*Beyond Partition*

Routledge

In *Beyond Partition*,  
Deepti Misri shows how  
1947 marked the  
beginning of a history of  
politicized animosity  
associated with the  
differing ideas of "India"  
held by communities and  
in regions on one hand,

and by the political-  
military Indian state on  
the other. Assembling  
literary, historiographic,  
performative, and visual  
representations of  
gendered violence against  
men and women, she  
establishes that cultural  
expressions do not just  
follow violence but  
determine its very  
contours, and interrogates  
the gendered scripts  
underwriting the violence  
originating in the

contested visions of what  
"India" means. Ambitious  
and ranging across  
disciplines, *Beyond  
Partition* offers both an  
overview of and nuanced  
new perspectives on the  
ways caste, identity, and  
class complicate  
representations of  
violence, and how such  
representations shape our  
understandings of both  
violence and of India.  
*Relocating Modernization  
and Technology* SUNY

This surprising study draws together the disparate fields of postcolonial theory and book history in a challenging and illuminating way. Robert Fraser proposes that we now look beyond the traditional methods of the Anglo-European bibliographic paradigm, and learn to appreciate instead the diversity of shapes that verbal expression has assumed across different societies. This change of attitude will encourage students

and researchers to question developmentally conceived models of communication, and move instead to a re-formulation of just what is meant by a book, an author, a text. Fraser illustrates his combined approach with comparative case studies of print, script and speech cultures in South Asia and Africa, before panning out to examine conflicts and paradoxes arising in parallel contexts. The re-orientation of approach and the freshness of view offered by this volume will

foster understanding and creative collaboration between scholars of different outlooks, while offering a radical critique to those identified in its concluding section as purveyors of global literary power. After Said Edinburgh University Press  
 'This book convincingly challenges both the extremely short historical memory of most postcolonial work and the all-too-insularly English world still conjured by period specialists. Hogarthian whores and

Grub Street hacks, coffee houses and fashionable pastimes, and the burgeoning of print culture all stand revealed as intimately bound to portents of plantation insurgency, agitation for abolition, and the vast fortunes produced by the labouring bodies of the poor, the colonized, and the enslaved. Eighteenth-century studies has never appeared in a more engaged and fascinating light. Professor Donna Landry, University of Kent

In this volume Suvir Kaul addresses the

relations between literary culture, English commercial and colonial expansion, and the making of 'Great Britain' in the late seventeenth and eighteenth centuries. He argues that literary writing played a crucial role in generating the vocabulary of British nationalism, both in international terms and in attempts to realign political and cultural relations between England, Scotland, and Ireland. The formal innovations and practices characteristic of

eighteenth-century English literature were often responses to the worlds brought into view by travel writers, merchants, and colonists. Writers (even those suspicious of mercantile and colonial expansion) worked with a growing sense of a 'national literature' whose achievements would provide the cultural capital adequate to global imperial power, and would distinguish Great Britain for its twin success in 'arms and arts'. The book ranges from Davenant's

theatre to Smollet's Roderick Random to Phillis Wheatley's poetry to trace the impact of empire on literary creativity. Key Features\*An introduction to the impact of mercantilism and empire on the crafting of eighteenth-century British literature\*Encourages students to examine the key formal innovations that define eighteenth-century British literary history as they were produced by writers who redefined

that reevaluates the cultural and political understandings of the world today from the perspective of the south.

**Postcolonialism, Transnationalism, and Culture in the Maghreb and Beyond** Metropolitan Books

This volume explores how postcolonial texts have determined the evolution or emergence of specific formal innovations in narrative genres. While the prominence of questions of cultural identity in postcolonial studies has prevented due

attention to concerns of literary form and aesthetics, this book gives premium to the literary, aiming to delineate the evolution of specific narrative techniques as part of an emerging postcolonial aesthetics. Essays delineate elements of an emergent postcolonial narratology across a variety of seminal generic forms, such as the epic, the novel, the short story, the autobiography, and the folk tale, focusing on genre as a powerful tool for the historicizing of

literature and orature within cultural discourses. Investigating the heuristic value of concepts such as mimicry, writing back, translation, negotiation, or subversion, the book considers the value of explanatory paradigms for postcolonial generic models. It also explores the status of postcolonial comparative aesthetics versus globalization studies and liberal concepts of the transnational, taking issue with the prominence of Western concepts of identity in discussions of

postcolonial literature and the favoring of mimetic forms. This volume offers a unique contribution to the study of narrative genre in postcolonial literatures and provides valuable insight into the field of postcolonial studies on the whole.

### **The White Bone**

Routledge

Although the body has been a vast subject for postcolonial studies, few theorists have attempted to go beyond the simple mixing of races in examining the impact of colonialism on the

colonized body. However, as Deepika Bahri argues, it is essential to see the postcolonial body in a variety of forms: as capable of transformation not only in psyche and outward behavior but also in flesh and blood. European colonizers brought new ways of seeing the body in matters as basic as how to eat, speak, sit, shit, or spit. As nations decolonized, these imperialistic ideas remained, becoming part of the global economy of the body. In Postcolonial

Biology, Bahri argues that the political challenges of the twenty-first century require that we deconstruct these imperial notions of the body, as they are fundamental to power structures governing today's globalized world. Postcolonial Biology investigates how minds and bodies have been shaped by colonial contact, to create deeply embedded hierarchies among the colonized. Moving beyond "North/South" thinking, Bahri reframes the

questions of postcolonial bodies to address all societies, whether developed or developing. Engaging in innovative, highly original readings of major thinkers such as Adorno, Horkheimer, Derrida, and Fanon, this book brings an important new focus to the field of postcolonial studies--one that is essential to understanding the ideas and conflicts that currently dominate the global order.

### **India and the Politics of Postcolonial Nationalism**

Contemporary French and Franco  
The knowledge disseminated by universities and mobilized by states to govern populations has been globally dominant for more than a century. It first emerged in the early modern period in Europe and subsequently became globalized through colonialism. Despite the historical and cultural specificity of its origins, modern Western knowledge was thought to have transcended its particularities such that,

unlike pre-modern and non-Western knowledges, it was "universal," or true for all times and places. In this bold and ambitious book, Sanjay Seth argues that modern knowledge and the social sciences are a product of Western modernity claiming a spurious universality: that what we treat as the "truths" discovered by social scientific reason are instead a parochial knowledge. Drawing upon and deriving its critical energies principally from postcolonial theory, *Beyond Reason* traverses

many disciplines, including science studies, social history, art and music history, political science, and anthropology, and engages with a range of contemporary thinkers including Butler, Habermas, Chakrabarty, Chatterjee, and Rawls. It demonstrates that while global in their impact, the social sciences do not and cannot transcend the Western historical and cultural circumstances in which they emerged. If the social sciences are not explained and validated

simply by the fact that they are "true," it becomes possible to ask what purpose they serve, what it is that they "do." A defining feature of modern knowledge is that it is divided into disciplines, each with its own object of inquiry and corresponding protocols, and thus asking what such knowledge "does" requires asking what purpose disciplines serve. It also requires asking what ways of understanding the world they facilitate and what they disallow. Beyond

Reason proceeds to anatomize the disciplines of history and political science to ask what representations and relations with the past and with politics these academic disciplines enable, and what ways of understanding and engaging the world they foreclose.

#### Beyond Subculture

MacMillan

Social scientists have long been resistant to the set of ideas known as "postcolonial thought." Meanwhile, postcolonial scholars have considered

social science to be an impoverished discipline that is part of the intellectual problem for postcolonial liberation, not the solution. This divergence is fitting, given that postcolonial thought emerged from the anticolonial revolutions of the twentieth century and has since become an enterprise in the academic humanities, while social theory was born as an intellectual justification for empire and has since been institutionalized in social science. Given such

divisions - and at times direct opposition - is it possible to reconcile the two? Postcolonial Thought and Social Theory explores the divergences and generative convergences between these two distinct bodies of thought. It asks how the intellectually insurrectionary ideas of postcolonial thinkers, such as Franz Fanon, Amilcar Cabral, Edward Said, Homi Bhabha and Gayatri Spivak, among others, pose a radical epistemic challenge to social theory. It charts the

different ways in which social theory might be refashioned to meet the challenge and excavates the often hidden sociological assumptions of postcolonial thought. While various scholars suggest that postcolonial thought and social science are incompatible, this book illuminates how they are mutually beneficial, and argues for a third wave of postcolonial thought emerging from social science but also surmounting the narrow confines of disciplinary

boundaries.

Postcolonial Theory

Routledge

*Beyond Belief* is a bold rethinking of the formation and consolidation of nation-state ideologies.

Analyzing India during the first two decades following its foundation as a sovereign nation-state in 1947, Srirupa Roy explores how nationalists are turned into nationals, subjects into citizens, and the colonial state into a sovereign nation-state.

Roy argues that the postcolonial nation-state

is consolidated not, as many have asserted, by efforts to imagine a shared cultural community, but rather by the production of a recognizable and authoritative identity for the state. This project—of making the state the entity identified as the nation’s authoritative representative—emphasizes the natural cultural diversity of the nation and upholds the state as the sole unifier or manager of the “naturally” fragmented nation; the state is unified through

diversity. Roy considers several different ways that identification with the Indian nation-state was produced and consolidated during the 1950s and 1960s. She looks at how the Films Division of India, a state-owned documentary and newsreel production agency, allowed national audiences to “see the state”; how the “unity in diversity” formation of nationhood was reinforced in commemorations of India’s annual Republic Day; and how the government produced a

policy discourse claiming that scientific development was the ultimate national need and the most pressing priority for the state to address. She also analyzes the fate of the steel towns—industrial townships built to house the workers of nationalized steel plants—which were upheld as the exemplary national spaces of the new India. By prioritizing the role of actual manifestations of and encounters with the state, Roy moves beyond

theories of nationalism and state formation based on collective belief.

**Locating Postcolonial Narrative Genres** Verso Books

The Pre-Occupation of Postcolonial Studies contains essays by both leading figures and younger scholars engaged in the field of postcolonial studies. In this state-of-the-field reader, editors Fawzia Afzal-Khan and Kalpana Seshadri-Crooks have created a dynamic forum for contributors from a variety of theoretical and

disciplinary vantage points to question both the limits and the limitations of postcolonial thought. Since it burst on the academic scene as the "hot" new disciplinary field during the final decade of the twentieth century, postcolonial studies has faced criticism from those who question its "troubling" trajectories, its sometimes suspect epistemological and pedagogical methods, and its relatively narrow focus. With diverse essays that emerge from such disciplines as South Asian,

Latin American, Arab, and Jewish studies, this volume responds to skeptics and adherers alike, addressing not only the broad theoretical issues at stake within the field but also the position of the field itself within the academy, as well as its relationship to modern, postmodern, and Marxist discourses. Contributors offer critiques on ahistorical and universalizing tendencies in postcolonial work and confront the need for scholars to attend to issues of class, ideology,

and the effects of neocolonial practices. Seeking to broaden the field's traditionally literary spectrum of methodologies, these essayists take up large thematic issues to examine specific sites of colonial activities with all of their historical, political, and cultural significance. Closing the volume is an insightful interview with Homi Bhabha, in which he discusses postcolonial studies in the context of contemporary cultural politics and theory. The Pre-Occupation of

Postcolonial Studies not only offers an overview of the discipline but also pushes and pulls at the edges of postcolonial studies, offering a comprehensive view of the field's diversity of thought and envisioning clear pathways for its future. After the Imperial Turn

Springer Nature

Postcolonial theory has become enormously influential as a framework for understanding the Global South. It is also a school of thought popular because of its rejection of the supposedly universalizing categories of the Enlightenment. In this devastating critique, mounted on behalf of the radical Enlightenment tradition, Vivek Chibber offers the most comprehensive response

yet to postcolonial theory. Focusing on the hugely popular Subaltern Studies project, Chibber shows that its foundational arguments are based on a series of analytical and historical misapprehensions. He demonstrates that it is possible to affirm a universalizing theory without succumbing to Eurocentrism or reductionism. Postcolonial Theory and the Specter of Capital promises to be a historical milestone in contemporary social theory.

**On Postcolonial Literature as World Literature** Routledge

With the backdrop of new global powers, this volume interrogates the state of writing in English. Strongly interdisciplinary, it challenges the prevailing orthodoxy of postcolonial literary theory. An insistence on fieldwork and linguistics makes this book scene-changing in its approach to understanding and reading emerging literature in English.

Press

In addition to providing an accessible introduction to postcolonial theory, the authors explore the enormous potential which postcolonial art offers educators—a wealth of material to draw upon for any rethinking of the school curriculum. Some of the artists discussed in this groundbreaking volume include: African-American critic and writer James Baldwin, Trinidadian intellectual and activist C. L. R. James, Novelist Wilson Harris of Guyana, African-American novelist and

Nobel laureate Toni Morrison, The painter Arnaldo Roche-Rabell of Puerto Rico, The Australian artist Gordon Bennett, The Haitian–Puerto Rican–American artist Jean-Michel Basquiat, Plus a look at popular "world musics" from around the globe. "A seminal, cutting-edge work.... These insights will radically transform the pedagogical practices that now define schooling and education on a global landscape."  
—Norman K. Denzin, University of Illinois at Urbana-Champaign "A

landmark volume...for undergraduate and graduate students alike."  
—William F. Pinar, Louisiana State University  
"If ever a book registered important advances in our thinking about the relationship among culture, power, and education, this is it."  
—Michael W. Apple, University of Wisconsin–Madison  
**Postcolonial Thought and Social Theory** Duke University Press  
Postcolonial Theory is a ground-breaking critical introduction to the

burgeoning field of postcolonial studies. Leela Gandhi is the first to clearly map out this field in terms of its wider philosophical and intellectual context, drawing important connections between postcolonial theory and poststructuralism, postmodernism, marxism and feminism. She assesses the contribution of major theorists such as Edward Said, Gayatri Spivak and Homi Bhabha, and also points to postcolonialism's relationship to earlier

thinkers such as Frantz Fanon and Mahatma Gandhi. The book is distinctive in its concern for the specific historical, material and cultural contexts for postcolonial theory, and in its attempt to sketch out the ethical possibilities for postcolonial theory as a model for living with and 'knowing' cultural differences non-violently. Postcolonial Theory is a useful starting point for readers new to the field and a provocative account which opens possibilities for debate.

American Literature and Post-Colonial Theory  
Routledge

Challenging persistent geopolitical asymmetries in feminist knowledge production, this collection depicts collisions between concepts and lived experiences, between academic feminism and political activism, between the West as generalizable and the East as the concrete Other. Borderlands in European Gender Studies narrows the gap between cultural analysis and social theory, addressing

feminist theory's epistemological foundations and its capacity to confront the legacies of colonialism and socialism. The contributions demonstrate the enduring worth of feminist concepts for critical analysis, conceptualize resistance to multiple forms of oppression, and identify the implications of the decoupling of cultural and social feminist critique for the analysis of gender

relations in a postsocialist space. This book will be of import to activists and researchers in women's and gender studies, comparative gender politics and policy, political science, sociology, contemporary history, and European studies. It is suitable for use as a supplemental text for advanced undergraduate and graduate courses in a range of fields.

The End of History, Again?  
Oxford University Press  
Julietta Singh challenges the drive toward the mastery over self and others by showing how the forms of self-mastery advocated by anticolonial thinkers like Fanon and Gandhi unintentionally reproduced colonial logic, thereby leading her to argue for a more productive human subjectivity that is not centered on concepts of mastery.
