 ICOST ESTIMATION - AIChE A chemical
 plant is an industrial process plant that
 manufactures (or otherwise processes)
 chemicals, usually on a large scale. The
 general objective of a chemical plant is
 to create new material wealth via the
 chemical or biological transformation
 and or separation of materials. Chemical
 plants use specialized equipment, units,
 and technology in the manufacturing
 process. Chemical plant - Wikipedia The
 chemical engineering curriculum is
 designed to give graduates a broad
 background in chemical engineering
 processes and to prepare them to
 become practicing engineers. Graduates
 are prepared for positions in operations,
 development, design, construction, and
 management of chemical plants,

environmental processes, life sciences, and materials ...Chemical Engineering < West Virginia University CHE 462 Plant Design and Economics. Credits: 3. Syllabus.
