Fighting Corruption

CALLUM SIENA

Islamic Fintech Springer Nature

The implementation of new technologies is expected to boost the development of Islamic Finance by increasing accessibility to banking and other financial services in Islamic communities and democratizing access to investment opportunities. At the same time, new technologies will increase financing opportunities and facilitate asset management for Sharia-compliant businesses. This collection of essays from selected experts in the field comprise some of the most topical issues on Islamic Fintech, combining a business focus with legal insights. The book takes as a point of departure the role that Islamic Fintech can play in promoting sustainability. The social vision of welfare improvement and justice is already embedded in Sharia's economic rules, which makes Islamic Finance particularly well suited to bridge the gap between sustainability and funding. Although it is not without challenges for the industry, technology will help unleash its potential. With a holistic approach to Islamic Fintech, the contributing authors address the application of new technologies to Islamic Finance, including robo-advisory, crowdfunding and digital ledger technology (both in the issuance of bitcoin and the registration of securities in tokenized form) and in certain sectors such as takaful (takaful-tech) and health (e-health). Finally, they explore the challenges posed by anti-money laundering ('AML') in the specific realm

of Islamic Fintech. The book combines theoretical analysis with a practical focus, both through case studies and directly through the experiences of leading entrepreneurs. In addition, it provides insights on legal and regulatory aspects, which are key in a field that is still in its infancy and needs support from lawmakers and regulators. It is, thus, a reference for academics, legal practitioners, policymakers, entrepreneurs and the Islamic Finance community.

Akta Perikanan 1985 (Akta 317) Dan Peraturan-peraturan National Academies Press

Provides detailed annual statistics on population, labour force, employment and unemployment, broken down by gender, employment status and sector of activity. It also contains participation and unemployment rates.

Tourism in Emerging Economies

OECD Publishing

The United States is the largest investor abroad and the largest recipient of direct investment in the world. For some Americans, the national gains attributed to investing overseas are offset by such perceived losses as displaced U.S. workers and lower wages. Even more striking is the fact that the share of investment going to developing countries has fallen in recent years. Most economists conclude that direct investment abroad does not lead to fewer jobs or lower incomes overall for Americans and that the majority of jobs lost among U.S. manufacturing firms over the past decade reflect a broad restructuring of U.S. manufacturing industries. This book explores the trends and current issues of Direct Investment Abroad.

The Asia-Pacific UUM Press

There is increasing pressure on the forestry industry to adopt sustainable practices, but a lack of knowledge about how to facilitate this, and how to measure sustainability. This book reviews current thinking about scientifically based indicators, and sustainable management of natural forests and plantations. Information is applicable to boreal, temperate and tropical biomes. The contents have been developed from papers presented at a IUFRO conference held in Australia, in order to develop a state-of-the-art report on this subject.

Planning of Aquaculture Development

Springer Nature

Geodesy is the science of accurately measuring and understanding three fundamental properties of Earth: its geometric shape, its orientation in space, and its gravity field, as well as the changes of these properties with time. Over the past half century, the United States, in cooperation with international partners, has led the development of geodetic techniques and instrumentation. Geodetic observing systems provide a significant benefit to society in a wide array of military, research, civil, and commercial areas, including sea level change monitoring, autonomous navigation, tighter low flying routes for strategic aircraft, precision agriculture, civil surveying, earthquake monitoring, forest structural mapping and biomass estimation, and improved floodplain mapping.

Recognizing the growing reliance of a wide range of scientific and societal endeavors on infrastructure for precise geodesy, and recognizing geodetic infrastructure as a shared national resource, this book provides an independent assessment of the benefits

provided by geodetic observations and networks, as well as a plan for the future development and support of the infrastructure needed to meet the demand for increasingly greater precision. Precise Geodetic Infrastructure makes a series of focused recommendations for upgrading and improving specific elements of the infrastructure, for enhancing the role of the United States in international geodetic services, for evaluating the requirements for a geodetic workforce for the coming decades, and for providing national coordination and advocacy for the various agencies and organizations that contribute to the geodetic infrastructure.

Fish Diseases and Disorders: Non-infectious disorders

Booksurge Publishing

This second edition of State of Implementation of the United Nations Convention against Corruption: Criminalization, Law Enforcement and International Cooperation, which was launched during the 7th session of the Conference of the States Parties (Vienna, 6-10 November 2017). The study is based on the findings and results emanating from the first cycle reviews of the implementation of the Convention by 156 States parties (2010-2015). It contains a comprehensive analysis of the implementation of chapters III (Criminalization and law enforcement) and IV (International cooperation) of the Convention. More specifically, the study: (a) identifies and describes trends and patterns in the implementation of the above-mentioned chapters, focusing on systematic or, where possible, regional commonalities and variations; (b) highlights successes and good practices on the one hand, and challenges in implementation on the other; (c)

provides an overview of the emerging understanding of the Convention and differences in the reviews, where they have been encountered.

Updated January 2019. This book is a complete guide to the design, installation, testing and operation of fiber optic networks. It was written with the assistance of many experienced Fiber Optic Association (FOA) instructors in fiber optics as a reference book for classes aimed at FOA CFOT certification as well as a basic reference for anyone working in the field of fiber optics. This book offers expansive coverage on the components and processes of fiber optics as used in all applications and installation practices. A complete curriculum for teaching fiber optics using this book as a text is available from FOA.

Direct Investment Abroad Food & Agriculture Org.

Bringing the major current insights in implementation research and theory together, *Public Policy, Implementation and Governance* reviews the literature on public policy implementation, relating it to contemporary developments in thinking about governance. The text stresses the continuing importance of a focus upon implementation processes and explores its central relevance to the practice of public administration. In light of the changing nature of governance, Hill and Hupe suggest strategies for both future research on and management of public policy implementation. Their basic approach is two-fold: firstly, to understand the process of implementation and secondly, to address how one might control and affect this process. Re-exploring the state of the art of the study of implementation as a sub-discipline of

political science and public administration, this book will be essential reading for students and researchers in public policy, social policy, public management, public administration and governance. 'This is an excellent and much needed book. Hill and Hupe have provided a well written and highly accessible account of the development of implementation studies which will be immensely valuable to everyone concerned with understanding implementation in modern policy making.' - Professor Wayne Parsons, University of London

PRINSIP-PRINSIP

KEBIDANGUSAHAAN SUMBER ASLI (Penerbit UMK) Routledge

This book describes initiatives and concrete examples on sustainable food production worldwide. In the current world scenario, where nations all over the world are struggling to accomplish the United Nations Sustainable Development Goals and to ensure sustainable patterns for all, this book provides a contribution towards a more comprehensive and interdisciplinary understanding of the cross-cutting issues related to Sustainable Agriculture and Food Security. This interdisciplinary book supports the efforts to engage a commitment from all fields of science, to work together to provide knowledge that could help to address SDG2 (No hunger) and lead to the promotion of quality of life, by means of a more sustainable food production, and improved food security. This book is expected to fill the gap of publications in this field. It gives a special emphasis to a state-of-the-art descriptions of approaches, methods, initiatives and projects from universities, stakeholders, organizations and civil society across the world, regarding cross-cutting issues in sustainable food

production. It includes examples of policies and practices case studies, examples of projects, institutional policies, innovative methods and tools and research outputs, which highlight the interdependence between sustainable agriculture and food security issues. It is expected that the “Sustainable Agriculture and Food Security” will make the many benefits of sustainable food production clearer and, inter alia, lead to an increase in the emphasis provided to this central theme.

Implementing Public Policy Routledge
Who really creates wealth in our world? And how do we decide the value of what they do? At the heart of today's financial and economic crisis is a problem hiding in plain sight. In modern capitalism, value-extraction - the siphoning off of profits, from shareholders' dividends to bankers' bonuses - is rewarded more highly than value-creation: the productive process that drives a healthy economy and society. We misidentify takers as makers, and have lost sight of what value really means. Once a central plank of economic thought, this concept of value - what it is, why it matters to us - is simply no longer discussed. Yet, argues Mariana Mazzucato in this penetrating and passionate new book, if we are to reform capitalism - to radically transform an increasingly sick system rather than continue feeding it - we urgently need to rethink where wealth comes from. Who is creating it, who is extracting it, and who is destroying it? Answers to these questions are key if we want to replace the current parasitic system with a type of capitalism that is more sustainable, more symbiotic: that works for us all. The Value of Everything will reignite a long-needed debate about the kind of world we really want to live in.

Proceedings of the 3rd International Halal Conference (INHAC 2016) Food & Agriculture Organization of the UN (FAO)

Citizenship Rules 1964 Career Examination

This book bridges the gap between the vital issues of the tourism industry, practices and destinations, discussing various topics from Asian and African perspectives. Each chapter presents extensive research on tourism development and tourism education, people's work and travel experiences, as well as broader philosophies concerning the global tourism industry's practices and operations. In the context of Sustainable Development Goals (SDGs) 8, 12 and 14, the book highlights the potential of tourism to contribute to economic growth, social inclusion and environmental preservation. It discusses crucial issues confronting the travel and tourism industry, presenting achievable outlines and strategy plans, and evaluating general theories, practices, and applications of social, economic and environmental aspects of management structure to maximize the cultural, social and ecological diversity of destinations and enhance the tourism experience. Providing a comprehensive guide to tourism and its related disciplines, it offers students, professors, entrepreneurs, and travel and tourism organizations insights into the trends, practices. Further, it features case studies ranging from historical and contemporary tourism to forecasts for future tourism.

The global status of seaweed production, trade and utilization UN

This book contains selected papers which were presented at the 3rd International Halal Conference (INHAC 2016), organized by the Academy of Contemporary Islamic Studies (ACIS), Universiti Teknologi MARA (UiTM) Shah Alam, Malaysia. It addresses halal-related issues that are applicable to various industries and explores a variety of contemporary and emerging issues. Highlighting findings from both scientific and social research studies, it enhances the discussion on the halal industry (both in Malaysia and at the international level), and serves as an invitation to engage in more advanced research on the global halal industry.

Raja Muhammad Alias Maritime Institute of Malaysia (MIMA)

Buku ini menilai kesan pembangunan terhadap komuniti yang merangkumi peluang, isu dan masalah yang dihadapi oleh komuniti terpilih. Antara isu yang mendapat perhatian ialah pembangunan komuniti, praktis kerja sosial dengan komuniti, pemerksaan komuniti dan isu-isu semasa yang melibatkan komuniti. Buku yang membincangkan komuniti sebelum ini kebanyakannya hanya menumpukan isu pembangunan yang dijalankan terhadap komuniti itu sahaja. Namun demikian, buku ini lebih memberi tumpuan kepada aspek sumbangan bidang kerja sosial terhadap pembangunan komuniti. Golongan sasaran yang dikenal pasti juga merupakan antara tujuhan kelompok sasaran dalam bidang kerja sosial yang merangkumi kelompok minoriti, remaja, keluarga, Orang Kurang Upaya (OKU), pelarian dan orang asli. Dalam masa yang sama, buku ini menekankan program komuniti yang boleh dijalankan dalam komuniti itu sendiri seperti Rukun

Tetangga, projek libat sama, pendekatan kepelbagaian budaya dan program-program pemerksaan terhadap remaja, keluarga dan OKU. Buku ini diharap dapat memperkaya ilmu dalam bidang sains sosial yang merangkumi bidang antropologi, sosiologi, kerja sosial, polisi dan pembangunan serta dapat menambah bahan rujukan kepada para pengkaji komuniti, pensyarah, pelajar institusi pengajian tinggi, pihak badan bukan kerajaan (NGO), pengamal kerja sosial dan pembuat polisi.

MIMA Bulletin (Volume 30 2022)

Malaysian Branch of Royal Asiatic Society

This is an update of the global seaweed market: production figures from culture and capture, the size of the international market for seaweed and its commercially important issues, the leading countries by region, developments in processing and utilization technology, and innovations in the industry, as well as the challenges and outlook for the industry. According to the report, the Asia and the Pacific region is the largest seaweed market, followed by Europe and the Americas. Moreover, in 2015, total global seaweed production was 30.4 million tonnes, 29.4 million of which originated from the aquaculture sector.

Dental Management of the Medically Compromised Patient Springer

Buku ini ditulis dalam konteks yang relevan dengan sumber asli sahaja. Secara umum, buku ini bukanlah buku keusahawanan, tetapi beberapa aspek tentang keusahawanan dibincangkan secara umum. Ia ditulis untuk menjadi bacaan separa ilmiah yang bertujuan untuk mencetuskan idea pembaca dalam pembangunan kebidangusahaan berasaskan sumber asli. Perbincangan di dalam buku tidak begitu mendalam dan

bersifat umum. Fakta-fakta berat berserta statistik sengaja diketepikan supaya ia tidak mengalih tumpuan pembaca kepada gagasan utama, iaitu untuk menjayakan agenda kebidangusahaan sumber asli. Aspek-aspek lain seperti perundangan dan sosial juga tidak dibincangkan kerana ia bukan tumpuan tema buku ini.

Sustainable Agriculture and Food Security UMK PRESS

This book follows on from the first volume, on protozoan and metazoan infections, of a three-volume series. It focuses largely on finfish and considers non-infectious disorder of development, growth and physiology of wild and captive species. Various sections address topics such as tumourigenesis, stress physiology and the effects of stressors on particular processes, and the effect of environmental factors (including toxic substances) on fish health. The economic implications of non-infectious disorders in intensive aquaculture are of particular importance, and a chapter is devoted specifically to this. The final chapter describes evaluation methods for the assessment of disorders at the individual, population and community level. The book is indispensable for zoologists, veterinary scientists and those concerned with fisheries and aquaculture.

FOA Reference Guide to Fiber Optics Penguin UK

This book is based on an FAO/NORAD meeting on the strategy for development of aquaculture as an industry and on the author's wide experience with FAO. After introducing the subject and its present organization, attention is given to the basic data required for aquaculture planning, the varying need of small-scale rural aquaculture and large-scale industry. Other chapters cover auxiliary

industries, manpower needs and training, research and information, manpower needs and training, research and information, investment decisions and financing, legal rights to sites and stocks, disease control and public health safeguards, conflicts in stocks, disease control and public health safeguards, conflicts in land and water use, pollution and other environmental problems. This useful treatise is amply illustrated to provide guidance in planning aquaculture development individually and nationally.

Social and Economic Dimensions of Carrageenan Seaweed Farming Oxford University Press, USA

Carrageenan is a gelling agent extracted from red seaweeds and it has multiple applications in the food processing and other industries. Increasing demand for carrageenan has led to rapid expansion of carrageenan seaweed (primarily *Kappaphycus* and *Eucheuma*) farming in tropical areas. This expansion is expected to continue, but many issues need to be addressed to enable the sector to develop its full potential in contributing towards sustainable livelihoods, human development and social well-being. Including six country case studies and a global synthesis, this document provides a comprehensive and balanced assessment of the economic, social and governance dimensions of carrageenan seaweed farming. Information and insights provided by this document should facilitate evidence-based decision-makings in both the public and private sectors.

Labour Force Statistics 1999 Tournesol Conseils

Special focus: Effects of the Anglo-Dutch Treaty of 1824 on Maritime Trade Around the Straits of Malacca and

Nearby Region Description: This article is written with an aim to review and study the British strategies used during the colonisation of Malaya, which led to successful signing of several treaties that greatly benefitted the British East India Company (EIC). The Anglo-Dutch Treaty of 1824 was among the treaties that had a huge impact not only on the British, but also the people of Malaysia and Singapore, where the benefits are still enjoyed to this day. In two years (2024), it will be the 200th anniversary of the treaty signed between the Dutch and British. After nearly two centuries, the British colonisation strategies in Singapore through the Anglo-Dutch Treaty of 1824 were found to have truly helped the development of the country, the Straits of Malacca, as well as the surrounding regions. Although there were a myriad of studies and writings that claimed that the British colonisation was intended for the expansion of

ideological policies, as well as ensuring the economic interests of the British only, in reality, the countries involved were able to reap the benefits as an effect of the colonisation. Content: - Editorial - From the Bridge - Special Focus: Effects of the Anglo-Dutch Treaty of 1824 on Maritime Trade Around the Straits of Malacca and Nearby Region (Sabirin Ja'afar) - Banning of Trawl Nets in Zone B: Status and Way Forward (Nurfatin Wahida Puspa, Nurul Ashikin Zakaria & Puteri Arlis Tsharina Jazlan 'Arif) - ICPC's Best Practices: A Brief Look into Submarine Cable Protection Law in Malaysia (Wahab Jumrah) - Way Forward for Malaysia Shipping Carbon Reporting: Fuel Oil Consumption Data Collection and Reporting for Ship of Less Than 5,000 Gross Tonnage (Egbert Adolf Naintin & Mohd Tarmizi Osman) - Special Interview: Dato' Cheah Kong Wai: Longest Serving MIMA DG Scores Many Firsts During His Stay (Badrolhisham Bidin)
