Network Security - Chapter 12 Flashcards | Quizlet Chapter 12
 Network SecurityChapter 12 (Network Security) STUDY. PLAY.
 symmetric encryption. Encryption in which both the sender and
 the receiver of a packet use the same key (a shared key) for
 encryption and decryption. asymmetric encryption. Encryption in
 which the sender and receiver of a packet use different
 keys.Chapter 12 (Network Security) Flashcards | Quizlet12.1.2.1
 Use subnets to distribute control . Subnets are a possible tool for
 distributing network control. A subnet administrator should be
 appointed when a subnet is created. She is then responsible for
 the security of the network and for assigning IP addresses to the
 devices connected to the networks.[Chapter 12] Network
 SecurityChapter 12. Network Security After completion of this
 chapter, you will be able to answer the following questions: What
 are the goals of network security, and what sorts of attacks ... -
