**The Search for the Original Tree of Knowledge : a Radical History of Plants, Drugs and Human Evolution** Oxford University Press, USA

Data is fundamental to the modern world. From economic development, to healthcare, to education and public policy, we rely on numbers to allocate resources and make crucial decisions. But because so much data fails to take into account gender, because it treats men as the default and women as atypical, bias and discrimination are baked into our systems. And women pay tremendous costs for this bias, in time, money, and often with their lives. Celebrated feminist advocate Caroline Criado Perez investigates shocking root cause of gender inequality and research in *Invisible Women*†, diving into women's lives at home, the workplace, the public square, the doctor's office, and more. Built on hundreds of studies in the US, the UK, and around the world, and written with energy, wit, and sparkling intelligence, this is a groundbreaking, unforgettable

exposé that will change the way you look at the world.

**The Rise of Coronaviruses and the Search for a Cure** Henry Holt & Company

• A New York Times Notable Book • “The richest, freshest, most fun book on genetics in some time.” —The New York Times Book Review We are doomed to repeat history if we fail to learn from it, but how are we affected by the forces that are invisible to us? In *The Invisible History of the Human Race* Christine Kenneally draws on cutting-edge research to reveal how both historical artifacts and DNA tell us where we come from and where we may be going. While some books explore our genetic inheritance and popular television shows celebrate ancestry, this is the first book to explore how everything from DNA to emotions to names and the stories that form our lives are all part of our human legacy. Kenneally shows how trust is inherited in Africa, silence is passed down in Tasmania, and how the history of nations is written in our DNA. From fateful, ancient encounters to modern mass migrations and medical diagnoses, Kenneally explains how the forces that shaped the history of the world ultimately shape each human who inhabits it. *The Invisible History of the Human Race* is a deeply researched, carefully crafted and provocative perspective on how our stories, psychology, and genetics affect our past and our future.

*Hope Returns* Abrams

An accessible exploration of a burgeoning new field: the incredible evolution of language The first popular book to recount the exciting, very recent developments in tracing the origins of language, *The First Word* is at the forefront of a controversial, compelling new field. Acclaimed science writer Christine Kenneally explains how a relatively small group of scientists that include Noam Chomsky and Steven Pinker assembled the astounding narrative of how the fundamental process of evolution produced a linguistic ape-in other words, us. Infused with the wonder of discovery, this vital and engrossing book offers us all a better understanding of the story of humankind.

While the official history of planning as a defined profession celebrates the state and its traditions of city building and regional development, this collection of essays reveals a flip side. This scrutiny of the class, race, gender, ethnic, or other biased agendas previously hidden in planning histories points to the need for new planning paradigms for our multicultural cities of the future. Photos.

*How DNA and History Shape Our Identities and Our Futures* Speedy Publishing LLC

“A journey into the origins of COVID-19 and the discovery of vaccines and potential cures . . . I

learned so much that I didn't know before—above all, I met the subtle warriors of the laboratory who are working to save all of us from the horror of new pandemics.”—Richard Preston, bestselling author of *The Hot Zone* and *Crisis in the Red Zone* One of Publishers Weekly's top ten science books of the season The urgency of the devastating COVID-19 pandemic has fixed humanity's gaze on the present crisis. But the story of this pandemic extends far further back than many realize. In this engrossing narrative, epidemiologist Dan Werb traces the rising threat of the coronavirus family and the attempts by a small group of scientists who worked for decades to stop a looming viral pandemic. When virologist Ralph Baric began researching coronaviruses in the 1980s, the field was a scientific backwater—the few variants that infected humans caused little more than the common cold. But when a novel coronavirus sparked the 2003 SARS epidemic, and then the MERS epidemic a decade later, Baric and his allies realized that time was running out before a pandemic strain would make the inevitable jump from animals to human hosts. In *The Invisible Siege*, Werb unpacks the dynamic history and microscopic complexity of an organism that has wreaked cycles of havoc upon the world for millennia. Elegantly tracing decades of scientific investigation, Werb reveals how Baric's team of scientists hatched an audacious plan not merely to battle COVID-19 but to end pandemics forever. Yet as they raced to find a cure, they ran into a complicated nexus of science, ethics, industry, and politics that threatened to derail their efforts just as COVID-19 loomed ever larger. *The Invisible Siege* is an urgent and moving testament to the unprecedented scientific movement to stop COVID-19—and a powerful look at the infuriating factors that threaten to derail discovery and leave the world vulnerable to the inevitable coronaviruses to come.

"An astonishingly detailed rendering of the variety and complexity of racial experience in an evolving national culture." -The New York Times Book Review In the Obama era, as Americans confront the enduring significance of race and heritage, this multigenerational account of family secrets promises to spark debate across the country. Daniel J. Sharfstein's sweeping history moves from eighteenth-century South Carolina to twentieth-century Washington, D.C., unraveling the stories of three families who represent the complexity of race in America. Identifying first as people of color and later as whites, the families provide a lens through which to examine how people thought about and experienced race and how, for them and America, the very meanings of black and white changed. *The Invisible Line* cuts through centuries of myth to transform the way we see ourselves.

A "meticulously researched" (The New York Times Book Review) examination of energy transitions over time and an exploration of the current challenges presented by global warming, a surging world population, and renewable energy—from Pulitzer Prize- and National Book Award-winning author Richard Rhodes. People have lived and died, businesses have prospered and failed, and nations have risen to world power and declined, all over energy challenges. Through an unforgettable cast of characters, Pulitzer Prize-winning author Richard Rhodes explains how wood gave way to coal and coal made room for oil, as we now turn to natural gas, nuclear power, and renewable energy. "Entertaining and informative...a powerful look at the importance of science" (NPR.org), Rhodes looks back on five centuries of progress, through such influential figures as Queen Elizabeth I, King James I, Benjamin Franklin, Herman Melville, John D. Rockefeller, and Henry Ford. In his "magisterial history...a tour de force of popular science" (Kirkus Reviews, starred review), Rhodes shows how breakthroughs in energy production occurred; from animal and waterpower to the steam engine, from internal-combustion to the electric motor. He looks at the current energy landscape, with a focus on how wind energy is competing for dominance with cast supplies of coal and natural gas. He also addresses the specter of global warming, and a population hurtling towards ten billion by 2100. Human beings have confronted the problem of how to draw energy from raw material since the beginning of time. Each invention, each discovery, each adaptation brought further challenges, and through such transformations, we arrived at where we are today. "A beautifully written, often inspiring saga of ingenuity and progress...Energy brings facts, context, and clarity to a key, often contentious subject" (Booklist, starred review).

We are doomed to repeat history if we fail to learn from it, but how are we affected by the forces that are invisible to us? What role does Neanderthal DNA play in our genetic makeup? How did the theory of eugenics embraced by Nazi Germany first develop? How is trust passed down in Africa, and silence inherited in Tasmania? How are private companies like Ancestry.com uncovering, preserving and potentially editing the past? In *The Invisible History of the Human Race*, Christine Kenneally reveals that, remarkably, it is not only our biological history that is coded in our DNA, but also our social history. She breaks down myths of determinism and draws on cutting-edge research to explore how both historical artefacts and our DNA tell us where we have come from and where we may be going.

On the heels of her mother's death, Hope Logan reluctantly returned to her grandparents' home place in search of a journal that revealed explosive crimes and atrocities of the past that had haunted her grandma for nearly sixty-five years. Bitterness, unforgiveness, and anger consumed her as she set out to solve the mystery that surrounded her grandma's life. The dark evil secret that was contained in the journal only deepened her resentment of God. Because of her quest, she came in contact with many strong believers, especially a handsome young pastor and three senior citizens. In that small town in the foothills of the mountains of North Carolina, Hope's bitterness, unforgiveness, and anger slowly began to fade in the light of the strong faith of the young pastor and three senior citizens. She discovered the true meaning of faith and hope in Christ in the midst of adversity. Carolyn Digh Griffin, a native North Carolinian, resides in Waxhaw, North Carolina, with her husband, Hoyle. She is retired from Union County Public Schools where she was an Administrative Assistant to the Assistant Superintendent. She has two daughters and four grandchildren who also reside in the Old North State.

Viruses are the world's most abundant life form, and now, when humanity is in the midst of a close encounter with their immense power, perhaps the most feared. But do we understand viruses? Possibly the most enigmatic of living things, they are sometimes not considered a life form at all. Everything about them is extreme, including the reactions they evoke. However, for every truism about viruses, the opposite is also often true. So complex and diverse is the world of viruses that it merits being labelled an empire unto itself. And whether we see them as alive or dead, as life-threatening or life-affirming, there is an ineluctable beauty, even a certain elegance, in the way viruses go about their lives-or so Pranay Lal tells us in *Invisible Empire: The Natural History of Viruses*. This is a book that defies categorisation. It brings together science, history and great storytelling to paint a fascinating picture of viruses as a major actor, not just in human civilisation but also in the human body. With rare photographs, paintings, illustrations and anecdotes, it is a magnificent and an extremely relevant book for our times, when we are attempting to understand viruses and examining their role in the lives of humans.

John Wiley & Sons

Lambda Literary Award 2014 Finalist in LGBT Nonfiction Foreword Reviews' INDIEFAB Book of the Year Award 2014 Finalist in Family & Relationships Independent Publisher Book Awards 2015 (IPPY) Silver Medal in Sexuality/Relationships Next Generation Indie Book Awards 2015 Winner in LGBT -- What if you weren't sexually attracted to anyone? A growing number of people are identifying as asexual. They aren't sexually attracted to anyone, and they consider it a sexual orientation—like gay, straight, or bisexual. Asexuality is the invisible orientation. Most people believe that "everyone" wants sex, that "everyone" understands what it means to be attracted to other people, and that "everyone" wants to date and mate. But that's where asexual people are left out—they don't find other people sexually attractive, and if and when they say so, they are very rarely treated as though that's okay. When an asexual person comes out, alarming reactions regularly follow; loved ones fear that an asexual person is sick, or psychologically warped, or suffering from abuse. Critics confront asexual people with accusations of following a fad, hiding homosexuality, or making excuses for romantic failures. And all of this contributes to a discouraging master narrative: there is no such thing as "asexual." Being an asexual person is a lie or an illness, and it needs to be fixed. In *The Invisible Orientation*, Julie Sondra Decker outlines what asexuality is, counters misconceptions, provides resources, and puts asexual people's experiences in context as they move through a very sexualized world. It includes information for asexual people to help understand their orientation and what it means for their relationships, as well as tips and facts for those who want to understand their asexual friends and loved ones.

Italo Calvino's beloved, intricately crafted novel about an Emperor's travels—a brilliant journey across far-off places and distant memory. "Cities, like dreams, are made of desires and fears, even if the thread of their discourse is secret, their rules are absurd, their perspectives deceitful, and everything conceals something else." In a garden sit the aged Kublai Khan and the young Marco Polo—Mongol emperor and Venetian traveler. Kublai Khan has sensed the end of his empire coming soon. Marco Polo diverts his host with stories of the cities he has seen in his travels around the empire: cities and memory, cities and desire, cities and designs, cities and the dead, cities and the sky, trading cities, hidden cities. As Marco Polo unspools his tales, the emperor detects these fantastic places are more than they appear.

Presents the true story of a friendship that has spanned three decades, recounting how the author, a harried sales executive, befriended an eleven-year-old panhandler, changing both of their lives forever.

[The First Word](#) Crown

An illustrated science-history graphic novel exploring parallel experiences during WWI. The story takes place on two different physical scales - the macro-scale, from the point of view of a Victorian nurse supporting troops in the trenches of the Western Front - and simultaneously on the micro-level, from the point of view of the gut microbes which fight to keep her body alive when she contracts dysentery. This fictional story is based on accurate scientific and historical facts, in consultation with academic experts from Australia, France, UK and the USA.

[The Invisible War](#) Walter de Gruyter GmbH & Co KG

[Invisible Truth](#) The Supreme Source of Infinite ManifestationChristina Wollebek-Smithwith Marty Smith 267 pages. Prologue\* The world of science and the world of religion (faith) are not exclusive; they're symbiotic. The only difference is the interpretation of what miracles are.\* Science has proof positive that all of the universe is made up of energy, including the human race, and all animals for that matter. The various faiths of the world concur.\* Energy cannot be created nor can it be eliminated. Its direction, however, can be changed.\* The Nine Laws and Principles of Invisible Truth explain how to direct energy in a way that creates (manifests) abundance in our lives through directed, organized energy.\* These laws and principles show exactly how to use directed energy in our lives to manifest what we desire.\* Throughout the book we show how the world of science and the world of faith are congruent in these Nine Laws and Principles.\* The importance of this message is in the use of the Nine Laws and Principles. If you wish to go directly to causing immediate change in your life, start with Part Two of Invisible Truth. The remainder is the reasoning behind our stance.This is a 4 part book. Part 1: In the Beginning. What is Invisible Truth. Manifestation. Aether. Part 2: The Bucket. Living in the Now. Thought. Words. Belief. Work. Thankfulness. Forgiveness. Giving and Receiving. Environment. Putting it Altogether. The Last

Words. Part 3: Our Stance. Cosmic Consciousness. Unveiling the Neural Mysteries. Your Extended Environment. Part 4: About the Author. Afterthought. This book explores the ability of our self to change the neural pathways through which our reactions to exterior stimuli travel, thereby

changing our perceptions...thus allowing us the ability to control the direction of our lives. There is about five years of research behind this work. We spell out how to actually change brain patterns

in a natural way. This is beyond Rhonda Byrne's book, ""The Secret,"" on steroids. This is "A Course on Miracles" in a way that is not only coherent, but applicable. This book explains the religion of science, and the science of religion.
