In Arabic and Islamic studies, the subject of variance in general and that of textual variation in particular has not been investigated exhaustively so far. In the present book the variation in texts of the "closed transmission" will be studied, focusing on a small corpus of didactic and model poems, with a view to establishing what degree of text stability and change was allowed by the medium manuscript. Categories of variance (relating to work-titles, text, number of verses and their sequence, page-layout, context) and the means of controlling them in the manuscripts of the poems are identified and detailed descriptions of the copies are given. The monograph also includes a presentation of some major traits of the cultural background to the study of Arabic didactic poetry and of its dissemination in which memorization has played a crucial role. The intended readers, editors and other users of manuscripts, are helped to acquaint themselves with the methods employed in the manuscripts to control variation and they are given an overview of the large spectrum of Arabic didactic poetry and of its place in the traditional culture of learning in Islamicate societies.

The non-Newtonian calculi provide a wide variety of mathematical tools for use in science, engineering, and mathematics. They appear to have considerable potential for use as alternatives to the classical calculus of Newton and Leibniz. It may well be that

these calculi can be used to define new concepts, to yield new or simpler laws, or to formulate or solve problems.

Sufism is a religion which emphasizes direct knowledge of the divine within each person, and meditation, music, song, and dance are seen as crucial spiritual strides toward attaining unity with God. Sufi paths of mysticism and devotion, motivated by Islamic ideals, are still chosen by men and women in countries from Morocco to China, and there are nearly one hundred orders around the world, eighty of which are present and thriving in the United States. The Chishti Sufi order has been the most widespread and popular of all Sufi traditions since the twelfth-century. *Sufi Martyrs of Love* offers a critical perspective on Western attitudes towards Islam and Sufism, clarifying its contemporary importance, both in the West and in traditional Sufi homelands. Finally, it provides access to the voices of Sufi authorities, through the translation of texts being offered in English for the first time.

The Accepted Whispers Taylor & Francis

A revised 25th anniversary edition of the classic work on Sufism that Jack Kornfield called, "A heartfelt modern illumination of the Sufi path, filled with the fragrance of the ancients." In Sufism, the mystical branch of Islam, presence is the quality that describes a heart-filled state of mindfulness, an experience of being conscious in the present moment. It is only in this present moment, Sufi teachings reveal, that we can connect with the Divine, and the Divine can live through us. Kabir Helminski is one of the world's most recognized teachers of Sufism. Named one of the "500 Most Influential Muslims" in the world by Georgetown University and the Royal Strategic Studies Center, Helminski and his teachings are touchstones for the growth in interest in Sufism, and his books have been translated around the world. In *Living Presence*, Helminski lays out the basic principles of Sufism, and how these ideas can lead to the experience of presence. In this inspiring work, readers will learn how to cultivate presence in their lives through: * Finding a balance between the outer stimuli of the world and our inner reactions to them * Harnessing faithfulness and gracefulness * Learning about the parallels between ancient spiritual wisdom and modern psychological knowledge * Meditation and contemplation to discover more meaning in daily life With unique clarity, this book describes how presence can be developed to vastly improve our lives.

Drawing on the work of the beloved Sufi poet, Rumi, as well as traditional material and personal experience, this book integrates the ancient wisdom of Sufism with the needs of contemporary life. Completely revised and updated for its 25th anniversary, this edition of *Living Presence* offers a wisdom that is both universal and practical.

Religion and the Making of Nigeria
Ahmadiyya Muslim Jama'at USA

In *Religion and the Making of Nigeria*, Olufemi Vaughan examines how Christian, Muslim, and indigenous religious structures have provided the essential social and ideological frameworks for the construction of contemporary Nigeria. Using a wealth of archival sources and extensive Africanist scholarship, Vaughan traces Nigeria's social, religious, and political history from the early nineteenth century to the present. During the nineteenth century, the historic Sokoto Jihad in today's northern Nigeria and the Christian missionary movement in what is now southwestern Nigeria provided the frameworks for ethno-religious divisions in colonial society. Following Nigeria's independence from Britain in 1960, Christian-Muslim tensions became manifest in regional and religious conflicts over the expansion of sharia, in fierce competition among political elites for state power, and in the rise of Boko Haram. These tensions are not simply conflicts over religious beliefs, ethnicity, and regionalism; they represent structural imbalances founded on the religious divisions forged under colonial rule.

The book gives priority to authors conducting fieldwork in Nigeria and tackles the following issues: the extent to which Boko Haram can be considered the product of deprivation and marginalisation; the relationship of the sect with almajirai, Islamic schools, Sufi brotherhoods, Izala, and Christian churches; the role of security forces and political parties in the radicalisation of the sect; the competing discourses in international and domestic media coverage of the crisis; and the consequences of the militarisation of the conflict for the Nigerian government and the civilian population, Christian and Muslim.
