### **Toyota Gas Pedals** W. W. Norton & Company

This fascinating collection reproduces the most important front pages in the history of the Wisconsin State Journal newspaper, from its first publication under that name on September 30, 1852, to the current "War on Terrorism." See what Wisconsinites first read about Abraham Lincoln's election and assassination, Custer's last stand against the Sioux, the first votes by women, Henry Ford's \$5 daily wage, the Saint Valentine's Day mob massacre in Chicago, the disappearance of Amelia Earhart as she attempted to fly around the world . . . and the wars, elections, crimes, and social revolutions that have defined the past century and a half. Each front page, reproduced from the original, is readable down to the smallest type. In 2002 the Wisconsin State Journal celebrates its Sesquicentennial, marking one hundred and fifty years of service to the people of Madison and the State of Wisconsin. The newspaper had an earlier inception as the Madison Express in 1839, when Madison was a territorial town on the frontier and statehood was still nine years away. Readers will notice the newspaper's appearance has changed nearly as much as have the methods of gathering the news and producing the paper. But readers' fascination with and hunger for the news of each day remain strong.

Terrorists, drug traffickers, mafia members, and corrupt corporate executives have one thing in common: most are conspirators subject to federal prosecution. Federal conspiracy laws rest on the belief that criminal schemes are equally or more reprehensible than are the substantive offenses to which they are devoted. The essence of conspiracy is an agreement of two or more persons to engage in some form of prohibited misconduct. The crime is complete upon agreement, although some statutes require prosecutors to show that at least one of the conspirators has taken some concrete steps or committed some overt act in furtherance of the scheme. There are dozens of federal

conspiracy statutes. This book examines conspiratorial crimes and related federal criminal law with a focus on the federal Racketeer Influenced and Corrupt Organization (RICO) provision of the Organized Crime Control Act of 1970; money laundering and the 18 U.S.C. 1956 statute; mail and wire fraud; and an overview of federal criminal law.

The World of Ruth Draper: A Portrait of an Actress captures the life of the internationally acclaimed monologist and the familial, social, and theatrical worlds in which she lived from the late nineteenth century to the mid-1950s. Dorothy Warren draws on correspondence with family and friends, theatrical reviews, personal interviews, and her own long relationship with Ruth Draper in crafting this biography. Born in New York City in 1884, Ruth Draper began giving monologues at private parties and schools at the age of twenty-six and made her professional debut in 1920 at London's AEolian Hall. In charting the course of Draper's impressive career, Warren follows her performances on stages around the world, including private recitals for Sarah Bernhardt, Eleonora Duse, and the royal families of Britain, Spain, and Belgium. Warren also devotes a significant discussion to Draper's relationship with Lauro de Bosis, the Italian poet and political activist whose 1931 disappearance while dropping anti-Fascist pamphlets over Rome remains unexplained. Draper's long stage reign ended when she died in her sleep following a performance in New York City in December 1956. Ruth Draper's specialty was the monologue, a dramatic composition for a single performer evoking other characters upon the stage. She had in her repertoire sixty dramatic sketches featuring fifty-two

characters whom she performed, as well as 316 others whom she evoked during the course of the sketches. Some of her better-known sketches were Opening the Bazaar, Vive la France -- 1940, The Scottish Immigrant, The Actress, and In County Kerry. Draper's unique quality was her ability to project an illusion, to evoke upon the stage the characters with whom she conversed and interacted. Lynn Fontanne said of this faculty of Draper's: "There is the flavor of parlor magic in it -- something of conjuring". Bernard Levin, writing in the Times of London on April 4, 1988, recalls Draper's talent for evocation as "truly hallucinating" and adds, "Before the curtain came down, real hallucination had set in and we could see on the stage a crowd of people who were not there!" Eleonora Duse declared, "Ruth Draper is theater". The World of Ruth Draper features twenty-three illustrations.

This project contains a look into the manufacturing company of Ford Motor Company. Research was done about how the company runs business, both globally and domestically. In this report, the company's mission, goals, strategies, product and service portfolios, market share and profit performance, technology and employment information are outlined. Key successes and weakness failures are also discussed in detail. Information about Ford's use of computer systems and an information model for the company is also included. The information model displays Ford's Work System, showing which components of the Work

Organization, Control System, Industrial Relations and Human Resources Practices Ford implements. The Business Organization, with Ford's Business Strategy and Enterprise Organization is also part of the model. At the end of the report, self-evaluations by team members and references can be found. Ford Motor Company is currently trying to increase its global market share in automobile sales while facing slumping market share numbers in the United States. This report examines the Ford company characteristics and how the company uses information systems in the business climate. To reduce costs and increase knowledge of a region Ford uses small ERP systems that are less expensive and faster to implement than the larger ERP systems. Failure to obtain a larger market share in foreign markets has hurt the company. The proper use of information systems by Ford will increase their ability to maintain a successful business in future years locally and globally.

*A Quest for Remembrance: The Underworld in Classical and Modern literature* brings together a range of arguments exploring connections between the descent into the underworld, also known as katabasis, and various forms of memory. Its chapters investigate the uses of the descent topos both in antiquity and in the reception of classical literature in the nineteenth to twenty-first centuries. In the process, the volume explores how the hero's quest into the underworld engages with the theme of recovering

memories from the past. At the same time, we aim to foreground how the narrative format itself is concerned with forms of commemoration ranging from trans-cultural memory, remembering the literary and intellectual canon, to commemorating important historical events that might otherwise be forgotten. Through highlighting this duality this collection aims to introduce the descent narrative as its own literary genre, a 'memorious genre' related to but distinct from the quest narrative.

Based on his analysis of 400 strategic decisions made by top managers in areas such as products and services, pricing and markets, personnel policy, technology acquisition, and strategic reorganization, Nutt estimates that two-thirds of all decisions are based on failure-prone or questionable tactics. He uses the fifteen monumental decision-making disasters to illustrate the potential consequences of these common tactical errors and traps and then details successful alternative decision-making approaches. *Why Decisions Fail* translates decades of award-winning research into practical terms that managers can use to improve their own decision-making practices.

Americans have grown increasingly restive when dissatisfied with legislation or elected officials between elections. As a result, public interest in and use of the devices created to give voters a greater direct voice in our democracy, referendum, recall, and initiative, have proliferated in recent years. Cronin has thoroughly examined the development of recall petitions, local initiatives, and referenda and interviewed those involved in the recent growth of the direct democracy movement. He finds that there are difficulties with direct democracy devices, yet he concludes that these procedures have been a lasting, and generally a positive, part of the American political landscape. - p. [vii.].

As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, *Lemon-Aid Used Cars and Trucks 2011* shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. *Lemon-Aid* guides are unlike any other car and truck books on the market. Phil Edmonston, Canada's automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, *Lemon-Aid Used Cars and Trucks* is an exposé of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers can't beat! Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches.

This revelatory exploration of Book One of the *Argonautica* rescues Jason from his status as the ineffectual hero of Apollonius' epic poem. James J. Clauss argues that by posing the question,

"Who is the best of the Argonauts?" Apollonius redefines the epic hero and creates, in Jason, a man more realistic and less awesome than his Homeric predecessors, one who is vulnerable, dependent on the help of others, even morally questionable, yet ultimately successful. In bringing Apollonius' "curious and

demanding poem" to life, Clauss illuminates two features of the poet's narrative style: his ubiquitous allusions to the poetry of others, especially Homer, and the carefully balanced structural organization of his episodes. The poet's subtextual interplay is

explored, as is his propensity for underscoring the manipulation of the poetry of others through ring composition.
