Communicating in Groups offers a concise, step-by-step introduction to the theory and practice of small group communication and teaches students to develop and apply critical thinking skills in group problem-solving situations. The book continues to synthesize current small group theory and research while presenting the material in a practical and accessible manner for students interested in the dynamics of small group communication. The eighth edition marks the first time two central chapters on communication are integrated into one chapter, capturing key principles of both verbal and non-verbal small group behavior within a new definition of communication. With the firm belief that group participation can be an uplifting, energizing experience, authors Kathy Adams and Gloria Galanes give students the tools they will need to achieve this outcome. Research and theory are presented with a focus on what is important to students—understanding their group experiences and making them effective communicators.

A First Look at Communication Theory Cambridge University Press

In the present book, How to Win Friends and Influence People, Dale Carnegie says, "You can make someone want to do what you want them to do by seeing the situation from the other person's point of view and arousing in the other person an eager want." You learn how to make people like you, win people over to your way of thinking, and change people without causing offense or arousing resentment. For instance, "let the other person feel that the idea is his or hers" and "talk about your own mistakes before criticizing the other person." This book is all about building relationships. With good relationships, personal and business successes are easy and swift to achieve. Twelve Ways to Win People to Your Way of Thinking 1. The only way to get the best of an argument is to avoid it. 2. Show respect for the other person's opinions. Never say "You're wrong." 3. If you're wrong, admit it quickly and emphatically. 4. Begin in a friendly way. 5. Start with questions to which the other person will answer yes. 6. Let the other person do a great deal of the talking. 7. Let the other person feel the idea is his or hers. 8. Try honestly to see things from the other person's point of view. 9. Be sympathetic with the other person's ideas and desires. 10. Appeal to the nobler motives. 11.

Dramatize your ideas. 12. Throw down a challenge.

Power and Citizenship in American Politics - Brief Edition McGraw-Hill Humanities, Social Sciences & World Languages

Providers serving older adults face a growing problem. Older adults are becoming increasingly dissatisfied with service quality citing deficits in provider communication and relationship skills. The author argues this dissatisfaction is largely related to three widespread issues: ageism, use of professional jargon, and age-related changes in the older adult. To address these concerns, Dr. Storlie advocates adoption of an evidence-based, person-centered approach to communication. The benefits of person-centered communication are many. They can increase older adult satisfaction with provider services, enhance mutual respect and understanding, improve accuracy of information exchanged, positively impact service outcomes, increase compliance with provider recommendations, and reduce the frustration and stress often experienced by both provider and older adult. Rare to this genre, readers are introduced to several under-explored topics within the field of communication, along with methods for applying concepts from research findings into these topics to enhance the quality of interpersonal communication. Topics include the role of mental imagery in the communication process, the influence of neurocardiology on relationships, and controversial findings from research into quantum physics. The book concludes by highlighting progress made in narrowing the interpersonal communication gap and forecasts how communications-oriented technological advances might improve quality of life for 21st century older adults and the providers who serve them. Utilizing interdisciplinary case studies to illustrate common problematic situations, this book provides detailed exercises that explain how providers can integrate person-centered communication into their practices to improve provider-older adult interactions. Written in a style designed to maximize learning, it helps providers find the information they need, understand what they read, and apply what they've learned to improve professional communication. *Person-Centered Communication with Older Adults* is an essential guide for today's healthcare professionals and other aging-services providers, and also for the educators who help to prepare the providers of tomorrow. Presents a conceptual framework for understanding respect-based, person-centered communication Teaches specific communication skills to aging services providers and educators to assist in effectively communicating with older adults Includes numerous case studies to help in identifying common problematic situations and describing practical ways to integrate positive communication One of the first books to integrate scientific, evidence-based findings with a personal approach that includes important new information on neurocardiology
