Great Britain is called upon by the American President to help neutralize an international terrorist threat. Escalating tensions within the Russian Federation

lead experts to believe there is a conspiracy to destabilize its Western rivals: a mysterious arms smuggling gang is suspected of bringing weapons into the US for a series of terror attacks. Shanahan and Gawain are teamed with EUROPOL agent Lucretia Corcosa in an effort to infiltrate the ring, and assassinate

its leaders. They are drawn deep into the world of arms trading, Corsican mob and Russian espionage. Soon, the three have to confront the most dangerous enemy they have ever faced: The Citadel. The Citadel is a standalone novel, and can be enjoyed even if you haven't read other books in the series.

Plunkett Research, Ltd. The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car

buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Automobile Industry Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become

better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories. This exciting new book (which includes a database on CD-ROM) is a complete reference tool for everything you need to know about the car, truck and specialty vehicles business, including: Automotive industry trends and market research; Mergers,

acquisitions, globalization; Automobile manufacturers; Truck makers; Makers of specialty vehicles such as RVs; Automobile loans, insurance and other financial services; Dealerships; Components manufacturers; Retail auto parts stores; E-commerce ; and much, much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. This book also includes statistical tables, an automobile industry glossary, industry contacts and thorough indexes. The corporate profile section of the book includes our proprietary, in-depth profiles of the 400 leading companies in all facets of the

automobile industry. Purchasers may also receive a free copy of the company profiles database on CD-ROM.

Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic

software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles,

unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to:

- Build an accurate threat model for your vehicle
- Reverse engineer the CAN bus to fake engine signals
- Exploit vulnerabilities in diagnostic and data-logging systems
- Hack the ECU and other firmware and embedded systems
- Feed exploits through infotainment and vehicle-to-vehicle communication systems
- Override factory settings with performance-tuning techniques
- Build physical and virtual test benches to try out

exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

« Que les stars de la corruption nous pardonnent, nous avons volontairement ignoré leur cas. Des millions dans les poches ? La fuite des capitaux vers les paradis fiscaux ? Ce n'est pas notre sujet. Ce qui nous a passionnés, c'est la corruption ordinaire. La corruption de tous les jours, celle que l'on subit mais que l'on ne voit pas. C'est l'élite qui en croque, le chef d'entreprise qui arrose, l'agent public qui

favorise les amis. C'est la France des passe-droits et des pots-de-vin, celle des petits arrangements et de l'enveloppe discrètement exigée. » Jacques Duplessy et Guillaume de Morant, journalistes d'investigation aguerris ont parcouru les routes de France, de Clamart à Nancy, de Strasbourg à Dijon. Ils se sont arrêtés dans les grandes villes comme dans les petits villages, ont questionné les prévenus, les mis en examen, mais aussi les lanceurs d'alerte, les juges, les avocats et les policiers. Dans cette comédie humaine d'un genre nouveau, on retrouve un maire véreux qui collectionne les œuvres d'art aux frais du contribuable, des parents qui se sont jurés de ruiner leur fils,

un huissier de justice fraudeur, un patron qui protège sa maitresse et bien d'autres encore... Mais parfois, la corruption paye, et la morale n'est pas toujours au bout de l'histoire...

Sensory Marketing offers a global view of

the use of senses in marketing strategy based on consumers' perception and behaviour. Integrating the company constraints and classical approaches of branding and communication, the author presents sensory marketing as an emergent marketing paradigm in theory and practice. This book will be an important contribution that will provide useful reading for marketing scholars and consumer psychologists across the world.

This book provides a snapshot of the major social, cultural and economic changes that have taken place in the contemporary consumer society following the global financial crisis of 2008. It discusses brands, consumption patterns and advertising, and

highlights their symbolic component. Markets are conversations, as the Cluetrain Manifesto pointed out as early as 2000, and this is all the more so today in our increasingly digitalized society. Advertising, therefore, needs to attune products to the most interesting conversations, those that are consistent with the new sensibility of the individual, identifying the languages which reflect most closely the new values and which are most useful for effective storytelling. The analysis here focuses on Italian advertising, but the language categories described are in tune with the new Zeitgeist, which, faced with the challenge of climate change and the crisis

of unlimited economic growth, demands a more informed and responsible approach to consumption globally. The book is, therefore, useful for those working in corporate communication, advertising agencies, universities and Italian cultural organizations.

The telling of stories lies at the heart of human communication. In this important new book Peter Brophy introduces and explains the concept of story-telling or narrative-based practice in teaching, research, professional practice and organizations. He illustrates the deficiencies in evidence-based practice models, which focus on quantitative rather than qualitative evidence, and highlights the importance of narrative by drawing on insights from fields as disparate as pedagogy, anthropology, knowledge management and management practice. This book is essential

reading for professionals, scholars and students in the many disciplines currently using evidence-based practice, such as information management, health, social policy, librarianship and general management.
