This is the most comprehensive and current introduct... Phonology in Generative Grammar by Michael J. Kenstowicz Generative phonology is a branch of generative linguistics that determines the underlying set of rules governing the pronunciation of words in a person's native language. In general, generative linguistics refers to the theory that all human language is generated from linguistic structures that are hard-wired into the brain at birth. As a person acquires his or her native language, the structures that apply to that particular language are activated. What Is Generative Phonology? (with pictures) phonology and generative syntax". GP is an approach of generative linguistics whose aim is to establish a set of rules, principles or constraints efficient to produce the surface phonetic forms of... Phonology is a branch of linguistics that studies how languages or dialects systematically organize their sounds (or signs, in sign languages). The term also refers to the sound system of any particular language variety. At one time, the study of phonology only related to the study of the systems of phonemes in spoken languages. Phonology - Wikipedia Definition of Generative Grammar . Grammar refers to the set of rules that structure a language, including syntax (the arrangement of words to form phrases and sentences) and morphology (the study of words and how they are formed).
