Free NetObjects Fusion 3 "Cheat Sheet" Inside! Web Site Setup and Management Made Clear and Simple! Today's Web surfers expect more from your Web site than a picture of your corporate headquarters and a few links to your favorite shareware sites. They expect a powerful, media-rich tool that helps them find the information they need. NetObjects Fusion™ 3 For Dummies® guides you through creating sophisticated and efficient Web sites using terms that first-time Webmasters will easily understand. Valuable Bonus CD Includes: Microsoft's popular Web browser A complete Internet client A plug-in for playing Macromedia Director animations and presentations MindSpring: Internet software that can store multiple access phone numbers A trial version of NetObjects Fusion 3 Shareware programs are fully functional, free trial versions of copyrighted programs. If you like particular programs, register with their authors for a nominal fee and receive licenses, enhanced versions, and technical support. Freeware programs are free, copyrighted games, applications, and utilities. You can copy them to as many PCs as you like — free — but they have no technical support. System Requirements: A PC with 90-Mhz Pentium or higher; Windows 95 or later; 32MB RAM minimum; CD-ROM (2x) drive; and a 14,400 bps modem (for Internet connection — regular access charges apply) Inside, find helpful advice on how to: Give your Web site a professional, consistent look and feel Unlock the linking power of NavBars Forget typing anything twice on your site, thanks to Assets Create custom margins and borders with MasterBorders Add the power of Java with NetObjects Components Publish your site to any Web server automatically

*8th International Conference on Digital Documents and Electronic Publishing, DDEP 2000, 5th International Workshop on the Principles of Digital Document Processing, PODDP 2000, Munich, Germany, September 13-15, 2000, Revised Papers* McGraw Hill Professional

"Fusion Design Guide" shows Web designers and graphics artists how to create award-winning Web pages and Web sites. Using numerous projects in this book, Web publishers can create sites without HTML coding by using Fusion, a Windows-based visual design application from NetObjects. The CD-ROM contains a demo of Fusion for readers to sample before purchase.

Design, develop, publish, and manage your NetObjects Fusion 11 web site with ease using this hands-on guide. Build a web site template and pages Add text, graphics, and audio Work with tables and objects Establish site look and feel with SiteStyles Set up site navigation and build hyperlinks Create a photo gallery Customize your site with Flash, Java, and ActiveX Collect data with forms Set up Frequently Asked Questions and Guestbooks Create advanced functionality with custom components Publish your site to the web

*How to Do Everything NetObjects Fusion 11* Cengage Learning

A Practical Guide to Localization was written for technical translators, localization engineers, testing engineers, desktop publishers, project managers, and anyone else who may be involved in the release of multilingual products. In this second edition, translators can learn more about localizing software, online help and documentation files, and the latest translation technology tools. Localization engineers can learn all about developing, engineering, and testing multilingual software and online help projects. For project managers, there is all the information needed for planning translation and localization projects, finding resources, and ensuring product quality. New to this

second, fully updated and revised edition are chapters on internationalization, multilingual desktop publishing, and software quality assurance. The book has been designed both as a reference work and a teaching tool. Visit the [www.locguide.com](http://www.locguide.com) web site for additions and updates to the book, as well as references and links relevant to technical translation and localization. The web site also contains extracts from the book, reviews, and ordering information. Bert Esselink has been active in localization for over a decade. After graduating in technical translation and taking university classes in programming and computational linguistics he worked for several years as software localizer, localization engineer, and technical project manager at International Software Products. In 1996 he joined ALPNET in Amsterdam as localization manager before taking on the role of globalization manager, developing internal production quality standards. In January 2000 Bert joined Lionbridge to head up their European globalization consulting services.

In this updated and expanded second edition of her popular guidebook, Searcher columnist Irene McDermott once again exhorts her fellow reference librarians to don their pith helmets and follow her fearlessly into the Web jungle. She presents new and improved troubleshooting tips and advice, Web resources for answering reference questions, and strategies for managing information and keeping current. In addition to helping librarians make the most of Web tools and resources, the book offers practical advice on privacy and child safety, assisting patrons with special needs, Internet training, building library Web pages, and much more

#### **The How-to Magazine of Desktop Publishing** Springer

This volume contains the proceedings of two recent conferences in the field of electronic publishing and digital documents: - DDEP 2000, the 8th International Conference on Digital Documents and Electronic Publishing, the successor conference to the EP conference series; and - PODDP 2000, the 5th International Workshop on the Principles of Digital Document Processing. Both conferences were held at the Technische Universität München, Munich, Germany in September 2000. DDEP 2000 was the eighth in a biennial series of international conferences organized to promote the exchange of novel ideas concerning the computer production, manipulation and dissemination of documents. This conference series has attempted to reflect the evolving nature and usage of documents by treating digital documents and electronic publishing as a broad topic covering many aspects. These aspects have included document models, document representation and document dissemination, dynamic and hyper-documents, document analysis and management, and wide-ranging applications. The papers presented at DDEP 2000 and in this volume reflect this broad view, and cover such diverse topics as hypermedia structure and design, multimedia authoring techniques and systems, document structure inference, typography, document management and adaptation, document collections and Petri nets. All papers were refereed by an international program committee.

Macworld Penguin

What has been the impact of computerisation on archaeology, and is it a good or bad thing? The papers in this volume derive from the 26th conference held in Barcelona in March 1998. Overall, papers deal with the advent of new techniques to overcome existing problems in archaeological analysis or data archiving. Thus the papers deal with the use of computers in archaeological fieldwork (surveying, image processing, GIS), in aiding explanation (for example statistical analysis and computer modelling) and in archiving and heritage work (databases and CRM).
