An Analysis of Longevity UBS Publishers' Distributors
 Many a sciences have attempted to predict the life span of a
 human being, but have conceded that an accurate assessment of
 life span is not only a difficult proposition, but also arguably, is
 impossible. This has been a dark area in the field of astrology as
 well. Is human life subject to the whims of Shiva, or is there a
 measurable method to His will? Everyday, we come across cases
 that are baffling, like the case of twins where the basic birth chart
 does not change much except by a few degrees of ascendant, but
 one twin only lives for a short period, while the second lives on to
 a ripe old age. How can one foresee this? The book provides a
 simple astrological method to assess the life span of human life
 and predict the longevity block of a subject in terms of – short,
 medium or a full life. This is equally applicable to the charts of
 twins. The timing of demise is then calculated by using the
 Nirayana Shoola Dasha.

Library of Congress Catalog Pustak Mahal
 First ever book on Advanced Predictive Techniques of
 Ashtakavarga (Vedic Astrology) which leads the student step-by-
 step to the application of Ashtakavarga for everyday predictions.
 Reveals the decisive role of Ashtakavarga in analysing the
 dreaded period of sadhe-sati and much more. Vinay Aditya is the
 Associate editor of the 'Vedic Astrology' magazine, and author of
 a book on Ashtakavarga. Vinay Aditya holds a degree in
 engineering besides Jyotish Visharad from Bharatiya Vidya

Bhawan, New Delhi. He has been teaching astrology for nearly 8
 years, now with the ICAS. He has also been the faculty member
 at the ACVA conferences. He has given consultations to over
 thousand persons in Germany. Dots of Destiny describes
 advanced predictive techniques in a very lucid manner. Vinay
 Aditya, an engineer by education, opted for the highly evolved
 science of Vedic Astrology in India. Interestingly, also came
 across many articles by by Aditya, Vinay in 'Vedic Astrology'
 magazine. Great reading to all interested in Vedic Astrology and
 ancient predictive techniques of India. Basic knowledge of Vedic
 Astrology is a prerequisite to understand and enjoy reading Dots
 of Destiny. The entire edifice of astrology rests on the
 interpersonal play of planets in the backdrop of zodiacal signs.
 Ashtakavarga is the only method which puts this interplay into a
 competent system. A planet will do a job according to its
 strength. The other methods Shadbala (Parashari), Panchavargiya
 bala (Tajik), or Grahabala (Jaimini), have their own specific value,
 but they all seem to miss a very important point. And that is, that
 a planet does not operate in a vacuum, the other six planets are
 always somewhere around. Therefore, a planet will do a job only
 in as much measure as the other planets would allow it to do. The
 other planets either support its assignment or oppose it. In a
 nutshell, the native, at all times, experiences the combined
 results of all the planets. It is only a manner of speech amongst
 astrologers that a particular planet is causing trouble or
 otherwise because talking of all the seven planets in the same
 breath is difficult. It is for this reason that the Ashtakavarga
 system, when we say that Jupiter is powerful because it has 7
 Bhinnashtaka bindus, or 42 Sarvashtaka bindus in a sign, what

we mean is, that all the planets have gathered together to invest into Jupiter this power. In no other branch of astrology this truly democratic approach is visible so clearly. If there is any sanctity or rationale of Ashtakavarga in the birth chart, it ought to be explored in other charts too, since in all the charts, it is always the interplay of planets with each other that causes events. Whether the results of this exploration are acceptable to the astrologers, by and large, will depend on successful predictions made by the explorers using Ashtakavarga techniques. If and when a sufficient statistical proof is available, then these techniques may be inducted into astrological dicta of the present times. Ashtakavarga seems to be progressively getting out of bounds for those orthodox astrologers who, before they accept an astrological idea, keep propping up the refrain, "Where is it written in the classics?"

The Jaimini system within Vedic astrology is a brilliant and unique form of birth chart analysis and prediction in which events oftentimes can be seen in a very simple and elegant way. This book clearly and systematically explains all the essential interpretive concepts of Jaimini and illustrates these profusely using the birth charts of well-known personalities. Included is an original translation and commentary of that portion of the Upadesha Sutras wherein Sage Jaimini outlines these foundational principles. The author shares the methods taught to him by the legendary Indian astrologer, K.N. Rao, for predicting such events as career rise, marriage, and child birth. A must read

for those interested in the Jaimini system!

Within the vast ocean of knowledge that is the astrology of ancient India, the ashtakavarga system occupies a unique place for evaluating both the static potentials of a birth chart and for dynamically qualifying the effects of transits. In fact, there is saying in the tradition that to evaluate the effects of transits of planets without ashtakavarga is a criminal act. Ashtakavarga means "Eight-Fold Division" and refers to how eight factors distribute benefic points to other signs/houses from their natal position. This distribution results in a summary point total for each sign/house and an individual point total for each planet for every sign/house. The use of these totals for interpretation has many applications and can shed light on the strengths and weakness of a birth chart that may otherwise be hidden.

Analysis of Longevity - An Astrologer can only give an Indication of what promise the future holds. Only Brahma, the creator, can say with certainty what will definitely happen. This applies most appropriately to Longevity determination. Matters like longevity cannot be decided by us mortals. They are in the hands of the supreme power and an Astrologer who wishes indulge in longevity determination, needs help of this super power to make the correct judgement. Ayu Nirnay is a very serious and a deep subject $\frac{1}{4}xw < + o xEHkhj fo" k; \frac{1}{2}$ and it involves much more than just the mathematical calculation. Even after checking longevity by many methods, the Astrologer is almost forbidden to disclose the person's death to him. At the most he can give a very subtle hint. There are about 32 methods of calculation of longevity, but there is no one method which gives perfect result. After calculating it by a number of methods, if similar Ayu is found, then it can be relied upon, to a certain extent. There are many

stories in our religion like those of Savitri and Satyavan and Markandeya Rishi, in which people whose life span has come to an end, have been granted more life by God himself. This shows that the length of life can be increased by Gods blessings. Length of life can also be increased or decreased by the persons own karmas in this life. People who lead a good regulated life from childhood, who follow good moral conduct, who eat less, and who respect god and the learned men, live up to their mathematically estimated life span or even longer. The people who do just the opposite have an untimely end. This shows that a person can reduce his life-span by his own kukarmas. Till a child is of twelve years of age his ayu nirnay should not be done. The first four years of his life and governed by the poorva karmas of his mother, the next four years are governed by the karmas of his father and the next four years are governed by his own karmas. Till twelve years, even prediction of his horoscope should not be done, because whatever the horoscope shows, can get altered because of these super imposing factors. For this reason till that age, every child should be protected through propitiation of planets, medical help and proper care. Only after he has crossed this age, his Ayu Nirnay should be done. This book contains all methods of determination of longevity of a native. Calculation of the longevity of a native is not an easy task. All expert astrologers believe that before interpreting a horoscope it is essential to determine the longevity of native. There are different methods of determining longevity but none of them can be termed as very accurate so it shall be better to follow various methods. In the field of astrology and especially in determining the longevity of a native the role of intuition is most important.

Astrologer can develop intuition by continuous meditation and other spiritual practices. One should remember it always that nobody can control life and death. There is only one method of giving shape to our future and that is to bring improvement in our deeds. The summary of our scriptures is embedded in two words- *Punya*(holy/sacred/meritorious action) and *Paap*(sin). Our whole existence revolves around these two words only. It is the proposal of the author to keep it in the background of this book. This book contains all important methods of determination of longevity of a native.

The notion that astrologers can unfold lives and reveal what waits at the next bend is a thought that comes to all and populist claims have inspired the author to come up with a series of books that will discuss the various aspects in astrology, putting together the research and findings by various groups and the experience gained during his journey. The purpose of the encyclopedia is an attempt to put a clear understanding of the process of astrology, taking into account the first basic principles and dealing with different topics. Among various Vargas, the relative importance of Navamsha is universally acclaimed. Astrologers consider it to be just next to birth chart or equal to birth chart or even better than the birth chart. Almost all astrologers use Navamsha and birth chart together to assess strengths of various houses and planets before giving any opinion. In Vedic astrology, Navamsha occupies an outstanding position and draws one's attention for deeper understanding/ scrutiny due to its multifarious technique and usage. The additional inputs in the form of scintillating concepts by Jaimini and Nadi system have made the subject more engrossing. The author has tried to incorporate the same in the book. The study of a birth chart gives only the gross (Sthool) indications of characteristics of various houses and planets; while Navamsha offers their detailed (Sookshmatar) values. It is so because a Navamsha is basically equal to both in its size and extent to a quarter/ one fourth / pada of a Nakshtra, thereby giving it a stellar role. While a house represents a combined

spectrum of 30 degrees, a Navamsha provides a microscopic view of 3° 20' or 1/ 9 part of a sign only.
