Genie: A Psycholinguistic Study of a Modern-Day "Wild Child reports on the linguistic research carried out through studying and working with Genie, a deprived and isolated, to an unprecedented degree, girl who was not discovered until she was an adolescent. An inhuman childhood had prevented Genie from learning language, and she knew little about the world in any respect save abuse, neglect, isolation, and deprivation. This book is organized into three parts encompassing 11 chapters. Part I provides a case history and background material on Genie's personality and language behavior. This part describes the interaction between the authors and this remarkable girl. Part II details Genie's linguistic development and overall language abilities, specifically her phonological development, as well as receptive knowledge and productive grammatical abilities of syntax, morphology, and semantics. This part also provides a comparison between her linguistic development and the language acquisition of other children. Part III presents a full description of the neurolinguistic work carried out on Genie and discusses the implications of this aspect of the case. This book will prove useful to neurolinguistics and psycholinguistics.

Looking for a headache cure? Try willow bark. Wondering how that ice cream got its color? Could be from bug juice. Giving us the lowdown on these and other chemical phenomena, *The Genie in the Bottle* reveals the fun and fascinating secrets collected by popular science writer Dr. Joe Schwarcz. Blending quirky chemistry with engaging tales from the history of science, Schwarcz offers a different twist on licorice and straight talk on travel to the dark side of the sun, along with the skinny on chocolate research, ginkgo biloba, and blueberries. Find out how spies used secret inks and how acetone changed the course of history. Dr. Joe even solves the mystery of exploding shrimp and, of course, delves into the secret of the genie in the bottle. Infused with Schwarcz's humor and his fondness for the wonders of magic and science, *The Genie in the Bottle* celebrates some of the the most amazing corners of our universe-and our cupboards.

"A group of remarkably penetrating, frank, and expert scientists, techno-wizards, activists, and writers raise provocative questions about what is gained and what is lost in a world enthralled by technology in this wonderfully soulful forum on life in the 'Wired World.' " -BOOKLIST Biotechnology, Cloning, Robotics, Nanotechnology... At a time when scientific and technological breakthroughs keep our eyes focused on the latest software upgrades or the newest cell-phone wizardry, a group of today's most innovative thinkers are looking beyond the horizon to explore both the promise and the peril of our technological future. Human ingenuity has granted us a world of unprecedented personal power -- enabling us to communicate instantaneously with anyone anywhere on the globe, to transport ourselves in both real and virtual worlds to distant places with ease, to fill our bellies with engineered commodities once available to only a privileged elite. Through our technologies, we have sought to free ourselves from the shackles of nature and become its master. Yet science and technology continually transform our experience and society in ways that often seem to be beyond our control. Today, different areas of research and innovation are advancing synergistically, multiplying the rate and magnitude of technological and societal change, with consequences that no one can predict. *Living with the Genie* explores the origins, nature, and meaning of such change, and our capacity to govern it. As the power of technology continues to accelerate, who, this book asks, will be the master of whom? In *Living with the Genie*, leading writers and thinkers come together to confront this question from many perspectives, including: Richard Powers's whimsical investigation of the limits of artificial intelligence; Philip Kitcher's confrontation of the moral implications of science; Richard Rhodes's exploration of the role of technology in reducing violence; Shiv Visvanathan's analysis of technology's genocidal potential; Lori Andrews's insights into the quest for human genetic enhancement; Alan Lightman's reflections on how technology changes the experience of our humanness. These and ten other provocative essays open the door to a new dialogue on how, in the quest for human mastery, technology may be changing what it means to be human, in ways we scarcely comprehend.

This book is a simplified guide to understand, attain and control the incredible power potential that is within all of us and it works wonders for people of all ages. It contains powerful tools and understanding to increase personal power and motivation by up to 300%. Techniques to prove this are included. Many people are astounded when they experience and prove that they can boost their energy by up to 300% and sometimes more. They realize how they have been vastly underestimating their own abilities. The author taught just a few of the many techniques to her son's soccer team labeled as 'hopeless' by their coach. She taught them all the truths and they went on to win the Minor and Major Premierships with only 4 goals scored against them all season. The simplicity of this power packed book is what makes it so unique and easy to understand.

Sixty-four short essays tell anecdotes about the applications of chemistry to everyday life and recount important episodes from the history of science. Humor and disaster stand side by side, as Schwarcz (chemistry, McGill University) comments on drain cleaners, candies, stinky feet, spoon-bending, and the use of Thalidomide to treat morning sickness in pregnant women. The chemistry of health and food is emphasized. c. Book News Inc.

A magical, heartwarming memoir from one of Hollywood's most beloved actresses, best known for her iconic role on *I Dream of Jeannie*. The landmark NBC hit television series *I Dream of Jeannie* has delighted generations of audiences and inspired untold numbers of teenage crushes on its beautiful blond star, Barbara Eden, for decades. Part pristine Hollywood princess and part classic bombshell, with innocence, strength, and comedic talent to spare, Barbara finally lets Jeannie out of her bottle to tell her whole story. *Jeannie Out of the Bottle* takes us behind the scenes of *I Dream of Jeannie* as well as Barbara's dozens of other stage, movie, television, and live concert performances. We follow her from the hungry years when she was a struggling studio contract player at 20th Century Fox through difficult weeks trying to survive as a chorus girl at *Ciro's Sunset Strip* supper club, from a stint as Johnny Carson's sidekick on live TV to tangling on-screen and off with some of Hollywood's most desirable leading men, including Elvis Presley, Clint Eastwood, Paul Newman, and Warren Beatty. From the ups and downs of her relationship with her Jeannie co-star Larry Hagman to a

touching meeting with an exquisite and vulnerable Marilyn Monroe at the twilight of her career, readers join Barbara on a thrilling journey through her five decades in Hollywood. But Barbara's story is also an intimate and honest memoir of personal tragedy: a stillborn child with her first husband, Michael Ansara; a verbally abusive, drug-addicted second husband; the loss of her beloved mother; and the accidental heroin-induced death of her adult son, just months before his wedding. With candor and poignancy, Barbara reflects on the challenges she has faced, as well as the joys she has experienced and how she has maintained her humor, optimism, and inimitable Jeannie magic throughout the roller-coaster ride of a truly memorable life. Illustrated with sixteen pages of photographs, including candid family pictures and rare publicity stills, *Jeannie Out of the Bottle* is a must-have for every fan, old and new.
