 Posttraumatic Growth reworks and overhauls the seminal 2006 Handbook of Posttraumatic Growth. It provides a wide range of answers to questions concerning

knowledge of posttraumatic growth (PTG) theory, its synthesis and contrast with other theories and models, and its applications in diverse settings. The book starts with an overview of the history, components, and outcomes of PTG. Next, chapters review quantitative, qualitative, and cross-cultural research on PTG, including in relation to cognitive function, identity formation, cross-national and gender differences, and similarities and differences between adults and children. The final section shows readers how to facilitate optimal outcomes with PTG at the level of the individual, the group, the community, and society.

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the

U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

The Rise of Victimhood Culture offers a framework for understanding recent moral conflicts at U.S. universities, which have bled into society at large. These are not the familiar clashes between liberals and conservatives or the religious and the secular: instead, they are clashes between a new moral culture—victimhood culture—and a more traditional culture of dignity. Even as students increasingly demand trigger warnings and “safe spaces,” many young people are quick to police the words and deeds of others, who in turn claim that political correctness has run amok. Interestingly, members of both camps often consider themselves victims of the other. In tracking the rise of victimhood culture, Bradley Campbell and Jason Manning help to decode an often dizzying cultural milieu, from campus riots over conservative speakers and debates around free speech to the election of Donald Trump.

Theories of Adolescent Development brings together the many theories surrounding this life stage in one comprehensive reference. It begins with an introduction to the nature of theory in the field of adolescence, including an analysis of why there are so many theories in this field. Theory chapters are grouped into three sections: biological systems, psychological systems and societal systems. Each chapter considers a family of theories, including their scope,

assumptions and contributions to the study of adolescence. In addition, sections discuss the strengths and weaknesses of the family, along with relevant comparisons to other theories and future directions in theory and research.

Scoring another goal for gender equality, the 2019 Southern African Development Community (SADC) Gender Protocol Barometer breaks with past tradition in focusing solely on Sexual and Reproductive Health and Rights.

Measuring 100 indicators across seven themes, the Barometer is the first civil society shadow report on SADC's new SRHR Strategy Score Card, ranking countries based on their performance, while offering detailed analysis and insights into what is changing and still needs to change. The no-hold-barred #VoiceandChoice Barometer features the first stand-alone chapters on Adolescent Sexual and Reproductive Health and Rights, Safe Abortion, and Sexual Diversity. It provides the data that underpins 40 national campaigns led the focal networks of the Southern African Gender Protocol Alliance, and 174 local campaigns led by the Centres of Excellence for Gender in Local Government. A must read for all those committed to Action and Results for Agenda 2030 in the SADC region.

Since 1994, there have been major attempts to change educational policy in order to meet the economic demands of

South Africa and equalize education for all. Implementation of this policy is the big challenge. Through critical commentary and analysis, this book brings into focus the various policy documents that have been produced since the early 1990s. It looks at the history of education policy, why coherent policy is necessary, how it should be implemented and, most critical of all, it discusses the importance of education management and delivery.
