The Builder

John Wiley &
Sons
Edited by one
of the leading
experts in the
field, this
handbook

emphasizes
why solid-
state issues
are important,
which
approaches
should be

taken to avoid problems and exploit the opportunities offered by solid state properties in the pharmaceutical and agricultural industries. With its practical approach, this is at once a guideline for development chemists just entering the field as well as a high-quality source of reference material for specialists in the pharmaceutical and chemical industry, structural

chemists, physicochemists, crystallographers, inorganic chemists, and patent departments. *Insect Symbiosis, Volume 3* McFarland Volume 60 of *Reviews in Mineralogy and Geochemistry* assesses the current state of knowledge of lunar geoscience, given the data sets provided by missions of the 1990's, and lists remaining key questions as well as new ones for future exploration to

address. It documents how a planet or moon other than the world on which we live can be studied and understood in light of integrated suites of specific kinds of information. *The Moon* is the only body other than Earth for which we have material samples of known geologic context for study. This volume seeks to show how the different kinds of information gained about the Moon

relate to each other and also to learn from this experience, thus allowing more efficient planning for the exploration of other worlds.

Macrocylic Chemistry

Rutgers University Press
The Encyclopedia of Caves and Karst Science contains 350 alphabetically arranged entries. The topics include cave and karst geoscience, cave archaeology and human use of caves, art in caves,

hydrology and groundwater, cave and karst history, and conservation and management.

The Encyclopedia is extensively illustrated with photographs, maps, diagrams, and tables, and has thematic content lists and a comprehensive index to facilitate searching and browsing.

Encyclopedia of Caves and Karst Science
CRC Press
Molecular- and Nano-Tubes summarizes recent

advancements in the synthesis, fabrication and applications of tubular structures. An interdisciplinary overview of innovative science focused on tubular structures is provided. The reader is offered an overview of the different fields that molecular and nano tubes appear in, in order to learn the fundamental basics as well as the applications of these materials. This

<p>book also: Shows how nanotechnology creates novel materials by crossing the barriers between biology and material science, electronics and optics, medicine and more Demonstrates that tubes are a fundamental element in nature and used in disparate applications such as ion channels and carbon nanotubes Molecular- and Nano-Tubes is an ideal volume for</p>	<p>researchers and engineers working in materials science and nanotechnology. <i>A Handbook of the Canadian Pulp and Paper Industry ...</i> Springer Science & Business Media The associations between insects and microorganisms, while pervasive and of paramount ecological importance, have been relatively poorly understood. The third book in this set, <i>Insect</i></p>	<p>Symbiosis, Volume 3, complements the previous volumes in exploring this somewhat uncharted territory. Like its predecessors, Volume 3 illustrates how symbiosis research <i>Innovating with Concept Mapping</i> UCL Press Northern Australia is one of few tropical places left on Earth in which biodiversity—and the ecological processes underpinning that biodiversity—i</p>
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

s still relatively intact. However, scientific knowledge of that biodiversity is still in its infancy and the region remains a frontier for biological discovery. The butterfly and diurnal moth assemblages of the area, and their intimate associations with vascular plants (and sometimes ants), exemplify these points. However, the opportunity to fill knowledge gaps is quickly

closing: proposals for substantial development and exploitation of Australia's north will inevitably repeat the ecological devastation that has occurred in temperate southern Australia—loss of species, loss of ecological communities, fragmentation of populations, disruption of healthy ecosystem function and so on—all of which will diminish the value of the natural

heritage of the region before it is fully understood and appreciated. Written by several experts in the field, the main purpose of this atlas is to compile a comprehensive inventory of the butterflies and diurnal moths of northern Australia to form the scientific baseline against which the extent and direction of change can be assessed in the future. Such information will also assist

in identifying the region's biological assets, to inform policy and management agencies and to set priorities for biodiversity conservation.

Unprecedente
d urban
growth makes
sustainability
in cities a

crucial issue for policy makers, scholars and business leaders. This emerging urban crisis challenges environment-based and economic-based approaches to sustainability, and highlights the complex and critical role that culture plays in ensuring that cities are viable for future generations. This publication assesses the use of cultural indicators as a tool for policymakers,

drawing on case studies of Patan (Nepal), Penang (Malaysia), Cheongju (South Korea), and Kanazawa (Japan), and offers fresh insights into the role of culture in fostering community development, environmental awareness and balanced economic growth.

Low-intensity Conflict in the Third World
Springer
Design
Transactions presents the outcome of new research to emerge from 'Innochain', a consortium of six leading European architectural and engineering-focused institutions and their industry partners. The book presents new advances in digital design tooling that challenge established building

cultures and systems. It offers new sustainable and materially smart design solutions with a strong focus on changing the way the industry thinks, designs, and builds our physical environment. Divided into sections exploring communication, simulation and materialisation, Design Transactions explores digital and physical prototyping and testing that challenges the

<p>traditional linear construction methods of incremental refinement. This novel research investigates 'the digital chain' between phases as an opportunity for extended interdisciplinary design collaboration. The highly illustrated book features work from 15 early-stage researchers alongside chapters from world-leading industry collaborators and academics. <i>Direct nuclear</i></p>	<p><i>Reactions</i> Springer Science & Business Media The popular image of Scotland is dominated by widely recognized elements of Celtic culture. But a significant non-Celtic influence on Scotland's history has been largely ignored for centuries? This book argues that much of Scotland's history and culture from 1100 forward is Jewish. The authors provide</p>	<p>evidence that many of the national heroes, villains, rulers, nobles, traders, merchants, bishops, guild members, burgesses, and ministers of Scotland were of Jewish descent, their ancestors originating in France and Spain. Much of the traditional historical account of Scotland, it is proposed, rests on fundamental interpretive errors, perpetuated in order to affirm Scotland's identity as a</p>

Celtic, Christian society. A more accurate and profound understanding of Scottish history has thus been buried. The authors' wide-ranging research includes examination of census records, archaeological artifacts, castle carvings, cemetery inscriptions, religious seals, coinage, burgess and guild member rolls, noble genealogies, family crests, portraiture, and

geographic place names. Building UN This stunning picture book looks into the life of Georgia Gilmore, a hidden figure of history who played a critical role in the civil rights movement and used her passion for baking to help the Montgomery Bus Boycott achieve its goal. Georgia decided to help the best way she knew how. She worked together with a group of women and together they purchased the

supplies they needed-bread, lettuce, and chickens. And off they went to cook. The women brought food to the mass meetings that followed at the church. They sold sandwiches. They sold dinners in their neighborhood s. As the boycotters walked and walked, Georgia cooked and cooked. Georgia Gilmore was a cook at the National Lunch Company in Montgomery,

Alabama. When the bus boycotts broke out in Montgomery after Rosa Parks was arrested, Georgia knew just what to do. She organized a group of women who cooked and baked to fund-raise for gas and cars to help sustain the boycott. Called the Club from Nowhere, Georgia was the only person who knew who baked and bought the food, and she said the money came

from "nowhere" to anyone who asked. When Martin Luther King Jr. was arrested for his role in the boycott, Georgia testified on his behalf, and her home became a meeting place for civil rights leaders. This picture book highlights a hidden figure of the civil rights movement who fueled the bus boycotts and demonstrated that one person can make a real change in her community

and beyond. It also includes one of her delicious recipes for kids to try with the help of their parents!

Running the Batteries

Springer Science & Business Media
 Macrocyclic Chemistry: Current Trends and Future Perspectives illustrates essential concepts in this expanding research field covering both basic and applied studies. Written by well-known

experts from around the world, the topics of the chapters range from new macrocyclic architectures with different functions and self-assembly processes through to the modeling and dynamics of such systems. The content also reflects on application possibilities in analytical chemistry, separation processes, material preparation and medicine. Thus this book serves as a creative source of

research strategies and methodic tools. Providing an excellent overview of the field, this book will be a valuable resource for researchers in industry and academic institutions as well as for teachers of science and graduate students. This book is devoted to the long-standing tradition of the International Symposia on Macrocyclic Chemistry (ISMC) and published to coincide with

the 30th meeting, Dresden, Germany. **Atlas of Butterflies and Diurnal Moths in the Monsoon Tropics of Northern Australia** Routledge With this handbook, the distinguished team of editors has combined the expertise of leading nanomaterials scientists to provide the latest overview of this field. They cover the whole spectrum of nanomaterials , ranging from

theory, synthesis, properties, characterization to application, including such new developments as quantum dots, nanoparticles, nanoporous materials, nanowires, nanotubes, and nanostructured polymers. The result is recommended reading for everybody working in nanoscience: Newcomers to the field can acquaint themselves with this exciting subject, while

specialists will find answers to all their questions as well as helpful suggestions for further research. *Fundamentals of Optical Waveguides* Elsevier In Running the Batteries, Peter Ericson tells the story of the Union gunboats on the western rivers. Using original sources which let the participants speak for themselves, the book follows the Union navy as it battles its way down river to the

sea. Battles such as Fort Henry, Fort Donelson, Island Number 10 and Vicksburg are brought out in great detail, as are lesser known battles such as Plum Run Bend, Memphis and the Red River Campaign. *The New York Times Index* National Academies Press This book takes a pragmatic approach to deploying state-of-the-art optical networking equipment in metro-core and backbone

networks. The book is oriented towards practical implementation of optical network design. Algorithms and methodologies related to routing, regeneration, wavelength assignment, sub rate-traffic grooming and protection are presented, with an emphasis on optical-bypass-enabled (or all-optical) networks. The author has emphasized the economics of optical

networking, with a full chapter of economic studies that offer guidelines as to when and how optical-bypass technology should be deployed. This new edition contains: new chapter on dynamic optical networking and a new chapter on flexible/elastic optical networks. Expanded coverage of new physical-layer technology (e.g., coherent detection) and its impact on

network design and enhanced coverage of ROADM architectures and properties, including colorless, directionless, contentionless and gridless. Covers 'hot' topics, such as Software Defined Networking and energy efficiency, algorithmic advancements and techniques, especially in the area of impairment-aware routing and wavelength assignment. Provides more

illustrative examples of concepts are provided, using three reference networks (the topology files for the networks are provided on a web site, for further studies by the reader). Also exercises have been added at the end of the chapters to enhance the book's utility as a course textbook.

A Plain Introduction to the Criticism of the New Testament for the Use of Biblical Students

Springer
 Inspired by the International White Shark Symposium in 2010, *Global Perspectives on the Biology and Life History of the White Shark* incorporates the most important contemporary research findings into a single peer-reviewed book. This beautifully illustrated reference represents a historic change in the context of White Shark (*Carcharodon carcharias*) research.

Once considered one of the most poorly understood and difficult sharks to study, this timely book recognizes a new sophisticated focus on the White Shark, raising its status from obscurity to enlightenment. *The Global Perspectives on the Biology and Life History of the White Shark* celebrates the White Shark as the most studied shark in the sea. Within the chapters one can find new

insights into a vast range of topics, such as behavior, physiology, migration patterns, habitat preferences, daily activity patterns, molecular genetics, reproductive biology and new research methods. The book also delves into population monitoring and policy options for managers and researchers.

Nanomaterials

Chemistry

CRC Press

Focusing specifically on the management

of karst environments, this volume draws together the world's leading karst experts to provide a vital source for the study and management of this unique physical setting.

Although karst landscapes cover 12% of the Earth's terrain and provide 25% of the world's drinking water, the resource management of karst environments has only previously received indirect

attention.

Through a comprehensive approach, Karst Management focuses on engineering issues associated with surface karst such as quarries, dams, and agriculture, subsurface topics such as the management of groundwater, show caves, cave biota, and geo-archaeology projects.

Chapters that focus on karst as an integrated system look at IUCN World

Heritage sites, national parks, policy and regulation, measuring systematic disturbance, information management, and public environmental education. The text incorporates the most up-to-date research from leading karst scientists. This volume provides important perspectives for university students, educators, geoengineers, resource managers, and planners who are interested in

or work with this unique physical landscape. Strategic Planning for Coalition Warfare, 1941-1942 [-1943-1944] John Wiley & Sons
 After November 1776, the Hackensack Valley--located in northeastern New Jersey and Rockland County, New York--lay between the invading British army in New York City and the main Continental defense forces in the Hudson Highlands.

Jersey Dutch patriot and Tory troops carried on a five-year war of neighbors between the lines, while the grand armies of Britain and America maneuvered on either side of them for a chance to strike a blow at the other. Adrian Leiby offers an exciting narrative of the people of Dutch New Jersey and New York during this conflict. Historians will find colorful details about the

<p>Revolutionary War, and genealogists will find much previously unpublished material on hundreds of men and women of Dutch New Jersey and New York in the 1700s.</p> <p>Cotton Physiology Lulu.com</p> <p>This book constitutes the refereed proceedings of the 7th International</p>	<p>Conference on Concept Mapping, CMC 2016, held in Tallinn, Estonia, in September 2016. The 25 revised full papers presented were carefully reviewed and selected from 135 submissions. The papers address issues such as facilitation of learning; eliciting, capturing, archiving, and</p>	<p>using “expert” knowledge; planning instruction; assessment of “deep” understandings; research planning; collaborative knowledge modeling; creation of “knowledge portfolios”; curriculum design; eLearning, and administrative and strategic planning and monitoring.</p>
