### EMILIO KALEIGH

*Employment, Growth, and Price Levels* Springer

Raymond F. Mikesell deals with sources of conflict between private foreign investors and the governments of developing countries. He concludes that government ownership and control will expand and that foreign investors are most likely to become sellers of their special services rather than remain investors who act freely for the benefit of parent companies. Originally published in 1971.

**Moody's Public Utilities** Springer

This book brings together for the first time in a single volume a complete survey of the theoretical foundations of economic aid policies and a critical analysis of aid programs and practices. The book focuses on the contributions of familiar economic growth models and other economic and social theories of development to foreign aid practices, and provides a broad and penetrating overview of the economics of foreign aid. At the macroanalytical level, the author investigates the savings constraint and the foreign exchange constraint approaches and the models employed for determining the quantity of external capital required for achieving growth goals under varying economic conditions in the recipient economies. The

author examines other approaches to aid requirements (including the capital absorptive approach), analyzes debt service capacity, and reviews various debt cycle models. The nature and significance of indicators of economic performance are investigated, and both theoretical and practical policy issues relating to the employment of aid as a means of influencing domestic policies are analyzed. In his final chapter, the author applies his theoretical conclusions to the formulation of an integrated approach to foreign aid, encompassing the major foreign assistance problems faced today. A clear and comprehensive text for every student of development economics, as well as the most thorough reference of its kind for professional economists, the book, a volume in the Aldine Treatises in Modern Economics series, will be useful to all who are concerned with the analysis, development, and execution of aid programs.

**Foreign Investment in the Petroleum and Mineral Industries** Routledge

This study of the world mineral industry examines its structure, objectives, and operation, and the major factors bearing on them, such as the physical characteristics of mineral resources, economies of scale, capital requirements, and economic and political risk. The authors also survey the nature of production, consumption, trade patterns, the industry's effect on development, the behavior of mineral prices, and the principal problems and challenges facing the industry in the years ahead.

*Towards a New International Marine Order* Routledge

Sustainability is a key issue and its impact on the construction industry, as one of the major users of the Earth's resources, is starting to take hold. This book deals with sustainability as it affects the construction industry, looking at the techniques and issues which designers, engineers, planners and construction managers will have to deal with in their day-to-day activities. It covers methods of analysis such as environmental impact assessment and cost-benefit analysis as well as topics on design and energy regulation and conservation. The book is an important introduction to the subject for senior undergraduate and postgraduate students. Given the importance and novelty of the subject, professionals in the construction industry will also find the book valuable.

*The Economics of Foreign Aid* Routledge

This fourth edition of an enduring and popular book has been fully updated and revised, exploring the two opposing paradigms of sustainability in an insightful and accessible way. Eric Neumayer contends that central to the debate on sustainable development is the question of whether natural capital can be substituted by other forms of capital. Proponents of weak sustainability maintain that such substitutability is possible, whilst followers of strong sustainability regard natural capital as non-substitutable. The author examines the availability of natural resources for the production of consumption goods and the environmental consequences of economic growth. He identifies the critical forms of natural capital in need of preservation given risk, uncertainty and ignorance about the future and opportunity costs of preservation. He goes on to provide a critical discussion of measures of sustainability. Indicators of weak sustainability such as Genuine Savings and the Index of Sustainable Economic Welfare  $\bar{D}$  also known as the Genuine Progress Indicator  $\bar{D}$  are analysed, as are indicators of strong sustainability, including ecological footprints, material flows and sustainability gaps. This book will prove essential reading for students, scholars and policymakers with an interest in ecological and environmental economics and sustainable development.

**Weak Versus Strong Sustainability** Taylor & Francis

This book brings together key, incisive writings (published and unpublished) of the late Andre Gunder Frank on world development and world history. The selections provide the reader with a historical tracing of Gunder Frank's conceptual thinking on development, through to his views on world history, world development and globalization.

*Nonmetro, Metro, and U.S. Bank-operating Statistics, 1987-89* Zed Books

Our lives are all affected by three hugely powerful and well financed, but undemocratic, organizations: the International Monetary Fund, the World Bank and the World Trade Organization. These institutions share a common ideology. They aggressively promote "corporate" capitalism, neoliberalism, giving free rein to the interests of a small number of transnational corporations. This book presents the history and fundamental ideas of this economic ideology. Describing each member of the "unholy trinity," it shows how neoliberalism hijacked the IMF, World Bank and WTO in relation to their global financial, development and trade management roles.

**The English Catalogue of Books ...** The Capitol Net Inc

Explores the possibility of combining three economically desirable goals: an adequate rate of economic growth, substantially full employment or maximum employment, and substantial price stability. pt. 6c: Contains answers to questions on monetary policy and debt management submitted to the Secretary of the Treasury, the Chairman of the Board of Governors of the Federal Reserve System, and 17 firms dealing in Government securities.

pt. 10: Contains written responses from Treasury Dept and Federal Reserve Board to questions submitted by Joint Economic Committee on the Government's management of its monetary, fiscal, and debt operations.

*Broadcasting & Cable Yearbook* Martinus Nijhoff Publishers

Consists of various reprints from the Congressional Research Service including: Introduction to the Federal budget process by Robert Keith and various publications on the budget process by Bill Heniff and others.

*Broadcasting & Cable Market Place* Routledge

First Published in 2011. This is Volume 6 of the library collection of seven on Natural Resource Management and gives an analysis of the structure, physical characteristics, economics and a survey of the world copper industry and of the problems with which policy makers and students of the industry are currently concerned. There is heavy emphasis on foreign investment in mining, especially in the Third World copper producing countries.

**United Nations Library on Transnational Corporations** Oxford University Press, USA

Explores the possibility of combining three economically desirable goals: an adequate rate of economic growth, substantially full employment or maximum employment, and substantial price stability. pt. 6c: Contains answers to questions on monetary policy and debt management submitted to the Secretary of the Treasury, the Chairman of the Board of Governors of the Federal Reserve System, and 17 firms dealing in Government securities.

pt. 10: Contains written responses from Treasury Dept and Federal Reserve Board to questions submitted by Joint Economic Committee on the Government's management of its monetary, fiscal, and debt operations

*Focus, Law of the Sea* Springer

Study of international monetary policy and the economic function of gold - covers moves of financial aspects capital, with special chapters on international liquidity for technological change, for economic development and for monetary stability.

*Moody's Manual of Railroads and Corporation Securities* Springer

Originally published in 1984, this study focuses on petroleum agreements between non-OPEC LDCs with oil-importing LDCs and how issues such as high oil prices affect each country. The information presented in this study was drawn from interviews with petroleum officials in petroleum companies, petroleum ministries and unpublished documents such as contracts and focussing on case studies of countries such as Peru, Guatemala and Malaysia. This title will be of interest to students of environmental studies and economics.

*Transnational Corporations and the Exploitation of Natural Resources* Durham, N.C. : Duke University Press

This collection of essays represents the proceedings of the conference of the Confederation of European Economic Associations at the University of Kent in 1986. Subjects include international migration, labour mobility and capital flows and movements.
