Routledge Handbook of International Criminology

Crime is undergoing a metamorphosis. The online technological revolution has created new opportunities for a wide variety of crimes which can be perpetrated on an industrial scale, and crimes traditionally committed in an offline environment are increasingly being transitioned to an online environment. This book takes a case study-based approach to exploring the types, perpetrators and victims of cyber frauds. Topics covered include: An in-depth breakdown of the most common types of cyber fraud and scams. The victim selection techniques and perpetration strategies of fraudsters. An exploration of the impact of fraud upon victims and best practice examples of support systems for victims. Current approaches for policing, punishing and preventing cyber frauds and scams. This book argues for a greater need to understand and respond to cyber fraud and scams in a more effective and victim-centred manner. It explores the victim-blaming discourse, before moving on to examine the structures of support in place to assist victims, noting some of the interesting initiatives from around the world and the emerging strategies to counter this problem. This book is essential reading for students and researchers engaged in cyber crime, victimology and international fraud.

Abby Ellin was shocked to learn that her fiancé was leading a secret life. But as she soon discovered, the world is full of people who aren't what they seem. From Abby Ellin's first date with the Commander, she was caught up in a whirlwind. Within six months he'd proposed, and they'd moved in together. But soon, his exotic stories of international espionage began to unravel. Finally, it all became clear: he was lying about who he was. After leaving him and sharing her story, she was floored to find out that her experience was far from unique. People everywhere, many of them otherwise sharp-witted and self-aware, are being deceived

by their loved ones every day. In *Duped*, Abby Ellin studies the art and science of lying, talks to people who've had their worlds upended by duplicitous partners, and writes with great openness about her own mistakes. These remarkable stories reveal how often we encounter people whose lives beneath the surface are more improbable than we ever imagined.

"In light of the increasing adoption of technology, it is critical that researchers explore the complex effects of computer technology on human behavior and the intersection of real world and virtual experiences. *Crime Online* uses empirical tests and unique data to provide detailed criminological explorations of multiple forms of cybercrime, including phishing, hacking, and sex crimes. This text also includes a comprehensive exploration of cyberterrorism and activism in online environments. The law enforcement and policy responses to cybercrimes at the local, state, and federal level are also discussed in detail. This work provides practical policy discussions that will benefit academics, law enforcement, legal counsel, and students at the undergraduate and graduate level"--

"*The Iliad of the Iraq war*" (Tim Weiner)--a gut-wrenching, beautiful memoir of the consequences of war on the psyche of a young man. *Eat the Apple* is a daring, twisted, and darkly hilarious story of American youth and masculinity in an age of continuous war. Matt Young joined the Marine Corps at age eighteen after a drunken night culminating in wrapping his car around a fire hydrant. The teenage wasteland he fled followed him to the training bases charged with making him a Marine. Matt survived

the training and then not one, not two, but three deployments to Iraq, where the testosterone, danger, and stakes for him and his fellow grunts were dialed up a dozen decibels. With its kaleidoscopic array of literary forms, from interior dialogues to infographics to prose passages that read like poetry, Young's narrative powerfully mirrors the multifaceted nature of his experience. Visceral, ironic, self-lacerating, and ultimately redemptive, Young's story drops us unarmed into Marine Corps culture and lays bare the absurdism of 21st-century war, the manned-up vulnerability of those on the front lines, and the true, if often misguided, motivations that drove a young man to a life at war. Searing in its honesty, tender in its vulnerability, and brilliantly written, *Eat the Apple* is a modern war classic in the making and a powerful coming-of-age story that maps the insane geography of our times.

Cyber Crime and the Victimization of Women Prentice Hall
Fraud, like other crime, can best be explained by three factors: a supply of motivated offenders, the availability of suitable targets and the absence of capable guardians-control systems or someone "to mind the store", so to speak (Cohen & Felson 1979). In this, the first of two papers, the authors focus on motivation and other psychological aspects of fraud. They identify a number of psychological correlates of fraud offending, but note that these are by no means unique to fraud, and do not necessarily differentiate fraudsters from law-abiding citizens. The other two factors, opportunities and guardianship, provide more scope for fraud control and are addressed in a companion paper on "red flags", or situational indicia, of fraud risk.

Nils Christie's (1986) seminal work on the 'Ideal Victim' is reproduced in full in this edited collection of vibrant and provocative essays that respond to and update the concept from a range of thematic positions. Each chapter celebrates and commemorates his work by analysing, evaluating and critiquing the current nature and impact of victim identity, experience, policy and practice. The collection expands the focus and remit of 'victim studies', addressing key themes around race, gender, faith, ability and age while encompassing new and diverse issues.

Examples include sex workers as victims of hate crimes, victims' experiences of online fraud, and recognising historic child sexual abuse victims in Ireland. With contributions from an array of academics including Vicky Heap (Sheffield Hallam University), Hannah Mason-Bish (University of Sussex) and Pamela Davies (Northumbria University), as well as a Foreword by David Scott (The Open University), this book evaluates the contemporary relevance and applicability of Christie's 'Ideal Victim' concept and creates an important platform for thinking differently about victimhood in the 21st century.

Are you at risk of being scammed? Former con artist and bestselling author of *Catch Me If You Can* Frank Abagnale shows you how to stop scammers in their tracks. Maybe you're wondering how to make the scam phone calls stop. Perhaps someone has stolen your credit card number. Or you've been a victim of identity theft. Even if you haven't yet been the target of a crime, con artists are always out there, waiting for the right moment to steal your information, your money, and your life. As one of the world's most respected authorities on the subjects of fraud, forgery, and cyber security, Frank Abagnale knows how scammers work. In *Scam Me If You Can*, he reveals the latest tricks that today's scammers, hackers, and con artists use to steal your money and personal information--often online and over the phone. Using plain language and vivid examples, Abagnale reveals hundreds of tips, including: The best way to protect your phone from being hacked The only time you should ever use a debit card The one type of photo you should never post on social media The only conditions under which you should use WiFi networks at the airport The safest way to use an ATM With his simple but counterintuitive rules, Abagnale also makes use of his

insider intel to paint a picture of cybercrimes that haven't become widespread yet.

The Routledge Handbook of International Criminology brings together the latest thinking and findings from a diverse group of both senior and promising young scholars from around the globe. This collaborative project articulates a new way of thinking about criminology that extends existing perspectives in understanding crime and social control across borders, jurisdictions, and cultures, and facilitates the development of an overarching framework that is truly international. The book is divided into three parts, in which three distinct yet overlapping types of crime are analyzed: international crime, transnational crime, and national crime. Each of these perspectives is then articulated through a number of chapters which cover theory and methods, international and transnational crime analyses, and case studies of criminology and criminal justice in relevant nations. In addition, questions placed at the end of each chapter encourage greater reflection on the issues raised, and will encourage young scholars to move the field of inquiry forward. This handbook is an excellent reference tool for undergraduate and graduate students with particular interests in research methods, international criminology, and making comparisons across countries.

Cybercrime and Society Routledge

This book provides students with a comprehensive and engaging introduction to the study of criminology by taking an interdisciplinary approach to explaining criminal behaviour and criminal justice. It is divided into two parts, which address the two essential bases that form the discipline of criminology. Part One describes, discusses and evaluates a range of theoretical approaches that have offered explanations for crime. Part Two offers an accessible but detailed review of the major philosophical aims and sociological theories of punishment, and examines the main areas of the contemporary criminal justice system.

Attention Servicemember is Ben Brody's searing elegy to the experience of the American wars in Iraq and Afghanistan. Brody

was a soldier assigned to make visual propaganda during the Iraq War. After leaving the army, he traveled to Afghanistan as an independent civilian journalist. Returning to rural New England after 12 years at war, he found his home unrecognizable - even his own backyard radiated menace and threat. So he continued photographing the war as it exists in his own mind. This critically-acclaimed photobook was shortlisted for the Aperture-Paris Photo First Book Award and is now in its second printing.

Scam Me If You Can Routledge

Ethics, Value, and Reality is a collection of essays written after Kolnai settled in England in 1955. These essays from Kolnai's mature years sit atop a remarkable gestation of moral and political thinking. At the heart of his thought is the special role of privilege in a good social order. Kolnai relies heavily on the work of late nineteenth- and early twentieth-century value theorists such as Alexius Meinong, Nicolai Hartmann, and Max Scheler. He blends this continental tradition of ethics with British intuitionism and Scottish Enlightenment articulations. For Kolnai, ethical life cannot be adequately understood except by reference to moral emphasis, and thus, Kolnai can be thought of as a liberal conservative. He acknowledges myriad values, moral and non-moral, and accepts that all can have some claim upon us. Low values as much as high values have a legitimate claim. His is a tolerant conservatism though not for a moment does he forgo the necessity of judgment: a readily graspable hierarchy keeps the respective demands of values in proportion. Kolnai welcomes the call to seriousness, which is the hallmark of existentialism. The ground of Kolnai's thought is the idea of emotion as cognitive. He saw the typical analytical philosopher's fascination with simplicity of explanation not only thoroughly refuted by the gains in understanding wrought by phenomenological method, with its deference to the richness of phenomena, but sensed in the monistic inclination he dreaded a harbinger of totalitarianism. Never denying his emotionalism, he nonetheless made his points well enough by adopting an analytical approach to philosophy and ethics. This is a major work crossing moral and political philosophy.

Debby Montgomery Johnson is a woman on a mission. In her book she shares her personal experience with a love that turned into betrayal and financial disaster and she removes the mask of

shame and shows others how do to the same. Many of us have something, something we're hiding, something we're ashamed of, something that through no fault of our own or through our own making, something that we keep hidden and that, in turn, keeps us hidden, from each other and the world.

The emergence of the World Wide Web, smartphones, and computers has transformed the world and enabled individuals to engage in crimes in a multitude of new ways. Criminological scholarship on these issues has increased dramatically over the last decade, as have studies on ways to prevent and police these offenses. This book is one of the first texts to provide a comprehensive review of research regarding cybercrime, policing and enforcing these offenses, and the prevention of various offenses as global change and technology adoption increases the risk of victimization around the world. Drawing on a wide range of literature, Holt and Bossler offer an extensive synthesis of numerous contemporary topics such as theories used to account for cybercrime, policing in domestic and transnational contexts, cybercrime victimization and issues in cybercrime prevention. The findings provide a roadmap for future research in cybercrime, policing, and technology, and discuss key controversies in the existing research literature in a way that is otherwise absent from textbooks and general cybercrime readers. This book is an invaluable resource for academics, practitioners, and students interested in understanding the state of the art in social science research. It will be of particular interest to scholars and students interested in cybercrime, cyber-deviance, victimization, policing, criminological theory, and technology in general.

LEARN HOW TO PROTECT YOUR HEART AND MONEY - RIGHT NOW! Out of the billions people existing, millions of them find true love let alone getting a date difficult. Once a person competes in the dating arena, factors such as age, religion, habits, and hobbies often become core obstacles to his love life. There is no wonder that this 2015, in the U.S alone, 49,250,000 people have tried online dating. But the algorithms have only credited to 20% committed relationships. One of the main problems is the active presence of romance scams. Scammers pretending to be dedicated lovers have earned millions from their victims. They would use an attractive profile then take it down to convince a victim of their commitment. A pro scammer would use certain techniques to ensure that the victim is blinded by love. Eventually, the scammer would persuade his victim to provide financial assistance and in the worst scenarios, endanger a victim's life. In this book, you will find: - What exactly is a romance scam - How to identify a scammer by profile - Scammers' psychological tips - Safety online: what you can do to protect yourself - The testimonies of real victims - Best actions when you are in a scam: how not to leave a stinker unpunished
Cybercrime in Progress Open Road Media
Our knowledge of crime is based on three types of sources: the criminal justice system, victims, and offenders. For technological and other reasons the criminal justice system produces an increasing stream of information on crime. The rise of the victimization survey has given the victims a much larger role in our study of crime. There is, however, no concomitant development regarding offenders. This is unfortunate because

offenders are the experts when it comes to offending. In order to understand criminal behavior, we need their perspective. This is not always a straightforward process, however, and information from offenders is often unreliable. This book is about what we can do to maximise the validity of what offenders tell us about their offending. Renowned experts from various countries present their experiences and insights, with a clear focus on methodological issues of fieldwork among various types of offender populations. Each contribution deals with with a few central issues: How can offenders be motivated to participate in research? How can offenders be motivated to tell the truth on their offending? How can the information that offenders provide be checked and validated? What can we learn from offenders that cannot be accessed from other sources? With the aim of obtaining valid and reliable information, how, where and under which conditions should we observe offenders and talk to them?
