ERICKSON HARTMAN

Construction Methods and Equipment "O'Reilly Media, Inc."

If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web

pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site.

Earthmovers in Scotland: Mining, Quarries, Roads & Forestry CreateSpace

Bucyrus-Erie Company is a name synonymous with moving the earth. From the smallest loader-backhoe to some of the largest machines ever to move on land, no other company has produced such a wide variety of types and sizes of excavating equipment. With a rich heritage going back 128 years the company, now known as Bucyrus International Inc., is still designing and building some of the world's largest shovels and walking draglines. Nothing could be more apt to describe this manufacturing power house than its slogan used in the 1960s "The Longest Line on Earth". Over 450 spectacular black and white photos combined with detailed captions chronicle and

describe all the major equipment product lines from Bucyrus Company, Erie Steam Shovel, Bucyrus-Erie and Ruston-Bucyrus. Every machine model from the extensive lines of cable excavators, hydraulic excavators, walking draglines, stripping shovels and drills is included, plus tables of machine introductions and production. There's also detailed coverage of floating dredges, tractor equipment, cranes, bucket wheel excavators and other special machines. This book is sure to satisfy the serious equipment historian as well as the enthusiast.

Mining Journal Routledge

British Opencast Coal is an illustrated history of coal mining by surface methods from 1942 to 1985. Written by Keith Haddock, a leading authority on the subject, this book details the origins of the industry and documents the types of earthmoving machines employed during the first 40 years. The book highlights the importance of surface coal mining operations and site restoration and their necessity for the British economy. Meticulously researched, the facts, figures and data covered are taken from Keith's extensive collection of magazine articles, newspaper cuttings and

manufacturers' machine brochures and specifications. They are also drawn from publications by the National Coal Board Opencast Executive and Keith's own research conducted on numerous site visits. The sites included represent a cross section of geologically different locations in England, Scotland and Wales, and those employing the most interesting variety of earthmoving machines, such as Maesgwyn in South Wales, Newman Spinney in Derbyshire, Radar North in Northumberland and Ox-Bow in Yorkshire. The book's 364 historical photographs, many taken for the National Coal Board or British Coal Opencast, provide a nostalgic look at obsolete earthmoving and heavy construction equipment, and form an excellent historical resource for the student, researcher or enthusiast.

Babel Enthusiast Books

This SLAM risks publication is about risk assessment and the prevention of mining accidents.

Jung and the Postmodern Courier Corporation

As Scottish Correspondent for Earthmovers Magazine, David Wylie has enjoyed privileged access to the mines, quarries, road projects and forestry sites across Scotland. On his visits he has seen some of the biggest and arguably the best, earthmoving machinery in the world, in action. Earthmovers in Scotland brings together 32 of David's reports from these visits to tell the story of the highly skilled, experienced owners, drivers and managers that work with earthmoving equipment and explains why they select, maintain and operate these machines. The book features some of the largest earthmovers in the UK, such as Caterpillar's D11R bulldozer, Liebherr's massive 320 tonne R9350s and the mighty 520 tonne Q&K RH200 at Banks Mining Shotton surface mine in Northumberland, a short hop over the Scottish border. It also takes a look at a 1.5 tonne mini digger, special trailers that can lift and transport 1800 tonne bridges into position, and covers Demag's H485 record breaking mining shovel amongst others. Taking pride of place in the book are over 400 stunning photographs, many of which have not been seen before and many of which feature machines that were the first of their kind. Each high quality photo has been carefully composed to capture each machine in all its power and brilliance with the spectacular Scottish scenery as a backdrop and 80 of the most important and detailed images are presented as double pages to help you get close to the action. This beautiful book sets out to provide its owner with a comprehensive look at Scottish earthmovers scene, and will be of interest to enthusiasts, owners, drivers and site managers worldwide.

Western Construction Bis Pub

What has Jung to do with the Postmodern? Chris Hauke's lively and provocative book, puts the case that Jung's psychology constitutes a critique of modernity that brings it in line with many aspects of the postmodern critique of contemporary culture. The metaphor he uses is one in which 'we are gazing through a Jungian transparency or filter being held up against the postmodern while, from the other side, we are also able to look through a transparency or filter of the postmodern to gaze at Jung. From either direction there will be a new and surprising vision.' Setting Jung against a range of postmodern thinkers, Hauke recontextualizes Jung's thought as a response to modernity, placing it - sometimes in parallel and sometimes in contrast to - various postmodern discourses. Including chapters on themes such as meaning, knowledge and power, the contribution of architectural criticism to the postmodern debate, Nietzsche's perspective theory of affect and Jung's complex theory, representation and symbolization, constructivism and pluralism,

this is a book which will find a ready audience in academy and profession alike.

Branding to Generation Y Ingram

How Cool Brands Stay Hot reveals what drives Generation Y, the most marketing savvy and advertising-critical generation, and how you can develop the right brand strategies to reach this group which, at three times the size of Generation X, has a big impact on society and business. Packed with qualitative and quantitative research plus creative ideas on how to position, develop and promote brands to the new consumer generation, it explains the five crucial steps or dimensions on how to stay a cool youngster brand. The first edition of How Cool Brands Stay Hot won the prestigious 2012 Berry-AMA Book Prize for the best book in marketing and Expert Marketer's Marketing Book of the Year 2011. This fully updated second edition incorporates additional years of extensive research and includes new case studies and 18 interviews with global brand and marketing executives of successful brands such as Converse, Heineken, Diesel, Coca-Cola, MasterCard, eBay, and the BBC.

Mine and Quarry Jhg Partners

In 1947 Vaino J. Holopainen (Waino) and Roy E. Handy Jr. of the small town of Hubbardston, Massachusetts developed the world's first backhoe. This revolutionary invention that could dig and load by swinging side to side, was also the world's first all hydraulically actuated and controlled machine for digging. Vaino and Roy then formed Wain-Roy Corporation. Their grassroots contribution to the earth moving industry led to the development of twenty-six major backhoe related break-through designs, including the tractor loader backhoe, which formed the worldwide multi-billion-dollar industry that we know today. The amazing story of Wain-Roy and the invention of the backhoe is one of inspiration, struggle, genius, success, theft and failure. Credit for the backhoe is often given to other larger outfits who no-doubt fueled the rise of its widespread use. Few people alive still remember the greatest triumphs and failures of the true inventors and innovators of first backhoe and the first all-hydraulic digger. Authors Lee Horton and Dave Willens, two engineers from Central Massachusetts, wanted to capture this fascinating history before it was lost to time.

Power Farming in Australia and New Zealand and Better Farming Digest Kogan Page Publishers

From the author of the TRAINSPOTTING and SHALLOW GRAVE screenplays, a novel about the unpredictable course of fate. An aspiring novelist meets a rich woman with a slender grip on the real world. They are ill-matched but become lovers, with a little help from the archangel Gabriel. Tied to the release of a Hollywood feature film.

American Muscle Cars, 1960-1975 Macmillan International Higher Education

A sweeping and original work of economic history by Michael Lind, one of America's leading intellectuals, Land of Promise recounts the epic story of America's rise to become the world's dominant economy. As ideological free marketers continue to square off against Keynesians in Congress and the press, economic policy remains at the center of political debate. Land of Promise: An Economic History of the United States offers a much-needed historical framework that sheds new light on our past—wisdom that offers lessons essential to our future. Building upon the strength and lucidity of his New York Times Notable Books The Next American Nation and Hamilton's Republic, Lind delivers a necessary and revelatory examination of the roots of American

prosperity—insight that will prove invaluable to anyone interested in exploring how we can move forward.

In this book we'll be looking more closely at the power of lean leadership and what it can do for you. You may want to move towards becoming a lean leader yourself, or have a desire to implement lean practices among your management team. Whatever the reason, this guide will help you get started. But what is exactly is 'Lean Leadership'? And what is a 'Lean Leader'? What makes a 'Lean Leader' different from a 'normal' leader? These are just some of the questions we'll be answering within this book. We also want you to: - Understand the variables and factors that comprise a lean leadership style - Identify the main differences between management and leadership styles and behaviours and why going lean could change your business for the better - Recognise that lean principles can be applied to any size business within any industry - Learn how to recognize the characteristics of lean leaders - How to harness the power of lean and apply lean leadership techniques to your business

Lean Project Management Taylor & Francis

Displays thirty projects developed since the founding of the 'Do' label and launches seventy new ideas.

Industrial Hydraulics Manual Infinity Publishing

Expertly rendered illustrations of fast, flashy, and powerful sports cars, among them the 1962 Ford Thunderbird, 1964 Corvette Stingray, 1968 Chevy Impala SS427, 1969 Camaro Z-28, 1970 Ford Torino Fastback, 1971 Mustang Boss 351, 1974 Firebird Trans-Am, and 37 others. For coloring book enthusiasts and "muscle car" fans.
