THORNTON PATEL

Virtual Clinical Excursions--pediatrics Elsevier

Completely updated content matches the textbook and provides a comprehensive review of essential pediatric nursing concepts and skills.

Wong's Clinical Manual of Pediatric Nursing Elsevier India

This leading pediatric nursing textbook owes its success to scrupulous accuracy, current research, and a highly readable style. The new edition, packed with full color, many special features, and the most comprehensive package available, maintains the high standards established by previous editions. A new chapter on community-based nursing care of children has been added to address this increasingly important health care arena. The first part of the book on child development and health promotion lays the foundation for understanding later chapters on specific health problems - organized by age groups and body systems. The nursing process is used to format major diseases, disorders, and conditions. Today's students will find the book's appearance highly appealing with superior illustrations and a beautiful full-color design throughout, making key information in the text easy to find. (Includes FREE CD-ROM and MERLIN website

at:www.harcourthealth.com/Mosby/Wong/essentials/) Spanish version of 4th edition also available, ISBN: 84-8086-141-X

Wong's Nursing Care of Infants and Children Elsevier

This innovative workbook/CD-ROM package helps bridge the gap between the classroom and the real world by teaching students about clinical settings and critical thinking before they actually start clinical rotations - making the transition from nursing student to caregiver a smoother process. A guided learning experience, VCE features textbook reading assignments that correspond with the CD-ROM and workbook activities. The workbook acts as a map, guiding students through the CD-ROM as they care for patients in the virtual hospital, making connections between what they experience in the virtual hospital and what they learn in the textbook. Throughout each lesson, students access realistic information resources essential to patient care, resulting in a true-to-life, hands-on learning experience. Promotes active learning as students identify information to collect and process data for evidence-based patient care. Exposes students to realistic information resources - such as the EPR, MAR, and extensive Charts - to prepare them for data management and decision-making on the floor. Improves core computing skills as students access and evaluate the diverse hospital databases. Reinforces the precepts of safe medication administration as students select, prepare, and administer medications in a harm-free environment. Augments knowledge of physical assessment by allowing students to examine and record vital signs, head & neck, chest, back & spine, upper extremities, abdomen, pelvic, and lower extremities. Fully integrates the psychosocial aspect of nursing through nurse-client interaction videos, underscoring the psychosocial component of patient care. Includes over 250 NCLEX® examination-style questions

that offer built-in testing of clinical knowledge. New flash-based technology allows more ease of use, featuring seamless one-click navigation, no plug-ins, and automatic installations. The cases in VCE are all new along with new patient data in the Electronic Patient Record, Patient Charts, KARDEX, and Medication Administration Record. A new medication room simulates what students will encounter in practice or in a real clinical setting. Over 55 embedded medication administration errors force students to think critically about safe medication practices and follow safe medication standards. Students can now sign in for multiple patients as a nurse would in practice. A new Medication Scorecard provides instant feedback on correctly and incorrectly administered medications. A new Examination Report checklist tracks performance on baseline and focused assessments. Students now have the ability to "take a break" - leaving the software at anytime and picking up where they left off without losing any information. New workbook icons for time show approximately how long it will take to complete a particular exercise. Workbook icons for linked activities indicate that a particular exercise is linked to another exercise and cannot be completed independently.

Clinical Companion for Wong's Essentials of Pediatric Nursing Elsevier Health Sciences

Master key concepts and apply them to the practice setting! Binder-Ready Edition: This loose-leaf copy of the full text is a convenient, accessible, and customizable alternative to the bound book. With this binder-ready edition, you can personalize the text to match your unique study needs! Prepare to give pediatric patients the specialized care they deserve with the leading text in pediatric nursing. Written by pediatric experts, Wong's Nursing Care of Infants and Children, 11th Edition takes a unique, easy-to-follow developmental approach to describe the care of children at each age and stage of development. This longtime bestseller provides an evidence-based, clinical perspective that shows how the quality of nursing care can impact quality patient outcomes. Childhood diseases and disorders are organized by age groups and body systems and explained through the nursing process framework. This edition features completely updated and reorganized chapters that present content in a clear, easy-to-understand way. New Quality Indicator boxes paint a bigger picture of hospitals and how they look at quality and safety. A focus on family-centered care emphasizes the role and influence of the family in health and illness with a separate chapter and Family-Centered Care boxes. Emergency Treatment boxes serve as a quick reference in critical situations. Pathophysiology Reviews explain complicated disease processes with illustrated summary boxes. Quality Patient Outcomes are discussed for major childhood diseases and disorders, showing how nursing care directly impacts patient outcomes. Nursing Tips include helpful hints and practical, clinical information. Critical Thinking Case Studies help you test and develop your own analytical skills. Cultural Considerations provide cultural tips from clinical experts. Nursing Care Plans provide models for planning patient care, with rationales explaining why specific nursing interventions have been chosen, and include nursing diagnoses, patient/family goals, nursing interventions/rationales, expected outcomes, and NIC and NOC guidelines. Nursing Care Guidelines offer clear, step-by-step, detailed instructions on performing specific skills or procedures. Translating Evidence into Practice and Applying Evidence to Practice boxes help you apply research to support, guide, and improve the outcomes of nursing care. Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress, and provide guidance for performing procedures in a caring manner. Community and Home Health Considerations boxes focus on wellness information and illness-related topics. Drug Alerts highlight

important drug-related information for safe, appropriate care. Nursing Alerts provides critical information that must be considered in providing care. Research Focus boxes emphasize research with concise reviews of important evidence. NEW! Quality Indicator boxes present a bigger picture of hospitals and how they look at quality and safety, or Pediatric Clinical Quality Measures. EXPANDED! Added emphasis on the impact of genetics and genomics on pediatric nursing care. NEW and UPDATED! New information on Zika virus and Rotavirus keeps you in the know. NEW! New section on Chiari malformation added to neurologic dysfunction chapter. NEW! Self-harm, GLBT, and e-cigarette content added to adolescent problems chapter. UPDATED! Oxygen and carbon dioxide exchange information is now included throughout the text. EXPANDED! Updated accidental poisoning section now includes cleaning solutions and liquid from e-cigarettes. UPDATED! New Impact of Chronic Illness, Disability, or End of Life Care for the Child and Family chapter thoroughly combines two previous chapters. UPDATED! Integumentary dysfunction content now appears as chapter 32. UPDATED! Reorganized chapter on pain provides specific guidelines for pediatric pain assessment and management and focuses on common acute and chronic pain conditions and how to manage them. UPDATED! Human Papillomavirus content significantly updated. EXPANDED and UPDATED! Disorders with behavioral components section significantly expanded. UPDATED! Updated influenza, RSV, and acute lung injury section in respiratory chapter. UPDATED! Childhood cancer survivor section has significant updates.
