When was the last time you listened to someone, or someone really listened to you? "If you're like most people, you don't listen as often or as well as you'd like. There's no one better qualified than a talented journalist to introduce you to the right mindset and skillset—and this book does it with science and humor." -Adam Grant, #1 New York Times bestselling author of *Originals* and *Give and Take* **Hand picked by Malcolm Gladwell, Adam Grant, Susan Cain, and Daniel Pink for Next Big Ideas Club** "An essential book for our times." -Lori Gottlieb, New York Times bestselling author of *Maybe You Should Talk to Someone* At work, we're taught to lead the conversation. On social media, we shape our personal narratives. At parties, we talk over one another. So do our politicians. We're not listening. And no one is listening to us. Despite living in a world where technology allows constant digital communication and opportunities to connect, it seems no one is really listening or even knows how. And it's making us lonelier, more isolated, and less tolerant than ever before. A listener by trade, New York Times contributor Kate Murphy wanted to know how we got here. In this always illuminating and often humorous deep dive, Murphy explains why we're not listening, what it's doing to us, and how we can reverse the trend. She makes accessible the psychology, neuroscience, and sociology of listening while also introducing us to some of the best listeners out there (including a CIA agent, focus group moderator, bartender, radio producer, and top furniture salesman). Equal parts cultural observation, scientific exploration, and rousing call to action that's full of practical advice, *You're Not Listening* is to listening what Susan Cain's *Quiet* was to introversion. It's time to stop talking and start listening.

With warmth and a touch of humor, personal coach and expert communicator Becky Harling shares simple, practical listening tools that will help you become a person others are drawn to and want to spend time with, as well as how to: · be fully present · offer understanding instead of advice · ask great questions · create a sense of safety and trust · manage your body language ·

With a light touch and sensible techniques, Dr. Jim Petersen distills years of counseling and pastoral ministry into an informal volume loaded with practical tips, examples and techniques to practice. His book highlights our culture's courtroom-like communication that often puts people at odds with each other. Most people think they listen well but don't and folks walk away unheard, misunderstood and disconnected. Readers will chuckle in recognition at the tongue-in-cheek but spot-on "flat-brain" theory of emotions. It shows how and why we get upset and confused in tense situations and what to do about it. It lays the practical groundwork to better manage emotionally loaded situations. This book shows communication that works and is equally appropriate for professionals, such as pastors and therapists and for the general public. The ingenious Talker-Listener Card gives a taking-turn method to end arguing as we know it. It works for couples, business relationships, church listening programs, counselors, group discussions and the family dinner table listening game. Thirty listening techniques will help the reader immediately begin to turn enemies into friends, poor relationships into decent ones and good relationships into better ones. These accessible skills are being used in pastoral counseling classes, counseling offices, church staffs, professional offices, on dates, in corporate board rooms and at kitchen tables around the country .

The diverse and difficult needs of today's children far outstrip the ability of any one institution to meet them. Yet one of the richest resources for understanding a child's early learning experiences-parents-is quite often the most frequently overlooked. A Path to Follow suggests that parent "stories" can be a highly effective, collaborative tool for accessing knowledge that may not be obvious, but would obviously be of benefit. Pat Edwards and her coauthors have here defined "stories" as narratives gained from open-ended conversations and/or interviews, where parents respond to questions designed to shed light on traditional and nontraditional early literacy activities in the home. After all, as a child's first and most important teacher, a parent can offer memories of specific formative interactions, observations on early learning efforts, and thoughts on how their own backgrounds have impacted a child's attitude toward school. In sharing their anecdotes and observations, parents give us the keys to unlock a vault of social, emotional, and educational variables. The secondary benefit to the story approach, of course, is the empowerment that parents feel when they are given the chance to participate in a personally meaningful way-one that respects their viewpoint. As parents and schools continue to wrestle with prodigious challenges-shifting family demographics, time constraints, cultural divides, privacy issues, and of course, economics-stories remain a nonthreatening and practical vehicle for collaboration. With its step-by-step approach to creating parent story programs, sample questions, case studies, and useful guidelines on collecting and interpreting data, A Path to Follow will be hailed as a detailed and innovative roadmap to involving the whole community in a child's education.
