*10 principles of effective information management*

In many cases, information management has meant deploying new technology solutions, such as content or document management systems, ERP solutions or platforms such as Office 365. These projects have a poor track record of success, and most organisations are still struggling to deliver an integrated information management environment.

Some of the common types of Management Information Systems include process control systems, human resource management systems, sales and marketing systems, inventory control systems, office automation systems, enterprise resource planning systems, accounting and finance systems and management reporting systems.
