Wonder Woman, Amazon Princess; Asterix, indefatigable Gaul; Ozymandias, like Alexander looking for new worlds to conquer. Comics use classical sources, narrative patterns, and references to enrich their imaginative worlds and deepen the stories they present. Son of Classics and Comics explore that rich interaction. This volume presents thirteen original studies of representations of the ancient world in the medium of comics. Building on the foundation established by their groundbreaking *Classics and Comics* (OUP, 2011), Kovacs and Marshall have gathered a wide range of studies with a new, global perspective. Chapters are helpfully grouped to facilitate classroom use, with sections on receptions of Homer, on manga, on Asterix, and on the sense of a 'classic' in the modern world. All Greek and Latin are translated. Lavishly illustrated, the volume widens the range of available studies on the reception of the Greek and Roman worlds in comics significantly, and deepens our understanding of comics as a literary medium. *Son of Classics and Comics* will appeal to students and scholars of classical reception as well as comics fans.

Since the nineteenth century, children's literature has been adapted for both the stage and the screen. As the twentieth century progressed, children's books provided the material for an increasing range of new media, from radio to computer games, from television to cinema blockbuster. Although such adaptations are now recognised as a significant part of the culture of childhood and popular culture in general, little has been written about the range of products and experiences that they generate. This book brings together writers whose work offers contrasting perspectives on the process of adaptation and the varying transformations - social, historical and ideological - that take place when a text moves from the page to another medium. Linking all these contributions is an interest in the changing definition of children's literature and its target audience within an increasingly media-rich society.
