Wikipedia By Prof. Debasis Sarkar | IIT Kharagpur. This course covers two important aspects of Chemical Engineering: (a) the strategies used in the design of chemical processes, and (b) the basic economic analysis of a chemical plant. The objective of the course is to expose students to basic concepts in engineering economics, plant design, safety features and its importance to chemical engineering. Plant Design and Economics - Course This highly regarded text is known for its broad coverage of both design and economics, its attention to the details of cost estimating, its inclusion of up-to-date cost data, and its application of
