The purpose of cost and management accounting is to provide managers with information which helps them to control, plan and make decisions. The second edition of this popular book, covers the principles and techniques of this subject area including the basic methods and procedures. It will prove invaluable to students on a wide range of business and professional courses. Cost and Management Accounting | SpringerLink Cost and Management Accounting is a clear explanatory text covering the principles and techniques of the subject. It will prove invaluable for students in Further and Higher Education, particularly those studying on Accounting Foundation, 'A' level and BTEC courses. It will also suit practising managers who wish to improve their existing skills. Cost and Management Accounting | SpringerLink Abstract. The accounting system deals with the conceptualisation and conditions of the company's information systems. The management

accounting system supports the planning and coordination of company decisions and has two main functions: Decision-making (decision support) and behavioural control (decision influencing). Cost and Management Accounting | SpringerLink ISBN 978-0-412-46390-7; Free shipping for individuals worldwide; Immediate ebook access, if available*, with your print order; Usually ready to be dispatched within 3 to 5 business days. MANAGEMENT AND COST ACCOUNTING | COLIN M. DRURY | Springer This chapter explains why the techniques and methods of cost and management accounting are important tools in many organisations. In practice, the phrase management accounting is often used to cover both cost and management accounting. Whether the activity is producing game shows for television, manufacturing computers, running a hospital ward or taking tourists on holiday, the organisation's managers require financial information to help them do their job efficiently and effectively.
