**Financial Accounting and Reporting** S. Chand Publishing  
 Modern economies reward activities that extract value rather than create it. This must change to ensure a capitalism that works for us all. Shortlisted for the FT & McKinsey Business Book of the Year Award A scathing indictment of our current global financial system, *The Value of Everything* rigorously scrutinizes the way in which economic value has been accounted and reveals how economic theory has failed to clearly delineate the difference between value creation and value extraction. Mariana Mazzucato argues that the increasingly blurry distinction between the two categories has allowed certain actors in the economy to portray themselves as value creators, while in reality they are just moving around existing value or, even worse, destroying it. The book uses case studies-from Silicon Valley to the financial sector to big pharma-to show how the foggy notions of value create confusion between rents and profits, reward extractors and creators, and distort the measurements of growth and GDP. In the process, innovation suffers and inequality rises. The lesson here is urgent and sobering: to rescue our economy from the next inevitable crisis and to foster long-term economic growth, we will need to rethink capitalism, rethink the role of public policy and the importance of the public sector, and redefine how we measure value in our society.

Accounts being a tough practical subject, students find it difficult to keep up with the theoretical concepts and practical problems at the same time. There remains a need for the book which helps students practice ample problems on every topic and be exam ready. Keeping this in mind, the authors present *Problems and Solutions in Accounting* to cater to the needs of CA Intermediate students appearing for Group-I, Paper 1: Accounting as per the new syllabus scheme of ICAI. The book has been neatly organised into Sections and Sub-sections each dedicated to fundamental topics of Accounting. For easy, navigation through a chapter, the number of problems dedicated to a topic and the type of problems covered have been listed in detail at the beginning. Salient Features: ✓ Content is strictly aligned to the topical flow as guided by the syllabus of ICAI. ✓ Coverage of Questions from RTPs and MTPs of ICAI examination. ✓ Thoroughly updated content includes latest changes in Accounting and the Companies Act, 2013. ✓ Questions from previous year ICAI examinations, Revisionary Test Papers (RTPs), Mock Test Papers (MTPs), and

other professional bodies have been incorporated to provide enhanced understanding and extensive practice to the students.

✓ Each chapter is further subdivided in various sections to develop the concepts in a methodical manner.

Within corporate governance the accountability of the board of directors is identified as a major issue by governments, international bodies, professional associations and academic literature. Boards are given significant power in companies, and as a consequence it is argued that they should be accountable for their actions. Drawing on political science, public administration, accounting, and ethics literature, this book examines the concept of accountability and its meaning in the corporate governance context. It examines the rationale for making boards accountable, and outlines the obstacles and drawbacks involved in providing for accountability. The book goes on to examine how current mechanisms for ensuring accountability are assessed in terms of fairness, justice, transparency, practicality, effectiveness and efficiency, before discussing the ways that accountability might be improved. Andrew Keay argues that enhanced accountability can provide better corporate governance, helping to reduce the frequency and severity of financial crises, and improve confidence in company practice. As an in depth study of a key element within the exercise of authority and management in corporate entities, this book will be of great use and interest to researchers and students of corporate governance, business and management, and corporate social responsibility.

This book looks both backward and forward with regard to the European Union's political strategies towards its neighbouring countries. By bringing together the perspectives of critical geopolitics, policy studies and border studies, it presents a comprehensive review of the European Neighbourhood Policy and how it impacts the ongoing construction of the EU's external frontiers. Is the EU committed to promoting integration in a 'wider' European space, or is a "fortress Europe" emerging where the strengthening of internal cohesion is coupled with the

militarisation of its external borders? The book aims to problematize this question by showing how the EU's external policies are based on a mixture of openness and closure, inclusion and exclusion, cooperation and securitisation. The European Neighbourhood Policy is a controversial strategy where regionalization and bordering, homogenisations and differentiations, centrifugal and centripetal forces proceed side-by-side, in an explicit attempt to construct a selective, mobile and fragmented border. A specific focus is devoted to the diversity of geo-strategies the EU is pursuing in its neighbouring countries and regions, macro-regional strategies and cross-border cooperation initiatives as new scales of cooperation, and the role of other global players.

**The Integrated Reporting Movement** Avichal Publishing Company  
"Messrs. Gow and Kells have made an invaluable contribution, writing in an amused tone that nevertheless acknowledges the firms' immense power and the seriousness of their neglect of traditional responsibilities. 'The Big Four' will appeal to all those interested in the future of the profession--and of capitalism itself." —Jane Gleeson-White, Wall Street Journal  
With staffs that are collectively larger than the Russian army and combined revenues of over \$130 billion a year, the Big Four accounting firms—Deloitte, PricewaterhouseCoopers, Ernst & Young, and KPMG—are a keystone of global commerce. But leading scholar Ian Gow and award-winning author Stuart Kells warn that a house of cards may be about to fall. Stretching back to the Medicis in Renaissance Florence, this book is a fascinating story of wealth, power, and luck. The founders of the Big Four lived surprisingly colorful lives. Samuel Price, for example, married his own niece. Between the world wars, Nicholas Waterhouse collected postage stamps while also hosting decadent parties in his fashionable London home. All four firms have endured major calamities in recent decades. There have been hundreds of court cases and legal prosecutions for failed audits, tax scandals, and breaches of independence. The firms have come so close to "extinction level events" that regulators have required them to prepare "living wills." And today, the Big Four face an uncertain future—thanks to their push into China, their vulnerability to digital disruption and

competition, and the hazards of providing traditional services in a new era of transparency. This account of the past, present, and likely future of the Big Four is essential reading for anyone perplexed or fascinated by professional services, working or considering working in the industry, or simply curious about the fate of the global economy.

**Financial Accounting** Oswaal Books and Learning Private Limited

How do public spaces generate accountability and advance social equity? Stimulating the conversation, this volume explores the creation of meaning, the increasing confrontation between regulators and the community they are purported to serve, and the prevalent conflicts in seeking a balancing of social and economic interests.
