Specifically designed as an introduction
to the exciting world of engineering,
ENGINEERING FUNDAMENTALS: AN
INTRODUCTION TO ENGINEERING
encourages students to become
engineers and prepares them with a
solid foundation in the fundamental

principles and physical laws. The book
begins with a discovery of what
engineers do as well as an inside look
into the various areas of specialization.
An explanation on good study habits and
what it takes to succeed is included as
well as an introduction to design and
problem solving, communication, and
ethics. Once this foundation is
established, the book moves on to the
basic physical concepts and laws that
students will encounter regularly. The
framework of this text teaches students
that engineers apply physical and

chemical laws and principles as well as mathematics to design, test, and supervise the production of millions of parts, products, and services that people use every day. By gaining problem solving skills and an understanding of fundamental principles, students are on their way to becoming analytical, detail-oriented, and creative engineers.

Council for Economic Education
Advanced Placement Macroeconomics is

the go-to guide for helping high school teachers to prepare their students for the AP Macroeconomics Exam administered by the College Board. It is designed to provide a basic framework around which you can design an AP Macroeconomics course that best meets the needs of your students. The Teacher Resource Manual provides unit overviews, lesson plan objectives, Teacher Alerts, Bell Ringer activities to jump-start each class, visuals, and answers to the student activities. The lessons include instructional activities that are not in the Student Resource Manual. By dividing the Macroeconomics and Microeconomics Teacher Resource Manuals in two and compartmentalizing various elements such as student activities solutions and sample multiple-

choice question answer keys, the materials provide a more intuitive structure and easier navigation of content.

In a hierarchy, every employee rises to the level of their own incompetence. This simple maxim, defined by this classic book over 40 years ago, has become a beacon of truth in the world of work. From the civil service to multinational companies to hospital management, it explains why things constantly go wrong: promotion up a hierarchy inevitably leads to over-promotion and incompetence. Through barbed anecdotes and wry humour the authors define the problem and show how anyone, whether at the top or bottom of the career ladder, can avoid its pitfalls. Or, indeed, avoid promotion entirely!

A Midsummer Night's Dream Joint Council on Economic Education Presents a multifaceted model of understanding, which is based on the premise that people can demonstrate understanding in a variety of ways.

AP Barrons Educational Series Advanced Placement Classroom: A Midsummer Night's Dream takes students inside Shakespeare's well-loved comedy by providing teachers and students with a detailed overview of the play, along with interesting and challenging activities geared for the advanced language arts student. Students will examine Shakespeare's inventive language by collecting words and phrases to use later in a "Sweet-Talk Challenge," akin to a modern-day poetry slam; discover the history behind the

play by researching and giving presentations on Elizabethan occupations; and recognize the challenge of performance by reenacting scenes. Prufrock's new line of innovative teaching guides for the Advanced Placement classroom is designed to engage students with creative learning activities that ensure Advanced Placement success. The Teaching Success Guide for the Advanced Placement Classroom series helps teachers motivate students above and beyond the norm by introducing investigative, hands-on activities including debates, role-plays, experiments, projects, and more, all based on Advanced Placement and college-level standards for learning. There are no specific rules to prepare for a GD. And no one knows what the topic of GD is going to be. This book includes topics that are likely to be put by the Group Testing Officer before the candidates to gauge their personality and leadership qualities. It will be a good idea to keep yourself abreast with topics from: 1. Current Affairs - Current Affairs is something that you have to be thorough with. Understand the recent

crises affecting the world, latest developmental initiatives, and important national & global events. 2. Historical topics- Have a fair knowledge about the history of India and the world. Having historical information will help you cite examples and make references whenever needed. 3. Sports, Arts & Literature - In these topics, try to have a decent idea about what is popular, who are the leaders in each area, the latest that has happened in these areas. 4. Data crunching - Do familiarize yourself with important data. Throwing in some data if required in your GD will definitely create an impression among the assessors. Speak with a measure of confidence on the given topic; and secure the nod of the evaluator.

Are your students bored in class?

According to research, a majority of American high school students report being bored in class and fewer than 5% claimed that they were rarely bored during a typical day in school. Former journalist and veteran teacher Martha Rush decided this would not do for her Minnesota students. Moving beyond asking open-ended questions and making connections to their own lives, Martha began to engage her government, journalism, and economics classes in meaty discussions,

competitions, simulations, and authentic work, like running a newspaper or starting a business. Building on her more than 800 interviews with high school graduates, she offers up strategies in all subject areas for active engagement, moving way beyond traditional passive memorization of information. She describes how to create innovative experiences in your classroom, and shares her own lessons and her students' work. Beat Boredom will help you join the ranks of teachers who have challenged the status quo and found ways to motivate even the most reluctant learners.
