Abrams Noterie

This project began on  
 December 22, 2008.  
 The failure of a  
 containment pond  
 dyke spilled 5.4 million  
 cubic yards of coal ash  
 belonging to the  
 Tennessee Valley  
 Authority's (TVA)  
 Kingston Fossil Plant  
 into the Emory River

and its surrounding  
 landscape. What led to  
 this point? Jeff Rich  
 investigates the river  
 itself and the TVA's  
 vast reach and power  
 throughout the region.  
 It has forever changed  
 the environment of its  
 watershed that is in  
 every way at odds with  
 the natural evolution  
 and ecology of the  
 Tennessee River  
 system.

"The essays in this  
 collection offer a timely  
 intervention in digital  
 humanities  
 scholarship, bringing  
 together established  
 and emerging scholars  
 from a variety of  
 humanities disciplines  
 across the world. The  
 first section offers  
 views on the practical  
 realities of teaching  
 digital humanities at  
 undergraduate and

graduate levels, presenting case studies and snapshots of the authors' experiences alongside models for future courses and reflections on pedagogical successes and failures. The next section proposes strategies for teaching foundational digital humanities methods across a variety of scholarly disciplines, and the book concludes with wider debates about the place of digital humanities in the academy, from the field's cultural assumptions and social obligations to its political visions." (4e de couverture).

Essays on Art and Language Harvey Miller  
The idiosyncratic curriculum from the Professor of Interdisciplinary

Creativity will teach you how to draw and write your story Hello students, meet Professor Skeletor. Be on time, don't miss class, and turn off your phones. No time for introductions, we start drawing right away. The goal is more rock, less talk, and we communicate only through images. For more than five years the cartoonist Lynda Barry has been an associate professor in the University of Wisconsin-Madison art department and at the Wisconsin Institute for Discovery, teaching students from all majors, both graduate and undergraduate, how to make comics, how to be creative, how to not think. There is no academic lecture in this classroom. Doodling is

enthusiastically encouraged. Making Comics is the follow-up to Barry's bestselling Syllabus, and this time she shares all her comics-making exercises. In a new hand-drawn syllabus detailing her creative curriculum, Barry has students drawing themselves as monsters and superheroes, convincing students who think they can't draw that they can, and, most important, encouraging them to understand that a daily journal can be anything so long as it is hand drawn. Barry teaches all students and believes everyone and anyone can be creative. At the core of Making Comics is her certainty that creativity is vital to processing the world around us.

Pustak Mahal  
An in-depth look at the changing status of American artists in the 18th and early 19th century This fascinating book is the first comprehensive art-historical study of what it meant to be an American artist in the 18th- and early 19th-century transatlantic world. Susan Rather examines the status of artists from different geographical, professional, and material perspectives, and delves into topics such as portrait painting in Boston and London; the trade of art in Philadelphia and New York; the negotiability and usefulness of colonial American identity in Italy and London; and the shifting

representation of artists in and from the former British colonies after the Revolutionary War, when London remained the most important cultural touchstone. The book interweaves nuanced analysis of well-known artists--John Singleton Copley, Benjamin West, and Gilbert Stuart, among others--with accounts of non-elite painters and ephemeral texts and images such as painted signs and advertisements. Throughout, Rather questions the validity of the term "American," which she sees as provisional--the product of an evolving, multifaceted cultural construction. Published for the Paul Mellon Centre for Studies in British Art

101 More Mixed Media

### Techniques Good Press

This volume examines the flourishing of Futurist aesthetics in the European art and literature of the early twentieth century. Futurism was an artistic and social movement that was largely an Italian phenomenon, though there were parallel movements in Russia, England and elsewhere. The Futurists admired speed, technology, youth and violence, the car, the airplane and the industrial city, all that represented the technological triumph of humanity over nature. This work looks at the prose, visual art, poetry, and the manifestos of Futurists from Russia to Italy. The author reveals the Moment's impulses and operations, tracing its

echoes through the years to the work of "postmodern" figures like Roland Barthes. This updated edition reexamines the Futurist Moment in the light of a new century, in which Futurist aesthetics seem to have steadily more to say to the present Electronic Culture University of Chicago Press

Explore a diverse array of adventurous methods for creating mixed media art with 101 More Mixed Media Techniques. Whether you are an experienced artist or just starting out, you'll discover new, approachable concepts for creating and embellishing your own mixed media art with 101 More Mixed Media Techniques. Following in the footsteps of 101 Mixed

Media Techniques, this companion edition explores even more versatile mixed media techniques, from printmaking, wabi-sabi painting, embossing, antiquing, and washi tape to paper collage, ephemera, pyrography, and resists. Each technique is presented with simple, easy-to-follow instructions and beautiful examples from talented mixed media artists. In addition to learning new mixed media techniques, you'll also discover ideas and inspiration for using the methods in your own projects and developing your own personal style. With more than a hundred options to choose from, 101 More Mixed Media Techniques has something for every artist and is

guaranteed to spark new forms of creativity!

*The Art of Problem Solving, Volume 1*

Metropolitan Museum of Art

In our unprecedentedly networked world, games have come to occupy an important space in many of our everyday lives. Digital games alone engage an estimated 2.5 billion people worldwide as of 2020, and other forms of gaming, such as board games, role playing, escape rooms, and puzzles, command an ever-expanding audience. At the same time, “gamification”—the application of game mechanics to traditionally nongame spheres, such as personal health and fitness, shopping, habit tracking, and

more—has imposed unprecedented levels of competition, repetition, and quantification on daily life. Drawing from his own experience as a game designer, Patrick Jagoda argues that games need not be synonymous with gamification. He studies experimental games that intervene in the neoliberal project from the inside out, examining a broad variety of mainstream and independent games, including StarCraft, Candy Crush Saga, Stardew Valley, Dys4ia, Braid, and Undertale. Beyond a diagnosis of gamification, Jagoda imagines ways that games can be experimental—not only in the sense of problem solving, but also the more nuanced notion

of problem making that embraces the complexities of our digital present. The result is a game-changing book on the sociopolitical potential of this form of mass entertainment.

### The Futurist Moment

CRC Press

Created in Tepechpan, a relatively minor Aztec city in Central Mexico, the Tira de Tepechpan records important events in the city's history from 1298 through 1596. Most of the history is presented pictographically. A line of indigenous year signs runs the length of the Tira, with images above the line depicting events in Tepechpan and images below the line recording events at Tenochtitlan, capital of the Aztec empire and

later the seat of Spanish rule. Written annotations amplify some of the images. In this volume, which includes color plates of the entire Tira, Lori Boornazian Diel investigates the motives behind the creation and modification of the Tira in the second half of the sixteenth century. She identifies the Tira's different contributors and reconciles their various histories by asking why these painters and annotators, working at different times, recorded the events that they did. Comparing the Tira to other painted histories from Central Mexico, Diel demonstrates that the main goal of the Tira was to establish the antiquity, autonomy, and

prestige of Tepechpan among the Central Mexican city-states that vied for power and status in the preconquest and colonial worlds.

Offering the unique point of view of a minor city with grand ambitions, this study of the Tira reveals imperial strategy from the grassroots up, showing how a subject city negotiated its position under Aztec and Spanish control.

Art and Industry: (1897) Industrial and technical training in voluntary associations and endowed institutions University of Chicago Press

Anthony Comstock was America's first professional censor. From 1873 to 1915, as Secretary of the New York Society for the Suppression of Vice,

Comstock led a crusade against lasciviousness, salaciousness, and obscenity that resulted in the confiscation and incineration of more than three million pictures, postcards, and books he judged to be obscene. But as Amy Werbel shows in this rich cultural and social history, Comstock's campaign to rid America of vice in fact led to greater acceptance of the materials he deemed objectionable, offering a revealing tale about the unintended consequences of censorship. In *Lust on Trial*, Werbel presents a colorful journey through Comstock's career that doubles as a new history of America's risqué visual and sexual culture.

Born into a puritanical New England community, Anthony Comstock moved to New York in 1868 armed with his Christian faith and a burning desire to rid the city of vice. Werbel describes how Comstock's raids shaped New York City and American culture through his obsession with the prevention of lust by means of censorship, and how his restrictions provided an impetus for the increased circulation and explicitness of "obscene" materials. By opposing women who preached sexual liberation and empowerment, suppressing contraceptives, and restricting artistic expression, Comstock drew the ire of civil

liberties advocates, inspiring more open attitudes toward sexual and creative freedom and more sophisticated legal defenses.

Drawing on material culture high and low, including numerous examples of the "obscenities"

Comstock seized, *Lust on Trial* provides fresh insights into

Comstock's actions and motivations, the sexual habits of Americans during his era, and the complicated relationship between law and cultural change.

Beazley Database Aesthetics examines the database as cultural and aesthetic form, explaining how artists have participated in network culture by creating data art. The essays in this collection look at how an aesthetic emerges when artists use the vast amounts of available information as their medium. Here, the ways information is ordered and organized become artistic choices, and artists have an essential role in influencing and critiquing the digitization of daily life. Watson-Guptill  
Essays explore the influence of art in twentieth-century American culture, including jazz, basketball, professional wrestling, magic, gambling, entrepreneurship, series television and automotive design. Court, Cloister, and City Walter Foster Publishing  
Critical and theoretical essays by a long-time participant in the Art &

Language movement. These essays by art historian and critic Charles Harrison are based on the premise that making art and talking about art are related enterprises. They are written from the point of view of Art & Language, the artistic movement based in England—and briefly in the United States—with which Harrison has been associated for thirty years. Harrison uses the work of Art & Language as a central case study to discuss developments in art from the 1950s through the 1980s. According to Harrison, the strongest motivation for writing about art is that it brings us closer to that which is other than ourselves. In seeing how a work is done, we

learn about its achieved identity: we see, for example, that a drip on a Pollock is integral to its technical character, whereas a drip on a Mondrian would not be.

Throughout the book, Harrison uses specific examples to address a range of questions about the history, theory, and making of modern art—questions about the conditions of its making and the nature of its public, about the problems and priorities of criticism, and about the relations between interpretation and judgment.

"... offer[s] a challenging exploration of problem solving mathematics and preparation for

programs such as MATHCOUNTS and the American Mathematics Competition."--Back cover

**The Joy of Natural Living**

Farrar, Straus and Giroux

An unconventional history of Philadelphia that operates at the threshold of cultural and environmental studies, *A Greene Country Towne* expands the meaning of community beyond people to encompass nonhuman beings, things, and forces. By examining a diverse range of cultural acts and material objects created in Philadelphia—from Native American artifacts, early stoves, and literary works to public parks, photographs, and paintings—through the lens of new

materialism, the essays in *A Greene Country Towne* ask us to consider an urban environmental history in which humans are not the only protagonists. This collection reimagines the city as a system of constantly evolving constituents and agencies that have interacted over time, a system powerfully captured by Philadelphia artists, writers, architects, and planners since the seventeenth century. In addition to the editors, contributors to this volume are Maria Farland, Nate Gabriel, Andrea L. M. Hansen, Scott Hicks, Michael Dean Mackintosh, Amy E. Menzer, Stephen Nepa, John Ott, Sue Ann Prince, and Mary I. Unger.

The return of a saint's body to its rightful resting place was an event of civic and spiritual significance retold in Medieval sources and substantiated by artistic commissions. Legends of Saint Thomas Apostle, for instance, claimed that the martyred saint had been miraculously transported from India to Italy during the thirteenth century.

However, Saint Thomas's purported resting place in Ortona, Italy did not become a major stopping point on pilgrimage or exploration routes, nor did this event punctuate frescoed life cycles or become a subject for Renaissance altarpieces as one

would expect. Instead, the site of the apostle's burial in Chennai, India has flourished as a terminus of religious pilgrimage, where a multifaceted visual tradition emerged, and where a vibrant local cult of 'Thomas Christians' remains to this day. An unlikely destination on the edge of the 'known' world thus became a surprising source of early modern Christian piety. By studying the art and texts associated with this little-known cult, this book disrupts assumptions about how knowledge of Asia took shape during the Renaissance and challenges art historical paradigms in which art was crafted by locals merely to be exported, collected, and consumed by

curious European patrons. In so doing, Italy by Way of India proposes that we redefine the parameters of early modern visual culture to account for the ways that global mobility and the circulation of objects profoundly influence how cultures see and know each

other as well as themselves.
