are central to assisting the development in our understanding of how UK and global democracy is being manifested in contemporary times. This book explores these topics through presenting a wide range of perspectives from research conducted by leading international scholars, and concludes with an assessment of the potential democratic and international implications for the future. By grappling with a highly important and controversial topic in a comparative and varied way, the volume contributes to theoretical debates about the nature and role of the media in complex social, political and cultural contexts.

Brexit and Internal

Security Routledge

Perhaps the most extraordinary period in modern British history, the years between the Great Recession and Brexit have often been dubbed 'the lost decade' because of the economic and political turmoil caused by those two great events. Michael Burton outlines how the first led to the second, assisted by a rare confluence of other, often unrelated, social and political factors that delivered the shock Leave verdict in the EU referendum of 2016. These included the longstanding grievances of voters in former industrial areas feeling left behind by globalism, stagnant incomes after the recession, austerity, the rise of social media, the refugee and

Eurozone crisis in Europe, the deep split in the Conservative and Labour parties over the EU and rising wealth inequalities. The author also charts the chaotic political landscape that ended in the final Brexit deal. This book is ideal for the general reader as well as for students of politics, history and economics needing a concise and well-explained account of this turbulent period in British history.

Reporting the Road to Brexit Vernon Press

The UK car industry is in crisis. There can be no doubt about that. But the exact causes are a matter of intense debate. Is it a perfect storm of diesel phobia, electric adulation, urban congestion and millennial minimalism that has led to a

sudden downturn in our near century-long love affair with the motor car? Whether you see the UK leaving the EU as an insurmountable hurdle for British car makers or a unique situation that throws up opportunities for them, 'Keeping the Wheels on the Road' is essential reading to inform your views, no matter if you're a Remainer or Leaver. The book analyses the current position of the UK's car industry, the range of pressures and issues it faces and its likely shape after any form of Brexit from a range of perspectives.

The Rise of the Right

Oxford University Press
Russia's intervention in the Ukraine, Donald Trump's presidency and instability in the Middle East are just a

few of the factors that have brought an end to the immediate post-Cold War belief that a new international order was emerging: one where fear and uncertainty gave way to a thick normative and institutional architecture that diminished the importance of material power. This has raised questions about the instruments we use to understand order in Europe and in international relations. The chapters in this book aim to assess whether foreign policy actors in Europe understand the international system and behave as realists. They ask what drives their behaviour, how they construct material capabilities and to what extent they see material power as the

means to ensure survival. They contribute to a critical assessment of realism as a way to understand both Europe's current predicament and the contemporary international system.

The UK's Changing Democracy Springer

This book traces how right-wing newspapers in Britain helped shape British public opinion about the European Union over the course of the 20 years preceding the EU referendum in June 2016. The author argues that newspapers such as the Telegraph, Mail, Sun and Express have been effectively waging a long-term propaganda war, with the distortions and borderline fake news presented one of the factors that helped

secure the narrow majority for Brexit. Written by an EU insider, the book presents hard facts and debunks the core myths on EU laws, exorbitant budget contributions and uncontrolled immigration, and contributes to the broader debate on the importance of the press for democracy.

One of the principal arguments put forth by Brexit supporters is that by freeing the UK from the stranglehold of EU law, the country will be able to expand its markets through increased bilateral trade and enhance economic growth. This book tests this proposition by reference to the car industry. Brexit and the

Car Industry explores the international position of the car market to argue that the hope of Brexit bringing regulatory freedom is illusory. The book starts by examining the structure of the vehicle industry, how its regulatory framework evolved and how the environment in which it operates is constrained by international standards and the practicalities associated with trading across different regulatory systems. By examining the evolution of vehicle regulations, particularly related to the environment, it argues that a UK independent path is not only impractical but self-defeating. The private car market is structured in such a

way that is global, and meeting the various international regulatory requirements is a price of entry requirement which no bilateral trade agreements are likely to alter. The book also considers changing environment affecting the car industry in the context of an aspiration for regulatory freedom. The response to climate change and the impact of technological change - specifically driverless vehicles - are big questions for the industry and both are examined in this book. The book also considers the emergence of large metropolitan areas imposing their own use and environmental requirements operating separately to national standards. The future

of electric and autonomous vehicles combined with the complexity of the regulatory environment with both international and localised pollution measures make the UK navigating a safe independent path through with a viable car industry highly questionable. Providing a comprehensive review of the relationship between regulatory frameworks and free trading models, this book is aimed at industry and legal professionals. It will also be of interest to students studying market behaviour, free trade law and the free movement of goods, and environmental protection.

How Brexit will work for Britain and Europe

FULLY REVISED

EDITION FOR THE UK'S PATH TO BREXIT

Making a Success of Brexit and Reforming the EU is the authoritative text on the EU and the Brexit debate. This major new edition lays out how the UK can best make a success of Brexit and the place of Europe in the new, Trumpian world. In a major rewrite, award-winning economist Roger Bootle addresses the issues of trading relationships, hard versus soft Brexit, concerns of key industries, Scotland and the future of the EU and NATO. Roger Bootle, the author who successfully predicted the financial crash and the outcome of the

referendum, will also examines the possible future developments of Europe.

The Law & Politics of Brexit Routledge

Highlighting the challenges and prospects of European security cooperation, this volume examines the impact of Brexit on strategic aspects of security, peace, defence and foreign policy for both the European Union and the UK. It applies theoretical and methodological approaches from international relations and security studies to analyse the causal mechanisms of security cooperation, and covers topics including innovative security technologies, defence procurement, EU-NATO relations, new capabilities

frameworks (such as PESCO, EDF and EII), the role of French-German military cooperation, and the implications of Brexit for European deterrence or the Northern Ireland peace process. The findings contribute to a better understanding and management of anticipated challenges and sources of instability in post-Brexit Europe.

Brexit Routledge
Edited by John Mair, Tor Clark, Neil Fowler, Raymond Snoddy and Richard Tait They were the two volcanic surprises in world politics in 2016 - Brexit, the UK vote to leave the European Union in June, and the election of Donald Trump as the 45th President of the United States in November.

Neither was predicted by the polls, neither pleased the establishment in both countries. Both will have long-term ramifications, good and bad, for decades to come. But what role did the media on both sides of the Atlantic play as midwives to these 'populist' revolts? Was it wary enough? Did the media, in all its various forms, act as watchdog or lapdog? With the 2017 UK General Election results fresh in our minds, this is a timely and cogent analysis of how we arrived at where we are. This book - the 20th in the acclaimed Abramis 'hackademic' series (mixing academics and journalists between the same covers) attempts to answer those big

questions and more. The contributors include some of journalism and academia's most distinguished names, from the introduction by Channel 4's Jon Snow through to the postscript by the BBC's Nick Robinson. *Brexit and Democracy* Random House

Neil Archer's original study makes a timely and politically-engaged intervention in debates about national cinema and national identity. Structured around key examples of 'culturally English cinema' in the years up to and following the UK's 2016 vote to leave the European Union, *Cinema and Brexit* looks to make sense of the peculiarities and paradoxes marking this era of filmmaking. At the same time as

providing a contextual and analytical reading of 21st century filmmaking in Britain, Archer raises critical questions about popular national cinema, and how Brexit has cast both light and shadow over this body of films. Central to Archer's argument is the idea that Brexit represents not just a critical moment in how we will understand future film production, but also in how we will understand production of the recent past. Using as a point of departure the London Olympics opening ceremony of 2012, *Cinema and Brexit* considers the tensions inherent in a wide range of films, including *Skyfall* (2012), *Dunkirk* (2017), *Their Finest* (2017), *Darkest Hour* (2017),

The Crown (Netflix, 2016), Paddington (2014), Paddington 2 (2017), Never Let Me Go (2011), Absolutely Fabulous: The Movie (2016), The Trip (2010), The Inbetweeners Movie (2011), Mr. Bean's Holiday (2007), The World's End (2013), Sightseers (2012), One Day (2011), Attack the Block (2011), King Arthur: Legend of the Sword (2017) and The Kid Who Would be King (2019). Archer examines the complex national narratives and representations these films expound, situating his analyses within the broader commercial contexts of film production beyond Hollywood, highlighting the negotiations or contradictions at play between the industrial imperatives of

contemporary films and the varied circumstances in which they are made. Considering some of the ways a popular and globally-minded English cinema is finding means to work alongside and through the contexts of Brexit, he questions what are the stakes for, and possibilities of, a global 'culturally English cinema' in 2019 and beyond.

Fear and Uncertainty in Europe

A robust and timely investigation into the political and moral fault-lines that divide Brexit Britain and Trump's America -- and how a new settlement may be achieved. Several decades of greater economic and cultural openness in

the West have not benefited all our citizens. Among those who have been left behind, a populist politics of culture and identity has successfully challenged the traditional politics of Left and Right, creating a new division: between the mobile "achieved" identity of the people from Anywhere, and the marginalized, roots-based identity of the people from Somewhere. This schism accounts for the Brexit vote, the election of Donald Trump, the decline of the center-left, and the rise of populism across Europe. David Goodhart's compelling investigation of the new global politics reveals how the Somewhere backlash is a democratic response

to the dominance of Anywhere interests, in everything from mass higher education to mass immigration. *Road to Brexit* Springer
This book explores the viability of future UK-EU internal security arrangements in light of Brexit, including their impact on the UK's and the EU's security and international standings. The authors discuss on-going negotiations and address the main political and legal concerns of possible future arrangements. As the UK prepares to leave the EU, the country is faced with having to develop new cooperation models with its neighbours to fight growing transnational security threats, as well as new strategies to maintain its leading role as an

international security actor. In exploring these issues, the book aims to contribute to the general knowledge on the risks and opportunities associated with the disentanglement of the UK from European internal security cooperation; to shed more light on the debates surrounding the negotiations; and to inform the policy discussions that form the basis of proposed cooperation models and that are likely to significantly shape the future UK-EU security relationship.

The Governance of Agriculture in Post-Brexit UK

Liberal left orthodoxy holds that Brexit is a disastrous coup, orchestrated by the hard right and fuelled

by xenophobia, which will break up the Union and turn what's left of Britain into a neoliberal dystopia. Richard Tuck's ongoing commentary on the Brexit crisis demolishes this narrative. He argues that by opposing Brexit and throwing its lot in with a liberal constitutional order tailor-made for the interests of global capitalists, the Left has made a major error. It has tied itself into a framework designed to frustrate its own radical policies. Brexit therefore actually represents a golden opportunity for socialists to implement the kind of economic agenda they have long since advocated. Sadly, however, many of them have lost faith in the kind of popular revolution that the

majoritarian British constitution is peculiarly well-placed to deliver and have succumbed instead to defeatism and the cultural politics of virtue-signalling. Another approach is, however, still possible. Combining brilliant contemporary political insights with a profound grasp of the ironies of modern history, this book is essential for anyone who wants a clear-sighted assessment of the momentous underlying issues brought to the surface by Brexit.

The Future of Europe

UCL Press

The European Union after Brexit addresses the forces and mechanisms at work during an unprecedented transformation of the

European polity. How will the EU operate without one of its key diplomatic and international military partners? What will happen to its priorities, internal balance(s) of power and legislation without the reliably liberal and Eurosceptic United Kingdom? In general, what happens when an 'ever closer union' founded on a virtuous circle of economic, social, and political integration is called into question? Though this volume is largely positive about the future of the EU after Brexit, it suggests that the process of European integration has gone into reverse, with Brexit coming amidst a series of developments that have disrupted the optimistic trajectory of integration. Covering

topics such as international trade, freedom of movement, and security relations, this book answers a need for a one-stop source of strong research-based discussions of Brexit. *The European Union after Brexit* Manchester University Press

The Left Case for Brexit Cambridge University Press

The decision made by

the United Kingdom in 2016 to leave the European Union has produced shock waves across Europe and the world. Brexit calls into question consolidated assumptions on the finality of the EU, and simultaneously sparks new challenges. These new challenges are not only in regard of the constitutional settlements reached in the UK, notably in Scotland and Northern Ireland, but also on the future of European integration. Now that Article 50 of the Treaty on the European Union has been invoked, and the path towards full withdrawal by the UK from the EU remains clouded in uncertainties, a comprehensive legal and political analysis of how Brexit impacts on UK and the EU appears

of the utmost importance. This book brings together leading lawyers, economists and political scientists to discuss the constitutional implications of Brexit and propose possible solutions for the way forward. The book is structured around four main themes. First, it considers how Brexit will be implemented legally and politically, in terms of the withdrawal and the possible new relations between the UK and the EU. Second, it examines the implications of Brexit on the constitutional structure of the UK, as well as on the status of Northern Ireland and the relations with the Republic of Ireland. Third, it examines the implications of Brexit on the constitutional

structure of the EU, focusing on a number of key areas of EU policy-making, notably the Area of Freedom Security and Justice, the Single Market, and Economic and Monetary Union. Finally, the book looks to the mid to long-term future, and discusses the prospects for relaunching the EU after Brexit.

The Psychology of Brexit examines the psychological causes, catalysts, and consequences of Brexit. Unlike most cultural upheavals, Brexit is not the result of accidental tragedy or spontaneous economic turmoil. Rather, it exists because people decided to make it exist. It is a product of

human psychology – shaped in critical ways by people’s perceptions, preferences, choices, self-images, attitudes, ideas, assumptions, group relations, and reasoned (or ill-reasoned) conclusions. This book discusses how reasoning biases and illusions of control propel – and pollute – the perspective of both Leavers and Remainers. It shows how social stereotypes and motivated irrationality help otherwise groundless beliefs thrive in everyday culture, leading to group polarisation and echo-chamber reasoning. It reveals the way cultural biases like sexism influence how Brexit politicians are portrayed and perceived. And it

explores the psychological impact of Brexit – its effect on social attitudes, future thinking, and collective and individual mental health. In this compelling new book, psychologist Brian Hughes examines what scientific psychology reveals about the dynamics of Brexit, what Brexit teaches us about ourselves, and what we can do to deal with its short-term impact and long-term fallout.

The Road to Somewhere Cambridge University Press
 Long-term social and demographic changes - and the conflicts they create - continue to transform British politics. In this accessible and authoritative book Sobolewska and Ford show how deep the

roots of this polarisation and volatility run, drawing out decades of educational expansion and rising ethnic diversity as key drivers in the emergence of new divides within the British electorate over immigration, identity and diversity. They argue that choices made by political parties from the New Labour era onwards have mobilised these divisions into politics, first through conflicts over immigration, then through conflicts over the European Union, culminating in the 2016 EU referendum. Providing a comprehensive and far-reaching view of a country in turmoil, Brexitland explains how and why this happened, for students, researchers,

and anyone who wants to better understand the remarkable political times in which we live.

Brexitland Springer
Brexit traces the implications of the UK's projected withdrawal from the EU, placing short-term political fluctuations in a broader historical and social context of the transformation of European and global society. This book provides a forum for leading Eurosociologists (broadly defined), working inside and outside the UK, to rethink their analyses of the European project and its prospects, as well as to reflect on the likely implications for the UK.

Territorial Disputes and State Sovereignty
Unbound Publishing

With a Foreword by the President of the European Parliament, Antonio Tajani. This book sheds light on the political dynamics within the EU member states and contributes to the discussions about Europe. Authors from all member states as well as Iceland, Norway, Switzerland and Turkey assess how their country could get more involved in the European debate, taking the reader on a journey through various political landscapes and different views. The chapters cover issues ranging from a perceived lack of ambition at the periphery to a careful balancing act between diverse standpoints at the geographical centre. Yet, discussions share common

features such as the anxiety regarding national sovereignty, the migration and border discourse, security concerns as well as the obvious need to regain trust and create policies that

work. The book contributes vigorously to the debate about Europe in all capitals and every corner of the continent, because this is where its future will be decided.
