A New York Times Notable Book for 2011 One of The Economist's 2011 Books of the Year People speak different languages, and always have. The Ancient Greeks took no notice of anything unless it was said in Greek; the Romans made everyone speak Latin; and in India, people learned their neighbors' languages—as did many ordinary Europeans in times past (Christopher Columbus knew Italian, Portuguese, and Castilian Spanish as well as the classical languages). But today, we all use

translation to cope with the diversity of languages. Without translation there would be no world news, not much of a reading list in any subject at college, no repair manuals for cars or planes; we wouldn't even be able to put together flat-pack furniture. Is That a Fish in Your Ear? ranges across the whole of human experience, from foreign films to philosophy, to show why translation is at the heart of what we do and who we are. Among many other things, David Bellos asks: What's the difference between translating unprepared natural speech and translating Madame Bovary? How do you translate a joke? What's the difference between a native tongue and a learned one? Can you translate between any pair of languages, or only between some? What really goes on when world leaders speak at the UN? Can machines ever replace human translators, and if not, why? But the biggest question Bellos asks is this: How do we ever really know that we've understood what anybody else says—in our own language or in another? Surprising, witty, and written with great joie de vivre, this book is all about how we comprehend other people and shows us how, ultimately, translation is another name for the human condition.

Gamo, an important member of the Ometo linguistic cluster, is spoken to the west of the Rift Valley in southern Ethiopia. Based on the native speaker utterances and intuitions of one of the authors this pioneer work presents a basic grammar together with a first dictionary. Lexical entries are glossed in both English and Amharic, but the grammatical description is in English only. The usage of most entries is illustrated in example sentences, which in addition to English and Amharic translations have detailed grammatical analyses.

From the outset, this book has evoked strong responses. Its central claim is that given a comprehensive theory of inferential communication, there is no need for a special theory of translation. This has been praised by some as "wise and right" (Dell Hymes) and condemned by others as "astonishing, not to say perverse" (Kirsten Malmkjaer). Gutt's call to move from semiotics to an inferential paradigm of communication remains a challenge for many. The debate continues and so does the demand for the book, resulting in this second edition. There is a 'Postscript' entitled 'A decade later', where the author addresses peer criticism, especially from those involved in the movement of 'translation studies', and attempts to bring out more clearly the unique mandate of translation. New perspectives, such as authenticity, are also introduced. Marginal notes, some tongue-in-cheek, liven up the discussion and new references ensure its currency.

This comprehensive bilingual student dictionary includes 26,000 Word-to-Word dictionary entries, and is approved for ESL/ELL students to use for standardized testing. Amharic is the official working language of Ethiopia, with approximately 30 million speakers. The language has been used in courts, trade and everyday communications, within the military, and in the Ethiopian Orthodox Tewahedo Church since the 13th century. Amharic is the second most widely spoken Semitic language in the world after Arabic. Unlike Arabic, however, Amharic is written left-to-right and uses a distinct script called Ge'ez script. The two-way format makes it useful for both English and Amharic speakers. Ethiopian ELL students can look up the meaning of English words they don't recognize, and also translate their thoughts and writing in Amharic to English.
