Governments, local authorities, school leaders, and teachers all over the world want to improve the

educational attainment and participation of all students, and to minimise any systematic differences in outcomes for social and economic groups. A particular concern is for those students from backgrounds that may objectively disadvantage them at school and beyond. However, considerable effort and money is currently being wasted on policies, practices and interventions that have very little hope of success, and that may indeed endanger the progress that is being made otherwise. The poor quality of much education research evidence, coupled with an unwillingness among users of evidence to discriminate appropriately between what we know and do not know, means that opportunities are being missed. At a time of reduced public spending it is important that proposed interventions are both effective and efficient. Overcoming Disadvantage in Education is unique in the way that it: Shows where the solutions to underachievement and poverty lie combines primary(new), secondary (official) and published (review) evidence distinguishes between those possible causes of underachievement that are largely fixed for individuals, and those that are modifiable. There are evidence-informed ways forward in handling under-achievement and increasing social justice in education. This book shows which the more likely approaches are, and where further work could yield further benefits. This book will be a key

text for students, developing academic researchers and supervisors in the social sciences, and for those research users charged with improving educational outcomes.

Black Skin, White Masks is a classic, devastating account of the dehumanising effects of colonisation experienced by black subjects living in a white world. First published in English in 1967, this book provides an unsurpassed study of the psychology of racism using scientific analysis and poetic grace.Franz Fanon identifies a devastating pathology at the heart of Western culture, a denial of difference, that persists to this day. A major influence on civil rights, anti-colonial, and black consciousness movements around the world, his writings speak to all who continue the struggle for political and cultural liberation.With an introduction by Paul Gilroy,

author of There Ain't No Black in the Union Jack.

"Vacation Notebook" o"Quadern de vacances"! marks the first book-length appearance in English of one of the most honored and widely read poets in contemporary Catalan literature. First published in 1976, this book deals with the painful experience of coming to terms with multiple sclerosis, a disease he was first diagnosed with in 1970. The poems speak frankly about death, but they also exhibit a remarkable, subtle understanding of life that comes only from those who are threatened so tangibly with its loss. These words, carved out of silence, reveal a vital music that is uniquely his, instantly recognizable. -Everything is known, - Miquel Martí i Pol says, -but so deeply it always astounds.-"

Society, globally, has entered into what might be called the "service economy." Services now constitute the largest share of GDP in most countries and provide the major source of employment in both developed and developing countries. Services permeate all aspects of peoples' lives and are becoming inseparable from most aspects of economic activity. "Quality management" has been a dominating managerial practice since World War II. With quality management initially associated with manufacturing industries, one might assume the relevance of quality management might decrease with the emergence of the service economy. To the contrary, the emergence of the service economy strengthened the importance of quality issues, which no longer are associated only with manufacturing industries but are increasingly applied in all service sectors, as well. Today, we talk not only about product or service quality but have even expanded the framework of quality to quality of life and quality of environment. Thus, quality and services have emerged in parallel as closely interrelated fields. The Encyclopedia of Quality and the Service Economy explores such relevant questions as: What are the characteristics, nature, and definitions of quality and services? How do we define quality of products, quality of services, or quality of life? How are services distinguished from goods? How do we measure various aspects of quality and services? How can products and service quality be managed most effectively and efficiently? What is the role of customers in creation of values? These questions and more are explored within the pages of this two-volume, A-to-Z reference work.

The classic work about meetings and decision-making. Meetings are a crucial part of all our lives, but too often they go nowhere and waste valuable time. In Six Thinking Hats, Edward de Bono shows how meetings can be transformed to produce quick, decisive results every time. The Six Hats method is a devastatingly simple technique based on the brain's different modes of thinking. The intelligence, experience and information of everyone is harnessed to reach the right conclusions quickly. These principles have been adopted by businesses and governments around the world, ending conflict and confusion in favour of harmony and productivity. The Six Hats strategy will fundamentally change the way you work and interact. 'An inspiring man with brilliant ideas. De Bono never ceases to amaze with his clarity of thought.' Sir Richard Branson *Didáctica universitaria en Entornos Virtuales de Enseñanza-Aprendizaje* IGI Global Anàlisi de les característiques de l'avaluació dins de la concepció constructivista de l'ensenyament i l'aprenentatge, i proposta de criteris per a la reflexió i la pràctica de l'avaluació.
