Power provides an accessible entry into key debates around issues such as these, presenting voices and vignettes from the sixth century to the present and from many parts of India's cultural landscape. Written by a wide range of engaged scholars, this volume showcases one of the most influential concepts in Indian history—still a major force in the present day.

During the period of Aztec expansion and empire (ca. 1325–1525), scribes of high social standing used a pictographic writing system to paint hundreds of manuscripts detailing myriad aspects of life, including historical, calendric, and religious information. Following the Spanish conquest, native and mestizo tlacuiloque (artist-scribes) of the sixteenth century continued to use pre-Hispanic pictorial writing systems to record information about native culture. Three of these manuscripts—Codex Boturini, Codex Azcatitlan, and Codex Aubin—document the origin and migration of the Mexica people, one of several indigenous groups often collectively referred to as "Aztec." In *Portraying the Aztec Past*, Angela Herren Rajagopalan offers a thorough study of these closely linked manuscripts, articulating their narrative and formal connections and examining differences in format, style, and communicative strategies. Through analyses that focus on the materials, stylistic traits, facture, and narrative qualities of the codices, she places these annals in their historical and social contexts. Her work adds to our understanding of the production and function of these manuscripts and explores how Mexica identity is presented and framed after the conquest.

An exploration of life in the early medieval West, using pigs as a lens to investigate agriculture, ecology, economy, and philosophy In the early medieval West, from North Africa to the British Isles, pigs were a crucial part of agriculture and culture. In this fascinating book, Jamie Kreiner examines how this ubiquitous species was integrated into early medieval ecologies and transformed the way that people thought about the world around them. In this world, even the smallest things could have far-reaching consequences. Kreiner tracks the interlocking relationships between pigs and humans by drawing on textual and visual evidence, bioarchaeology and settlement archaeology, and mammal biology. She shows how early medieval communities bent their own lives in order to accommodate these tricky animals—and how in the process they reconfigured their agrarian regimes, their fiscal policies, and their very identities. In the end, even the pig's own identity was transformed: at the close of the early Middle Ages, it had become a riveting metaphor for Christianity itself.

*Cosmic Fusion* was originally written between January 1973 and September 1982, a mammoth 300,000-word epic novel of "science fiction, sex, and death." Unpublished due to an editorial change at the original publishing company, Eklund has now revised it for its first publication. As he writes in his introduction: "Cosmic Fusion was intended to be the book that broke me out of [science fiction's midlist]. It was the Big Ambitious Novel I was going to write because I wanted to write it..." So here it is, a vintage tale written by Gordon Eklund at the peak of his power as a writer, never before seen...until today!

800x600Normal0falsefalsefalseEN-USX-NONEX-NONEMicrosoftInternetExplorer4 In 1947 America's premier philosopher, educator, and public intellectual John Dewey purportedly lost his last manuscript on modern philosophy in the back of a taxicab. Now, sixty-five years later, Dewey's fresh and unpretentious take on the history and theory of knowledge is finally available. Editor Phillip Deen has taken on the task of editing Dewey's unfinished work, carefully compiling the fragments and multiple drafts of each chapter that he discovered in the folders of the Dewey Papers at the

Special Collections Research Center at Southern Illinois University Carbondale. He has used Dewey's last known outline for the manuscript, aiming to create a finished product that faithfully represents Dewey's original intent. An introduction and editor's notes by Deen and a foreword by Larry A. Hickman, director of the Center for Dewey Studies, frame this previously lost work. In *Unmodern Philosophy and Modern Philosophy*, Dewey argues that modern philosophy is anything but; instead, it retains the baggage of outdated and misguided philosophical traditions and dualisms carried forward from Greek and medieval traditions. Drawing on cultural anthropology, Dewey moves past the philosophical themes of the past, instead proposing a functional model of humanity as emotional, inquiring, purposive organisms embedded in a natural and cultural environment. Dewey begins by tracing the problematic history of philosophy, demonstrating how, from the time of the Greeks to the Empiricists and Rationalists, the subject has been mired in the search for immutable absolutes outside human experience and has relied on dualisms between mind and body, theory and practice, and the material and the ideal, ultimately dividing humanity from nature. The result, he posits, is the epistemological problem of how it is possible to have knowledge at all. In the second half of the volume, Dewey roots philosophy in the conflicting beliefs and cultural tensions of the human condition, maintaining that these issues are much more pertinent to philosophy and knowledge than the sharp dichotomies of the past and abstract questions of the body and mind. Ultimately, Dewey argues that the mind is not separate from the world, criticizes the denigration of practice in the name of theory, addresses the dualism between matter and ideals, and questions why the human and the natural were ever separated in

philosophy. The result is a deeper understanding of the relationship among the scientific, the moral, and the aesthetic. More than just historically significant in its rediscovery, *Unmodern Philosophy and Modern Philosophy* provides an intriguing critique of the history of modern thought and a positive account of John Dewey's naturalized theory of knowing. This volume marks a significant contribution to the history of American thought and finally resolves one of the mysteries of pragmatic philosophy.

When famine emigrant Patrick Gallagher, secures passage aboard a transatlantic coffin ship from County Cork, Ireland, to the Grosse Île Quarantine Station, Canada, he finds himself prey to a very different sort of hunger. Meanwhile, Angèle Paris D'Arcantel, a Vodou priestess, flees slavery and impending Civil War in New Orleans. She rides the Underground Railroad north along the Mississippi River to an abandoned lighthouse forsaken in the remote Adirondack wilderness at the brink of a vast, cursed forest and the harrowing bluffs of Lake Champlain. *We, The Wanted* is a fully illustrated novel charting the unverified and unverifiable mythologies of seemingly disparate folklores: Irish, Haitian, and Native American, that converge beneath the beacon of the Split Rock Lighthouse as a way of exploring the contemporary phenomena of disenchantment. Shining a light upon the mysterious and tragic history of the American Northeast and across the tortured generations who weathered its storm, *We, The Wanted* is a gothic tale of grim isolation, the consequences of (dis)belief, and the monsters that continue to lurk beyond the pale of civilization hoping to lure us into their darkness.
